EDITORIAL INTRODUCTION The success of linguistics in treating natural languages as formal syntactic systems has aroused
the interest of a number of linguists in a parallel or related development of semantics For the most part quite independently
many philosophers and logicians have recently been applying formal semantic methods to structures increasingly like
natural languages While differences in training method and vocabulary tend to veil the fact philosophers and linguists are
converging it seems on a common set of interrelated problems Since philosophers and linguists are working on the same or
very similar problems it would obviously be instructive to compare notes Semantics and the Philosophy of Language
Leonard Linsky, 1952 Truth, Force, and Knowledge in Language Savas L. Tsohatzidis, 2020-08-24 This book collects
twenty five of the author's essays each of which addresses a descriptive or a foundational issue that arises at the interface
between linguistic semantics and pragmatics on the one hand and the philosophy of language on the other Arranged into
three interconnected parts I Matters of Meaning and Truth II Matters of Meaning and Force III Knowledge Matters the
essays suggest that some key topics in the above mentioned fields have often been approached in ways that considerably
underestimate their empirical or conceptual complexity and attempt to delineate perspectives from which and conditions
under which an improved understanding of those topics could be sought The book will be of interest to linguists working in
semantics and pragmatics and to philosophers working in the philosophy of language and in epistemology The Philosophy
of Language Jerrold J. Katz, 1966 *Meaning in Linguistic Interaction* Katarzyna Jaszczolt, 2016 This book offers a semantic
and metasemantic inquiry into the representation of meaning in linguistic interaction Kasia Jaszczolt's view represents the
most radical stance on meaning to be found in the contextualist tradition and thereby the most radical take on the semantics
pragmatics boundary It allows for the selection of the cognitively plausible object of enquiry without being constrained by
such distinctions as what is said what is implicated or what is linguistic and what is extralinguistic She argues that this is the

only promising stance on meaning The analysis transcends the traditional distinctions drawn and traditional questions posed in post Gricean pragmatics and philosophy of language It heavily relies on the dynamic construction of meaning in discourse using truth conditions as a tool but at the same time conforming to pragmatic compositionality whereby aspects of meaning that enter this composition have very different provenance Meaning in Linguistic Interaction builds on the author s earlier work on Default Semantics and adds new arguments in favour of radical contextualism as well as novel applications focusing on the role of salience the flexibility of word meaning the literal nonliteral distinction and the dynamic nature of a character as well as offering an entirely new perspective on the indexical nonindexical distinction It contains a state of the art discussion of the semantics pragmatics boundary disputes focusing on varieties of semantic minimalism and contextualism and on the limitations of an indexicalism Jaszczolt s work is illustrated with examples from a variety of languages and offers some formal representations of meaning in the metalanguage of Default Semantics

Algebraic Semantics in Language and Philosophy Godehard Link, 1998-01 An analysis of the structural properties of collections or pluralities homogeneous objects like water and the semantics and philosophy of events
