Northen Magill, Christina J. Moose, Alison Aves, 1999-11 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography The Musical Times and Singing-class Circular, 1893

Nationality vs Universality Sławomira Żerańska-Kominek, 2016-01-14 For the last few decades historiography considered as the central discipline of musicology has explored new directions and sought inspiration for further research consequently redefining the fundamental premises of historical musicology This is especially true with regard to the concept of music history as the work of great individuals and the domain of artistic works resulting from either tradition or new inventions The validity of global and universal perspectives has been questioned and researchers have emphasized the need to focus on local realities and day to day musical life Another key topic in this ongoing debate is the impossibility of writing an objective historical narrative The methodological foundations of the traditional Western model of music historiography have been deconstructed a process which has revealed its profound and purely one sided ideological profile This publication deals with the history of music as a way of representing historical memory and as an instrument of shaping society's present It introduces selected European historiographic concepts created outside the official mainstream of Western historiography The contributions to this volume not only demonstrate the cultural diversity of the conventions in which music history is narrated but also reveal their ideological and political determinants As such the book represents fascinating reading for anyone interested in the mechanisms that shape notions of the musical past which for many nations in Central and Eastern Europe is also a key element of their identity *Catalogue. Masculinity and Western Musical Practice Kirsten Gibson, 2017-07-05 How have men used art music How have they listened to and brandished the musical forms of the Western classical tradition and how has music intervened in their identity formations This collection of essays addresses these questions by examining some of the ways in which men music and masculinity have been implicated with each other since the Middle Ages Feminist musicologies have already dealt extensively with music and gender from the phallogocentric tendencies of the Western tradition to the explicit marginalization of women from that tradition This book builds on that work by turning feminist critical approaches towards the production rhetorical engagement and subversion of masculinities in twelve different musical case studies In other disciplines within the arts and humanities men's studies is a well established field Musicology has only recently begun to address critically music's engagement with masculinity and as a result has sometimes thereby failed to recognize its own discursive misogyny This book does not seek to cover the field comprehensively but rather to explore in detail some of the

ways in which musical practices do the cultural work of masculinity The book is structured into three thematic sections effeminate and virile musics and masculinities national masculinities national musics and identities voices discourses Within these themes the book ranges across a number of specific topics late medieval masculinities early modern discourses of music masculinity and medicine Renaissance Italian masculinities eighteenth nineteenth and early twentieth century ideas of creativity gender and canonicity masculinity imperialist and nationalist ideologies in the nineteenth century and constructions of the masculine voice in late nineteenth and twentieth century opera and song While the case studies are methodologically disparate and located in different historical and geographical locations they all share a common conc

Bernard Shaw's Book Reviews Brian Tyson, 2008-01-31 These hitherto uncollected book reviews of Shaw his first journalistic efforts reveal much not only about the writer but also the culture of the time in which he lived Between 1885 and 1888 Bernard Shaw published 111 book reviews in the Pall Mall Gazette In spite of their importance as the first regular journalism Shaw wrote and the fact that the books fiction nonfiction plays and poetry he read during these years must have formed the nucleus of his permanent library the reviews have never before been analyzed in connection with Shaw's work Brian Tyson has assembled the book reviews complete with the books titles authors and a brief biography of each author including any comments Shaw made about the review and has placed them in historical context elucidating any interesting difficult or obscure references Tyson's critical introduction places the reviews in the context of Shaw's work and Victorian society The reviews are often characterized by the wit and brilliance that we associate with the later Shaw shedding light on his development as a writer at his most formative stage Regardless of the merits of the material Shaw was reviewing it is amusing and enlightening to follow him down to the wandering tributaries of Late Victorian fiction and poetry which reveal as much about Shaw as they do about the preoccupations and prejudices of the average reader of the day
