Rich Against Poor:

The Web of Violence Jennifer E. Turpin, Lester R. Kurtz, 1997 An excellent representation of the interdisciplinary thrust of peace studies Paul Joseph Tufts University Violence is a topic of concern everywhere in the media in churches in the halls of governments In every land and in every culture violence is considered by most to be taboo a last resort Yet under certain conditions from the level of the family to the level of nations violence is used as a mechanism of social control Various rationalizations thus emerge to distinguish between legitimate and illegitimate violence The Web of Violence explores the interrelationship among personal collective national and global levels of violence This unique collection brings together a number of internationally known contributors to address the genesis and manifestations of violence in the search for a remedy for this confounding social problem As the global community becomes more intimate we must better understand the nature of violence The Web of Violence supports this aim by examining the dangerous human phenomenon from many perspectives at different levels and using multiple methodologies CONTRIBUTORS Robert Jay Lifton Christopher G Ellison John P Bartkowski Yuan Horng Chu Philip Smith Robert Elias Birgit Brock Utne Riane Eisler Johan Galtung

The Case of the Poor Against the Rich Fairly Considered. By a Mutual Friend [i.e. Harriet Grote]. ,1850 *Eden on the Charles* Michael Rawson, 2014-10-06 Drinking a glass of tap water strolling in a park hopping a train for the suburbs some aspects of city life are so familiar that we don't think twice about them But such simple actions are structured by complex relationships with our natural world The contours of these relationships social cultural political economic and legal were established during America's first great period of urbanization in the nineteenth century and Boston one of the earliest cities in America often led the nation in designing them A richly textured cultural and social history of the development of nineteenth century Boston this book provides a new environmental perspective on the creation of America's first cities *Eden on the Charles* explores how Bostonians channeled country lakes through miles of pipeline to provide clean water dredged the ocean to deepen the harbor filled tidal flats and covered the peninsula with houses shops and factories and created a metropolitan system of parks and greenways facilitating the conversion of fields into suburbs The book shows how in Boston different class and ethnic groups brought rival ideas of nature and competing visions of a city upon a hill to the process of urbanization and were forced to conform their goals to the realities of Boston's distinctive natural setting The outcomes of their battles for control over the city's development were ultimately recorded in the very fabric of Boston itself In Boston's history we find the seeds of the environmental relationships that for better or worse have defined urban America to this day Research Reports ,1972 **Friends' Intelligencer** ,1868 **Parliamentary Debates** ,1878 *Pacification* Mark Neocleous, 2025-02-18 In his new book critical theorist Mark Neocleous engages in a sustained critique of the theory and practice of pacification Combining philosophical analysis with historical detail Neocleous analyses the development of pacification as a key concept through which capitalist modernity has been organised offering readers the first book that

treats pacification as an important concept in the history of state power and capitalism Neocleous's approach is fourfold examining pacification as social warfare carried out through the ideology of peace as a form of social police carried out through mechanisms of security as law and order exercised through the permanent wars of class society and as the myriad practices of power designed to counter insurgency Making use of official documents of state the writings of counterinsurgency thinkers and the ideas perpetuated by practitioners of counterrevolution the book unravels the complex ways through which pacification generates new forms of social war and new modes of policing that reproduce capitalist order and fabricate obedient subjects Through expansive accounts of war and police and engaging with a range of topics from debt to death from stasis to civil war and from the police kettle to the politics of fear the book offers a provocative analysis of the ways in which state and capital combine to build a pacified social order

Transnational Nationalism John Dolis, 2015-05-12 This book examines American literary texts whose portrayal of American identity involves the incorporation of a foreign body as the precondition for a comprehensive understanding of itself This nexus of disconcerting textual dynamics arises precisely insofar as both citizen subject and national identity depend upon a certain alterity an other which constitutes the secondary term of a binary structure American identity thus finds itself ironically confused and interwoven with another culture or another nation double crossed in the enactment of itself Individual chapters are devoted to Benjamin Franklin Washington Irving Frederick Douglass Louisa May Alcott Nathaniel Hawthorne and Mark Twain

Resilient Faith Gerald L. Sittser, 2019-10-15 In our Western post Christendom society much of Christianity's cultural power privilege and influence has eroded But all is not lost says bestselling author Gerald Sittser Although the church is concerned and sobered by this cultural shift it is also curious and teachable Sittser shows how the early church offers wisdom for responding creatively to the West's increasing secularization The early Christian movement was surprisingly influential and successful in the Roman world and so different from its two main rivals traditional religion and Judaism that Rome identified it as a third way Early Christians immersed themselves in the empire without significant accommodation to or isolation from the culture They confessed Jesus as Lord and formed disciples accordingly which helped the church grow in numbers and influence Sittser explores how Christians today can learn from this third way and respond faithfully creatively and winsomely to a world that sees Christianity as largely obsolete Each chapter introduces historical figures ancient texts practices and institutions to explain and explore the third way of the Jesus movement which surprising everyone changed the world
