## **Richard Archbold And The Archbold Biological Station:**

Richard Archbold and the Archbold Biological Station Roger A. Morse, 2000 The story of a remarkable man who yearned to be an explorer and for a change had the wherewithal to realize his ambitions Dean Amadon curator ret American Museum of Natural History There was an ocean that no one had ever flown before he flew it There was a vast jungle that no white man had ever entered he explored it Yet few people have ever heard of Richard Archbold Lowell Thomas 1940 The legend of Richard Archbold 1907 1976 one of Florida s most prominent biologists began in the remote jungles of Madagascar and New Guinea journeys recorded in the pages of National Geographic and the Saturday Evening Post in the 1920s and 1930s Under the auspices of the American Museum of Natural History Archbold financed and led scientific expeditions to unexplored regions of the world mapping them and using aircraft for the first time to supply field staff Because of the impending Second World War he agreed to find for the Australians a westward air route to Great Britain across the Indian Ocean and Africa He left San Diego for New Guinea in the summer of 1938 and arrived in New York during the 1939 World s Fair becoming the first man to circumnavigate the earth at its widest point and receiving a hero s welcome When war halted his overseas explorations Archbold founded in 1941 what has become one of the premier centers in the world for biological research The 5 000 acre estate Archbold Biological Station near Lake Placid Florida covers one of the most scientifically unique and threatened ecosystems in the world the Florida Scrub Archbold s initial enthusiasm for the scrub and his dedication to research there has been fully vindicated the station now supports 19 federally listed threatened and endangered species including 13 endemic plants Recognized as one of the most superbly appointed field sites in North America it houses impressive bird insect plant and vertebrate collections During his lifetime Archbold hosted many of the world s leading biologists and ecologists but his greatest legacy is his endowment it provides support for the facility and for the vast and expanding lineage of students researchers and faculty all involved in ecological research His story told here with affection and great esteem is that of a philanthropist whose life bears witness to his dreams Roger Morse retired professor of apiculture at Cornell University is the author of many books including Making Mead Honey Wine History Recipes Methods and Equipment and the editor of Honey Bee Pests Predators and Diseases During almost every one of the past 40 years he has spent many weeks doing research at the Archbold Biological Station

**Archbold Biological Station, Lake Placid, Florida** Archbold Biological Station, 1992 Ornithology, Evolution, and Philosophy Jürgen Haffer, 2007-08-16 This book is the first detailed biography of Ernst Mayr He was an architect of the Synthetic Theory of Evolution and the greatest evolutionary biologist since Charles Darwin influential historian and philosopher of biology outstanding taxonomist and ornithologist and naturalist He is one of the most widely known biologists of the 20th century Mayr used the theories of natural selection and population thinking as theoretical models within the framework of historical biological studies He was the first to emphasize the role of biopopulations thereby pointing out the basic difference between population thinking and

typological essentialism      **Foundations of Animal Behavior** Lynne D. Houck, Lee C. Drickamer, 1996-08 Beginning with Darwin's work in the 1870s *Foundations of Animal Behavior* selects the most important works from the discipline's first hundred years forty four classic papers and presents them in facsimile tracing the development of the field These papers are classics because they either founded a line of investigation established a basic method or provided a new approach to an important research question The papers are divided into six sections each introduced by prominent researchers Sections one and two cover the origins and history of the field and the emergence of basic methods and approaches They provide a background for sections three through six which focus on development and learning neural and hormonal mechanisms of behavior sensory processes orientation and communication and the evolution of behavior This outstanding collection will serve as the basis for undergraduate and graduate seminars and as a reference for researchers in animal behavior whether they focus on ethology behavioral ecology comparative psychology or anthropology Published in association with the Animal Behavior Society      **Forces of Nature** Clay Henderson, 2022-11-26 In this comprehensive history of land conservation in Florida Clay Henderson celebrates the individuals and organizations who made the state a leader in state funded conservation and land preservation      *A Wing and a Prayer* Anders Gyllenhaal, Beverly Gyllenhaal, Beverly Mills, 2023-04-18 Three years ago headlines delivered shocking news nearly three billion birds in North America have vanished over the past fifty years No species has been spared from the most delicate jeweled hummingbirds to scrappy black crows from a rainbow of warblers to common birds such as owls and sparrows For the past year veteran journalists Anders and Beverly Gyllenhaal traveled more than 25 000 miles across the Americas chronicling costly experiments contentious politics and new technologies to save our beloved birds from the brink of extinction Through this compelling drama *A Wing and a Prayer* offers hope and an urgent call to action Birds are dying at an unprecedented pace But there are encouraging breakthroughs across the hemisphere and still time to change course if we act quickly      **Easygoing Guide to Natural Florida** Douglas Waitley, 2006      *American Entomologist* ,2000      **A Manual of the Dragonflies of North America** J. G. Needham, 1975 Field studies Procedure Systematic classification      **Endangered and Threatened Animals of Florida and Their Habitats** Chris Scott, 2004 This fully illustrated book is a comprehensive yet convenient and easy to understand guide to Florida's endangered and threatened animals and the habitats that support them Chris Scott covers all 71 species subspecies or populations of mammals birds reptiles fish crustaceans insects corals and mollusks His species accounts describe each animal's listed status identifying characteristics historical and current distribution biology current threats and conservation efforts      **Special Scientific Report--wildlife** ,1975      *Ants of Florida* Mark Deyrup, 2016-10-14 Ants are familiar to every naturalist ecologist entomologist and pest control operator The identification of the 233 species of Florida ants is technically difficult and information on Florida ants is dispersed among hundreds of technical journal articles This book uses detailed and beautiful scientific drawings for convenient identification To most Florida biologists ants are currently the most

