Rich Country Interests And Third World Development:

Rich Country Interests and Third World Development Robert Cassen, Richard Jolly, John W. Sewell, Robert Wood, 2025-04-01 First published in 1982 Rich Country Interests and Third World Development adds breadth and specificity to the exploration of the interests in Third World development of eleven rich countries the United States Canada Japan Australia the United Kingdom the Federal Republic of Germany The Netherlands Denmark Sweden Norway and France The authors analyze a spectrum of Northern economic political and security interests in development in the South They also examine how national experiences political traditions humanistic values and changing attitudes have influenced perceptions of and relationships with Third World countries over three decades of dramatic change in the North South environment This book helps lay a foundation for negotiated solutions to North South issues by offering a greater appreciation of differences as well as commonalities in interests both among and within industrial and developing countries An overview chapter points to issues broader than those raised in the country studies and addresses a critical question On what terms is it in the interests of the North and South to pursue and fashion interdependence between them in the 1980s Rich Country Interests and third world development ,1982

Co-Ordination in Context G.P.E. Walzenbach, 2019-01-15 First published in 1998 This book makes an original contribution to our understanding of policy failures at the European and international level On the basis of a comparative analysis the study shows how the co ordination mechanisms available in the European Community and OECD have complicated the regulation of national policies on state aid to exporting industries This failure can be explained in theoretical terms international and supranational organisations are not neutral arbiters but have interests of their own interests which are not necessarily aligned with those of their member states In detailed case studies of Britain France and Germany the book examines how the preference structure of governments in the exercise of their promotion programmes contrasts with the policies enacted by international bureaucracies Walzenbach s interdisciplinary approach specifies the conditions under which policy co ordination can have detrimental effects and thus usefully corrects the benign view held by most regime theorists about transaction cost reducing and efficiency enhancing role of such arrangement

East-West-South: Economic Interaction between Three Worlds Christopher Saunders, 1981-10-29 *Investing in Development* Theodore Harvey Moran, Excellent and exceptionally timely Foreign Affairs This volume surveys current views in the debate about the impact of foreign direct investment on Third World development on growth employment exports technology and distribution of income It examines whether the efforts of less developed countries to attract and control multinational corporations have constituted a serious distortion of trade that threatens jobs in the home nations It provides new studies of foreign investment in agriculture and in the least developed states It looks at the threat of transmitting environmental pollution And it analyzes the link between international companies and the umbrella of World Bank cofinancing as a mechanism to reduce risk Finally it attempts to estimate how much of the gap in commercial bank lending

might plausibly be filled by direct corporate investment over the next decade **Aid to Africa** Gordon Cumming, 2017-07-05

The end of the Cold War forced Western donors to rethink their aid relations with Africa This book looks at two of these donors France and Britain and asks whether the development programmes of these former colonial powers have undergone radical changes since the end of the Old World Order It focuses on the introduction of a controversial new regime trend political conditionality and uses policy models to illustrate the driving forces behind this new development strategy and explain substantial differences in France and Britain's practice of political conditionality in Togo and Kenya Overall this volume the first comparative study of French and British aid in the post Cold War period offers fresh insights into the evolution of the political assistance agenda and into deeper forces at work within the French and UK policy processes

Western Middle Powers and Global Poverty Nordiska Afrikainstitutet, Norsk utenrikspolitisk institutt, 1989 Danish aid old bottles *U.S. Foreign Policy and the Third World--agenda 1985-86* John Williamson Sewell, 1985 **Canada Among**

Nations 1984 Tomlin, Brian, Appel Molot, Maureen, 1985 An annual outlining national and international issues and Canadian policy towards them *Future Survey Annual 1983* Michael Marien, 1984-01-01 **The Web of Power** Kōzō

