formation migration and management Research in many countries across the northern hemisphere shows that dunes whether coastal or inland are under pressure around the world Much of the pressure comes from human activities and the anthropogenic disturbance when coupled with global warming and alterations to the amount frequency and temporal distribution of precipitation could lead to more serious management challenges in the future There is much that we still need to find out about the origin genesis and development of sand dunes so that they can be managed better The difficult and complex questions being repeatedly raised can be answered only by interdisciplinary endeavours Geomorphologists geologists palaeontologists climatologists ecologists and others can work together on research projects that better define the origin evolution and development of dunes both inland and along the coasts Many chapters in this book attempt to reconstruct past climatic changes in deserts and their margins at a variety of scales in space and time in the expectation that such information might assist in preparing us for future global warming and drying

Tropical Geomorphology Avijit Gupta,2011-08-04 Although similar geomorphic processes take place in other regions in the tropics these processes operate at different rates and with varying intensities Tropical geomorphology therefore provides many new discoveries regarding geomorphic processes This textbook describes both the humid and arid tropics It provides thoroughly up to date concepts and relevant case studies and emphasises the importance of geomorphology in the management and sustainable development of the tropical environment including climate change scenarios The text is supported by a large number of illustrations including satellite images Student exercises accompany each chapter Tropical Geomorphology is an ideal textbook for any course on tropical geomorphology or the tropical environment and is also invaluable as a reference text for researchers and environmental managers in the tropics