inaccessible group of conspicuous and intrusive insects This book solves the twin problems of ant identification and the extraordinary fragmentation of natural history information about Florida ants *Entanglements* Tora Johnson,2007-09-23 *Entanglements* explores the clash of cultures and personalities among fishermen scientists and whale advocates struggling to save both the endangered North Atlantic right whale and the livelihoods of thousands of Atlantic coastal families By most counts about 300 of these whales remain in the North Atlantic and scientists warn that collisions with fishing gear are contributing to their decline The political climate that surrounds the world s most endangered large whale is contentious complex and heartrending Without pointing fingers or laying blame Tora Johnson explores every side of the issue She takes us to sea with fishermen who struggle to stay in business setting traps and gillnets in the whale s habitat and with members of the rescue teams who attempt to cut away deadly rope and net from whales in the wild Weaving their stories and her personal observations into a discussion of the science and history of the conflict she offers an admirable balance of perceptions backgrounds and agendas Her thoughtful discussion of the plight of fishermen and whales and of the frustrations between fishing communities and conservationists presents an authentic microcosm of the global conflict between human demands on the environment and nature s finite capacity for supporting those demands *Choice* ,2001 Quarterly Journal of the Florida Academy of Sciences Florida Academy of Sciences,1999 **Boardwalks and Long Walks** William Holcomb,2014-05-27 A guide for the beginning citizen scientist and for anyone looking for the hidden natural areas of Florida A backpack friendly field ready listing that is not web dependent It includes the story of the search for the elevated hiking trails called boardwalks The Long Walks are the primitive paths and longer trails found in the public lands This book includes a list of the Public Access Lands in Florida of nearly 1 000 sites in all City Parks and Preserves County Parks and Preserves Wildlife Management Areas Wildlife Environmental Areas State Parks State Forests Conservation Areas of Water Management Districts National Parks National Forests Nature Centers Indian Mound Sites and Private Preserves Conservation Areas There are chapters on Florida s habitats trees Florida s water cycle and historic figures and place names *Sedge Moths of North America, The (Lepidoptera)* Heppner,2019-08-08 Represents the first comprehensive study of these moths in North America north of Mexico using modern systematic procedures involving assessment of a number of morphological and biological characters in relation to their phylogenetic status This study also represents a worldwide generic study made in conjunction with the revision of the North American species primarily to ascertain realistic generic limits and the placement of the various genera once included in the heterogeneous concept of the family Extralimital genera are noted in a catalog of generic names associated with the Glyphipterigidae **Whispers in the Pines** Joanna Burger,2006 In this book naturalist Joanna Burger takes us on a series of delightful trips through the Pine Barrens From the Albany Pine Bush the Long Island Barrens and the New Jersey Pine Barrens in the Northeast to the pinelands of South Carolina and Florida Burger describes in lively detail how these habitats have come to harbor such a unique assemblage of

species She introduces us to amphibians and reptiles neotropical migrants and other birds and a range of common and unusual mammals Burger also traces the regions historic and geologic backgrounds and the impact of human occupation from the time of the paleo Indians to the present She revisits the tension between development and preservation reminding us that a healthy pine barren region requires uninterrupted land and rejuvenating fires both of which are increasingly jeopardized Whispers in the Pines is essential reading for everyone concerned with the history and preservation of these unique landscapes and their wildlife

**The Florida Scrub Jay** Glen Everett Woolfenden, John W. Fitzpatrick, 2020-03-31  
Florida Scrub Jays are an excellent example of a cooperative breeding species in which adult birds often help raise offspring not their own For more than a decade Glen E Woolfenden and John W Fitzpatrick studied a marked population of these birds in an attempt to establish a demographic base for understanding the phenomenon of helping at the nest By studying both population biology and behavior the authors found that habitat restraints rather than kin selection are the main source of the behavior of Florida Scrub Jays the goal of increasing the number of close relatives other than descendants in future generations is of relatively minor importance in their cooperative breeding behavior The Florida Scrub Jay lives only in the Florida oak scrub All acceptable habitat is constantly filled with breeders Each year about half of the pairs are assisted by one to several nonbreeding helpers This book provides extensive data on fecundity survivorship relatedness and dispersal to establish the demographic milieu and to address questions arising out of observed helping behavior whom how when and why the helpers help