Katō, 2002-01-01 The Web of Power illustrates the central importance of international development policy to national economic and strategic security Kozo Kato's meticulous analysis of Japanese and German international cooperation policy overturns the myth of Japan and Germany's convergent development strategies revealing that each state's policy for fostering interdependence has been shaped by markedly different domestic political agendas Japanese development policy moved to embrace international cooperation as a means of pursuing national interests while Germany fearing the economic risks and political costs of a global scope approach restricted its development strategy to Europe This work will be of great interest to political scientists economists and scholars of international relations who wish to better understand using Japanese multinationalism and German regionalism as case studies the fluctuating dynamics of modern economic forces

Between Two Worlds Richard Edward Feinberg, 1986 The global debt and adjustment crisis has challenged the World Bank to become the leading agency in North South finance and development The many dimensions of this challenge which must be comprehensively addressed by the Bank's new president are the subject of this important volume in the Overseas Development Council's U S Third World Policy Perspectives series The Bank's ability to design and implement a comprehensive response to global economic needs is threatened by competing objectives and uncertain priorities Can the Bank design programs attractive to private investors that also serve the very poor Can it emphasize efficiency while transferring technologies that maximize labor absorption Can it aggressively condition loans on policy reforms without attracting the criticism that has accompanied IMF programs Can it meet the needs of the 1990s with the internal organization and staff of the early 1980s The contributors to this volume assess the role that the World Bank can play in the period ahead They argue for new financial and policy initiatives and for new conceptual approaches to development as well

as for a restructuring of the Bank as it takes on new systematic responsibilities in the new decade **Growth, Exports and Jobs in a Changing World Economy** ,1988-01-01 **Encyclopedia of Library and Information Science** Allen Kent,1995-09-26 Supplement 20 Artificial Intelligence and Machine Learning Approaches to Fraud Investigations to Visual Search in Modern Human Computer Interfaces Moral Vision in International Politics David Halloran Lumsdaine,2020-12-08 Can moral vision influence the dynamics of the world system This inquiry into the evolving foreign aid policies of eighteen developed democracies challenges conventional international relations theory and offers a broad framework of testable hypotheses about the ways ethical commitments can help structure global politics For forty years development assistance has been the largest and steadiest net financial flow to the Third World far exceeding investment by multinational corporations Yet fifty years ago aid was unheard of Investigating this sudden and widespread innovation in the postwar political economy David Lumsdaine marshals a wealth of historical and statistical evidence to show that aid was based less on donor economic and political interests than on humanitarian convictions and the belief that peace and prosperity could be sustained only within a just international order Lumsdaine finds the developed countries adhered to rules that increasingly favored the neediest aid recipients and reduced their own leverage Furthermore the donors most concerned about domestic poverty also gave more foreign aid the U S aid effort was weaker than that of other donors Many lines of evidence show how aid changed over time which donors contributed heavily where the money was spent who supported aid efforts converge to show how humanitarian concerns shaped aid Seeking to bridge the gap between normative theory and empirical analysis Lumsdaine's broad comparative study suggests that renewed moral vision is a prerequisite to devising workable institutions for a post cold war world **Conflicts of Interest** Jamie Swift,Brian Tomlinson,1991 Ten activists scholars and writers analyze contemporary development issues linking Canada and the Third World and provide an in depth critique of Canada's role in perpetuating poverty in the nations of the South Widely adopted as a course text at the college and university level **United States Foreign Policy and Economic Reform in Three Giants** John Echeverri-Gent,2017-07-28 Three of the largest and strategically most important nations in the world the Soviet Union China and India are currently in the throes of historic change The reforms in the giants are transforming global economic and geopolitical relations The United States must reexamine central tenets of its foreign policy if it is to seize the opportunities presented by these changes This pathbreaking volume in the Overseas Development Council's series analyzes economic reform in the giants and its implications for U S foreign policy Each of the giants is opening up its economy to foreign trade and investment What consequences will this have for international trade Each giant is attempting to catch up to global technological frontiers by absorbing foreign technologies In what areas might cooperation enhance American interests and in what areas must the U S protect its competitive and strategic assets What role can key international economic institutions play to help integrate the giants into the international economy The contributors suggest how U S foreign policy should
