Scarcity and Frontiers Edward B. Barbier, 2010-12-23 Throughout much of history a critical driving force behind global economic development has been the response of society to the scarcity of key natural resources Increasing scarcity raises the cost of exploiting existing natural resources and creates incentives in all economies to innovate and conserve more of these resources However economies have also responded to increasing scarcity

by obtaining and developing more of these resources Since the agricultural transition over 12 000 years ago this exploitation of new frontiers has often proved to be a pivotal human response to natural resource scarcity This book provides a fascinating account of the contribution that natural resource exploitation has made to economic development in key eras of world history This not only fills an important gap in the literature on economic history but also shows how we can draw lessons from these past epochs for attaining sustainable economic development in the world today Assessment and Protection of Water Resources in the Czech Republic Martina Zelenakova,Jitka Fialová,Abdelazim M. Negm,2019-06-25 This book gathers technical and scientific contributions from leading researchers academics and lecturers focusing on water management water pollution and water structures in the Czech Republic It discusses a variety of water resources management issues from stormwater management in urban areas water quantity hydraulics structures and hydrodynamic modeling to flood protection presenting state of the art developments for addressing a range of problems Edited and authored by pioneers in the field who have been at the cutting edge of water management development in the Czech Republic this book is of interest to environmental professionals including scientists and policymakers both in the Czech Republic and around the globe **Understanding Wetlands** S. M. Haslam,2003-08-15 Wetlands are an important and sadly diminishing habitat in many parts of the world They contribute significantly to the planet s biodiversity housing thousands of species of plants and animals Increasingly human management is required to sustain and even create these fragile ecosystems while global changes in climate are also taking their toll Littell's Living Age ,1847 Tolerance to Environmental Contaminants Claude Amiard-Triquet,Philip S. Rainbow,Michele Romeo,2011-01-21 Tolerance the ability of populations to cope with the chemical stress resulting from toxic contaminants has been described in many organisms from bacteria to fungi from phytoplankton to terrestrial flowering plants and from invertebrates such as worms to vertebrates like fish and amphibians The building of tolerance be it by physiological adaptation *Water-resources Investigations Report* ,1999
