Gender and the Formation of Taste in Eighteenth-Century Britain Robert W. Jones, 1998-07-02 Beauty is one of the most important and intriguing ideas in eighteenth century culture In *Gender and the Formation of Taste in Eighteenth Century Britain* Robert Jones provides a fresh understanding of how emergent critical discourses negotiated with earlier accounts of taste and beauty in order to redefine culture in line with the polite virtues of the urban middle classes Crucially the ability to form opinions on questions of beauty and the capacity to enter into debates on its nature was thought to characterise those able to participate in cultural discourse Furthermore the term beauty was frequently invoked in various and contradictory ways to determine acceptable behaviour for women In his book Jones discusses a wide range of material including philosophical texts by William Hogarth and Edmund Burke and Joshua Reynolds novels by Charlotte Lennox and Sarah Scott and the many representations of the celebrated beauty Elizabeth Gunning

The Non-Representation of the Agricultural Labourers in 18th and 19th Century English Paintings Penelope McElwee, 2016-02-08 The life of the poor rural worker appears to have been one of unmitigated toil within an unequal society a reality seldom endorsed in paintings of the eighteenth and early nineteenth centuries The contemporary viewer who constituted less than three per cent of the population wished to see visions of the idyllic golden landscapes of Merrie England peopled by happy contented workers or alternatively images of the Big House a feature and phenomenon now marching over the countryside fed by a new building frenzy This particular element would soon evolve into an all consuming preoccupation for the wealthy throughout the period Members of the upper echelons of society with their families all attired in fine silks and satins look out at their audience from ornately framed canvases as individuals Yet the rural poor the rabble at the gates the unseen workforce who toiled at the behest of the Master are virtually unknown They have left few records Enclosure came at a price The Poorhouse beckoned And still the agricultural labourer did virtually nothing for most of the eighteenth century to protest or rebel against the inequalities of his downtrodden existence Only the dreaded behemoth of the nineteenth century the threshing machine would stir him into action How would it end "The Concept of the 'Master' in Art Education in Britain and Ireland, 1770 to the

Gainsborough's Vision Amal Asfour,Dr Paul Williamson,Paul Williamson,1999-01-01 Thomas Gainsborough one of the most popular British painters has been celebrated as a landscapist a portrait painter and a man of feeling whose impetuous character is revealed in his art life and letters This book reveals that the style themes and ideas of Gainsborough's paintings constitute purposeful expressions of an intellectual and visual culture whose importance in the development of eighteenth century British art has gone unrecognized Amal Asfour and Paul Williamson have set out to make us look more knowledgeably at the paintings of Gainsborough their treatment is richly informative George Steiner The Observer Asfour and Williamson display a profound knowledge of 18th century aesthetics a highly stimulating book The British Art Journal
