Gendering Landscape Art Steven Adams,Anna Gruetzner Robins,2000 While gender has been the subject of extensive critical inquiry the debate has focused primarily on the human particularly the female body The spaces bodies occupy and the ways in which those spaces are depicted in landscape art has not however been subject to investigation This book is the first sustained attempt to fill this gap in art history **Encyclopedia of Twentieth-Century Photography, 3-Volume Set**

Lynne Warren,2005-11-15 The Encyclopedia of Twentieth Century Photography explores the vast international scope of twentieth century photography and explains that history with a wide ranging interdisciplinary manner This unique approach covers the aesthetic history of photography as an evolving art and documentary form while also recognizing it as a developing technology and cultural force This Encyclopedia presents the important developments movements photographers photographic institutions and theoretical aspects of the field along with information about equipment techniques and practical applications of photography To bring this history alive for the reader the set is illustrated in black and white throughout and each volume contains a color plate section A useful glossary of terms is also included *Walking in Circles*

Richard Long,1999 **Direct Action as Conceptual Art?** Avi Brisman,2025-07-04 This book offers an avenue for understanding the parameters scope meanings and impacts of environmental protest Focusing on ecodefense it explores the significance of the communiqu the written explanation of the reasons for an act of ecodefense comparing the communiqu to written texts in Conceptual art It presents and seeks to evaluate the following analogy act of ecodefense communiqu work of conceptual art written declaration statement By considering the communiqu in this light this book helps us better comprehend the rationales for radical environmentalism undertaken for the purposes of reducing environmental harms natural resource exploitation and animal abuse Heidegger and the Work of Art History Amanda Boetzkes,2017-07-05

Heidegger and the Work of Art History explores the impact and future possibilities of Heidegger s philosophy for art history and visual culture in the twenty first century Scholars from the fields of art history visual and material studies design philosophy aesthetics and new media pursue diverse lines of thinking that have departed from Heidegger s work in order to foster compelling new accounts of works of art and their historicity This collected book of essays also shows how studies in the history and theory of the visual enrich our understanding of Heidegger s philosophy In addition to examining the philosopher s lively collaborations with art historians and how his longstanding engagement with the visual arts influenced

his conceptualization of history the essays in this volume consider the ontological and ethical implications of our encounters with works of art the visual techniques that form worlds how to think about things beyond human centred relationships the moods dispositions and politics of art s history and the terms by which we might rethink aesthetic judgment and the interpretation of the visible world from the early modern period to the present day

Walkscapes Francesco Careri, 2017-12-25 Walkscapes deals with strolling as an architecture of landscape Walking as an autonomous form of art a primary act in the symbolic transformation of the territory an aesthetic instrument of knowledge and a physical transformation of the negotiated space which is converted into an urban intervention From primitive nomadism to Dada and Surrealism from the Lettrist to the Situationist International and from Minimalism to Land Art this book narrates the perception of landscape through a history of the traversed city

A Jurisprudence of Movement Olivia Barr, 2016-02-22 Law moves whether we notice or not Set amongst a spatial turn in the humanities and jurisprudence more specifically this book calls for a greater attention to legal movement in both its technical and material forms Despite various ways the spatial turn has been taken up in legal thought questions of law movement and its materialities are too often overlooked This book addresses this oversight and it does so through an attention to the materialities of legal movement Paying attention to how law moves across different colonial and contemporary spaces this book reveals there is a problem with common law s place Primarily set in the postcolonial context of Australia although ranging beyond this nationalised topography both spatially and temporally this book argues movement is fundamental to the very terms of common law s existence How then might we move well Explored through examples of walking and burial this book responds to the challenge of how to live with a contemporary form of colonial legal inheritance by arguing we must take seriously the challenge of living with law and think more carefully about its spatial productions and place making activities Unsettling place this book returns the question of movement to jurisprudence

