Von der Aufklärung zur Postmoderne:
 Gert Kähler, 2025-08-24 Die Aufklärung Mitte des 18 Jahrhunderts schuf eine Architektur auf der Grundlage der Rationalität den Klassizismus Die sich verändernde Gesellschaft stellte aber Anforderungen die mit den traditionellen Methoden gar nicht lösbar waren Industrialisierung und Bevölkerungswachstum musste in traditionelle Architekturkonzepte berührt oder völlig neu gedacht werden Die großen Umbrüche am Beginn des 20 Jahrhunderts Industrialisierung und Kriege und eine sich verändernde Gesellschaft zeigten dass der Versuch einen Stil für alle zu entwickeln zum Scheitern verurteilt war Die Moderne trat mit diesem Ansatz an ein neuer voraussetzungsloser Stil für eine neue Gesellschaft musste aber scheitern Heute stellen sich ganz andere als Stilfragen Die Entwicklung weg von einer Stadt für alle hin zum Ort einer Zweidrittel Gesellschaft

Kisho Kurokawa Kishō Kurokawa, Dennis Sharp, Catherine Slessor, Tomio Ōhashi, 1999 The completion of the first phase of Kuala Lumpur International Airport in 1998 resulted in two 4000 m runways and a 335 000 m² main terminal building The airport can handle 25 million passengers a

year By 2020 however the airport will be able to handle 120 000 000 passengers a year It is not surprising that everyone should wonder why Malaysia would need an international airport of that size The reason is the intense strategic competition that has already started Unquestionably the world will have an entirely new high speed transportation system by 2025 at the latest This will be the HSST Hypersonic Speed Transport which will carry between 300 and 500 passengers at speeds up to Mach 3.5 The HSST will be meaningless for short routes Therefore the required international hub airports will be limited to two in North America one in Central and South America one in Africa two in Europe one in Russia and three in Asia Like China and South Korea Malaysia is very eager to obtain one of the three Asian international hub airports because a country with such an airport and the associated infrastructure is very likely to become a financial information tourism and advanced industrial centre The airport is an integral part of a future linear capital corridor which was also developed by Kurokawa The area surrounding the airport will be used for an experiment in artificially restoring the tropical rain forest Creating such a forest is the most effective method for blocking out noise from the airport This is the basis of the architect's concept for a symbiosis between airport and forest In addition the architect believes that this is effective for expressing the identity of Malaysia as tropical rain forests are the typical vegetation of the country Kurokawa was a key figure of Japanese Metabolism he has played an essential role in this movement not only through projects and buildings but also through theoretical writings Since then he has been one of the leading architects in Japan *Heinz Tesar: Christus, Hoffnung Der Welt, Donau City, Wien* Immo Boyken, Heinz Tesar, 2002-03-20 Heinz Tesar built this church as a spiritual centre an oasis in the diaspora for Donau City a new residential and commercial centre of Vienna **Peichl/Achatz/Schumer. Frank O. Gehry Gottfried Knapp, Christian Richters, 2000 Text in English and German After his deconstructive beginnings in the eighties and nineties Frank Gehry increasingly practised a very plastic form of architecture His expressively sculptural cultural buildings the Vitra Design Museum in Weil am Rhein his project for the Walt Disney Concert Hall in Los Angeles and above all the Guggenheim Museum in Bilbao see Opus 32 have shaped the architectural awareness of our period and provided exemplary artistic alternatives to the architectural canon of Modernism Within Gehry's rapidly growing volume of work the comparatively small energy forum for the Minden Ravensburg Electricity Company EMR plays a particularly striking role insofar as the extraordinarily complex brief almost contradictory functions had to be blended in a very cramped space compelled the architect to use highly differentiated forms and materials In this way something like a primal model of sculptural building emerged a massively fissured subtly lit structure that explains itself

inside with amazing naturalness making visitors gasp with its changing spatial situations as an exhibition and events centre exploding all conventions as an office building and translating the theme of energy into sensual forms by architectural means as the electricity company's technical distribution centre The old dictum form follows function acquires a new and radical quality in the architecture of the Energieforum In addition to the presentation of the energy forum in Bad Oeynhausen this book contains an illustrated survey of all other buildings by Frank Gehry in Europe *Karl Friedrich Schinkel, Charlottenhof, Potsdam-Sanssouci* Heinz Schonemann, Karl Friedrich Schinkel, Reinhard Gorner, 1997 The palace set on a severe garden axis was built from 1826 to 1829 It was followed from 1829 to 1840 by the freely developing area of the Hofgartenhaus and its adjacent facilities all of which has become known as the Roman Baths The Crown Prince involved himself in the planning process contributing over 100 sketches He called Charlottenhof my Siam understood as a synonym for a better world and he was pursuing with it his intention of presenting his own future style of government based on romantic theories of the state and striving for a harmonious balance of all classes and interests Charlottenhof is Schinkel's only work to have survived complete inside and outside surrounded by Lenn's landscape garden which has also been carefully looked after and preserved **The Architectural Review** ,2004
