students of American literature Reading the American Novel 1865 1914 provides a comprehensive introduction to the American novel in the post civil war period Locates American novels and stories within a specific historical and literary context Offers fresh analyses of key selected literary works Addresses a wide audience of academics and non academics in clear accessible prose Demonstrates the changing mentality of 19th century America entering the 20th century Explores the relationship between the intellectual and artistic output of the time and the turbulent socio political context **Writing the History of the Mind** Cristina Chimisso,2016-02-11 For much of the twentieth century French intellectual life was dominated by theoreticians and historians of mentalit Traditionally the study of the mind and of its limits and capabilities was the domain of philosophy however in the first decades of the twentieth century practitioners of the emergent human and social sciences were increasingly competing with philosophers in this field ethnologists sociologists psychologists and historians of science were all claiming to study how people think Scholars including Gaston Bachelard Georges Canguilhem L on Brunschvicg Lucien L vy Bruhl Lucien Febvre Abel Rey Alexandre Koyr and H l ne Metzger were all investigating the mind historically and participating in shared research projects Yet as they have since been appropriated by the different disciplines literature on their findings has so far failed to recognise the connections between their research and their importance in intellectual history In this exemplary book Cristina Chimisso reconstructs the world of these intellectuals and the key debates in the philosophy of mind particularly between those who studied specific mentalities by employing prevalently historical and philological methods and those who thought it possible to write a history of the mind outlining the evolution of ways of thinking that had produced the modern mentality Dr Chimisso situates the key French scholars in their historical context and shows how their ideas and agendas were indissolubly linked with their social and institutional positions such as their political and religious allegiances their status in academia and their familial situation The author employs a vast range of original research using philosophical and scientific texts as well as archive documents correspondence and seminar minutes from the period covered to recreate the milieu in which these relatively neglected scholars made advances in the history of philosophy and science and produced The Artificial Self Hilary Nias,1999 This book reassesses Taine as the very model of the European intellectual in the second half of the 19th century The author draws on unpublished manuscripts and letters to reveal a self disguised tentative and ironic mentality very like the one Taine described in his psychological writings These qualities are reflected not only in his own ludic response to his times but in that of many fellow Second Empire intellectuals Darwinian evolution new scientific discoveries la Critique and Impressionism all made a profound impact on Taine s thinking and on his contribution to the moral revival and Nationalism of the Third Republic **The Saturday Review of Politics, Literature, Science, Art, and Finance** ,1879 **Threat Perceptions** Saran Ghatak,2010-12-13 Threat Perceptions The Policing of Dangers from Eugenics to the War on Terrorism is a study of the legal scientific and social constructions of danger and risk of crime in the United States since the late nineteenth century Governance of risk has

emerged as an intrinsic part of the legislative and administrative processes of contemporary societies. While institutional practices of risk management are more prevalent in contemporary times, the rationality of controlling or eliminating potential risks is not necessarily new in history. Specific aspects of contemporary risk management techniques were present in certain early twentieth-century crime control policies. Some of the earliest instances were the defective delinquency laws directed at controlling the peril of the so-called feeble-minded criminals. Similarly, policing of political dissent before and after the advent of McCarthyism contained elements of techniques that have been revised and expanded in the contemporary era of the PATRIOT Act. The very idea of risk is contingent on and produced through the intersection of various social processes. Prevailing social conditions and political trends influence the production of risk perceptions just as legislations and judicial precedents institutionalize the calculation and control of risk by criminal justice and security apparatuses of a nation. Simultaneously, the prediction of risk is established by scientific discourses and practices as psychological profiles, statistical models, and other measures of risk factors render the future calculable, hence predictable. Thus, a comprehensive understanding of risk management and security practices necessitates the analysis of these processes that essentially transforms a possibility into reality, which then forms the basis of public policies and governmental processes.

[A Concise Companion to the Victorian Novel](#) Francis O'Gorman, 2008-04-15 This volume presents fresh approaches to classic Victorian fiction from 1830-1900. It opens up for the reader the cultural world in which the Victorian novel was written and read. It crosses traditional disciplinary boundaries. It provides fresh perspectives on how Victorian fiction relates to different contexts such as class, sexuality, empire, psychology, law, and biology.

The New Prometheans Courtenay Raia, 2019-12-04 The Society for Psychical Research was established in 1882 to further the scientific study of consciousness, but it arose in the surf of a larger cultural need. Victorians were on the hunt for self-understanding. Mesmerists, spiritualists, and other romantic seekers roamed sunken landscapes of entrancement, and when psychology was finally ready to confront these altered states, psychical research was adopted as an experimental vanguard. Far from a rejected science, it was a necessary heterodoxy probing mysteries as diverse as telepathy, hypnosis, and even séance phenomena. Its investigators sought facts far afield of physical laws, evidence of a transcendent, irreducible mind. *The New Prometheans* traces the evolution of psychical research through the intertwining biographies of four men: chemist Sir William Crookes, depth psychologist Frederic Myers, ether physicist Sir Oliver Lodge, and anthropologist Andrew Lang. All past presidents of the society, these men brought psychical research beyond academic circles and into the public square, making it part of a shared, far-reaching examination of science and society. By layering their papers, textbooks, and lectures with more intimate texts like diaries, letters, and literary compositions, Courtenay Raia returns us to a critical juncture in the history of secularization: the last great gesture of reconciliation between science and sacred truths.

Martiniello, Elisa Greco, 2018-11-15 For the last three decades Uganda has been one of the fastest growing economies in Africa Globally praised as an African success story and heavily backed by international financial institutions development agencies and bilateral donors the country has become an exemplar of economic and political reform for those who espouse a neoliberal model of development The neoliberal policies and the resulting restructuring of the country have been accompanied by narratives of progress prosperity and modernisation and justified in the name of development But this self celebratory narrative which is critiqued by many in Uganda masks the disruptive social impact of these reforms and silences the complex and persistent crises resulting from neoliberal transformation Bringing together a range of leading scholars on the country this collection represents a timely contribution to the debate around the New Uganda one which confronts the often sanitised and largely depoliticised accounts of the Museveni government and its proponents Harnessing a wealth of empirical materials the contributors offer a critical multi disciplinary analysis of the unprecedented political socio economic cultural and ecological transformations brought about by neoliberal capitalist restructuring since the 1980s The result is the most comprehensive collective study to date of a neoliberal market society in contemporary Africa offering crucial insights for other countries in the Global South

Psychopathology in Women Margarita Sáenz-Herrero, 2014-10-14 Gender has a fundamental influence on the human brain not only by virtue of biological and hormonal differences between the sexes but also because of the impact of gender specific cultural social anthropological and environmental factors Nevertheless the relation of gender and psychopathology remains a largely neglected field Gender perspective has been treated as a paradigm in this book on psychopathology because it determines the way in which a psychiatric symptom is defined perceived and understood This conception of gender as being of key importance in the definition of psychiatric symptomatology is exceptional in the literature The book opens by examining historical and cultural aspects of mental health in women

worldwide and the relation of sex brain and gender with coverage of both neurobiological and psychosocial aspects The significance of gender with regard to specific aspects of psychopathology is then addressed in detail A wide range of psychological disorders are considered as well as hormonal influences and issues concerning body image self identity sexuality and life instinct It is hoped that this book will make a significant contribution in ensuring that gender perspective receives due attention within descriptive psychopathology
