Literature E. S. Shaffer,1986-04-17 Comparative Criticism is an annual journal of comparative literature and cultural studies that has gained an international reputation since its inception in 1979 It contains major articles on literary theory and criticism on a wide range of comparative topics and on interdisciplinary debates It includes translations of literary scholarly and critical works substantial reviews of important books in the field and bibliographies on specialist themes for the year on individual writers and on comparative literary studies in Britain and Ireland *Music and the Renaissance* Philippe Vendrix,2017-07-05 This volume unites a collection of articles which illustrate brilliantly the complexity of European cultural history in the Renaissance On the one hand scholars of this period were inspired by classical narratives on the sublime effects of music and on the other hand were affected by the profound religious upheavals which destroyed the unity of Western Christianity and in so doing opened up new avenues in the world of music These articles offer as broad a vision as possible of the ways of thinking about music which developed in the fifteenth and sixteenth centuries **Music as Concept and Practice in the Late Middle Ages** Reinhard Strohm,Bonnie J. Blackburn,2001 Music as Concept and Practice in the Late Middle Ages is an entirely new addition to the New Oxford History of Music series rather than a revision of the volume s predecessor published in 1960 It takes account not only of the developments in late medieval music scholarship during the latter decades of the twentieth century but also of the experience gained through significant changes in the performance practice of the late medieval repertory witnessed during this period All the chapters include areas of discussion whose coverage in the series hitherto has been either wholly lacking or at best marginal Muslim and Jewish musical traditions of the Middle Ages late medieval office chant medieval dance music musical instruments in society music in Central and Eastern Europe music theory of the fourteenth and fifteenth centuries music and early Renaissance humanism The first chapter and the last three present the conceptualization of music in speculative theory philosophy compositional and didactic practice and musical historiography Four chapters and part of the first illustrate important musical repertories and genres as they were developed within diverse societies The eight authors all of them with a long standing interest in their respective subjects have created through their collaboration a blend of mature scholarship and original investigation The volume s novelty of approach and content is complemented by a firm anchorage in the specialist literature and documentary source

material Today no single view of the Middle Ages can be acceptable to the musician or to the historian The present volume which addresses itself to both provides solid information on formerly marginal themes and advocates further exploration of the other Middle Ages **The Power of Eloquence and English Renaissance Literature** Neil Rhodes,1992-10-15 This book is an ambitious critical investigation of the idea of eloquence as it informs classical and Renaissance thinking about literature Medieval Virginites Ruth Evans,Sarah Salih,Anke Bernau,2003-01-01 The variety of subjects and disciplines represented here testify both to the elusiveness of virginity and to its lasting appeal and importance Medieval Virginites shows how virginity s inherent ambiguity highlights the problems contradictions and discontinuities lurking within medieval ideologies