Performance Drawing Maryclare Foá, Jane Grisewood, Birgitta Hosea, Carali McCall, 2020-09-03 What is performance drawing When does a drawing turn into a performance Is the act of drawing in itself a performative process whether a viewer is present or not Through conversation interviews and essays the authors illuminate these questions and what it might mean to perform and what it might mean to draw in a diverse and expressive contemporary practice since 1945 The term performance drawing first appeared in the subtitle of Catherine de Zegher s Drawing Papers 20 Performance Drawings in particular with reference to Alison Knowles and Elena del Rivero In this book it is used as a trope and a thread of thinking to describe a process dedicated to broadening the field of drawing through resourceful practices and cross disciplinary influence Featuring a wide range of international artists this book presents pioneering practitioners alongside current and emerging artists The combination of experiences and disciplines in the expanded field has established a vibrant art movement that has been progressively burgeoning in the last few years The Introduction contextualises the background and identifies contemporary approaches to performance drawing As a way to embrace the different voices and various lenses

in producing this book the authors combine individual perspectives and critical methodology in the five chapters While embedded in ephemerality and immediacy the themes encompass body and energy time and motion light and space imagined and observed demonstrating how drawing can act as a performative tool The dynamic interaction leads to a collective understanding of the term performance drawing and addresses the key developments and future directions of this applied drawing process

Landscape and Film Martin Lefebvre, 2007-05-07 Landscape is everywhere in film but it has been largely overlooked in theory and criticism This volume of new work will address fundamental questions What kind of landscape is cinematic landscape How is cinematic landscape different from landscape painting How is landscape deployed in the work of such filmmakers as Greenaway Rossellini or Antonioni to name just three What are differences between the use of landscape in Western filmmaking and in the work of Middle Eastern and Asian filmmakers How is cinematic landscape related to the idea of a national cinema and questions of identity The first collection on the idea of landscape and film this volume will present an impressive international cast of contributors among them Jacques Aumont Tom Conley David B Clarke Marcus A Doel Peter Rist and Antonio Costa

Is There Truth in Art? Herman Rapaport, 2018-09-05 The question posed by Herman Rapaport in the title of this book is intended both seriously and ironically It is not Rapaport's purpose to debate whether or not truth resides in art The title points rather to his belief that truth needs to be reconceptualized in the light of continuing efforts to deconstruct and to discredit the notion of truthfulness in art The question of art's truthfulness persists because truth in art is neither an entity or content that has been injected into the work nor a transcendental concept or ground that exists outside it Moreover when used in relation to art Rapaport says truth means something quite different from conventional definitions of the term Indeed a central question that informs the book is the return of truth at the far side of its deconstruction *Is There Truth in Art* includes chapters on atonal music environmental art modern German and French poetry contemporary French fiction experimental French film and a photograph taken by the National Socialists during the destruction of the Warsaw ghetto Determining how truth can be said to occur in these examples Rapaport maintains requires analysis in each instance He draws chiefly upon the thinkers who have radically reformulated questions about truth

Nietzsche Heidegger Derrida and Levinas and uses their writings to explore the works under analysis

Theories and Documents of Contemporary Art Kristine Stiles, Peter Selz, 2012-09-25 An essential text in the field of contemporary art history it has now been updated to represent 30 countries and over 100 new artists The internationalism evident in this revised edition reflects the growing interest in contemporary art throughout the world from the U S and Europe to the Middle East Asia Africa Latin America and Australia

Sustainable by Design Stuart Walker, 2012-05-04 To advance the subject of design one has to engage in the activity of designing *Sustainable by Design* offers a compelling and innovative design centred approach that explores both the meaning and practice of sustainable design Walker explores the design process in the context of sustainability and challenges conventional ways of defining designing and producing functional

objects He discusses the personal design process tacit knowledge ephemeral design experimental design and the relationship between intellectual design criteria physical expression and aesthetic experience This book will introduce vital concepts to students and will inspire designers by providing a well articulated basis for understanding the complexity and potential of sustainable design and extolling the contribution of design to the creation of a more meaningful material culture
