Senior Dropout:

Dropout Rates in the United States, 1995 School Dropout and Completion Stephen Lamb, Eifred Markussen, Richard Teese, Nina Sandberg, John Polesel, 2010-11-29 School dropout remains a persistent and critical issue in many school systems so much so that it is sometimes referred to as a crisis. Populations across the globe have come to depend on success at school for establishing careers and gaining access to post school qualifications. Yet large numbers of young people are excluded from the advantages that successful completion of school brings and as a result are subjected to consequences such as higher likelihood of unemployment, lower earnings, greater dependence on welfare and poorer physical health and well being. Over recent decades most western nations have stepped up their efforts to reduce drop out and raise school completion rates while maintaining high standards. How school systems have approached this and how successful they are varies. This book compares the various approaches by evaluating their impact on rates of dropout and completion. Case studies of national systems are used to highlight the different approaches including institutional arrangements and the various alternative secondary school programs and their outcomes. The evaluation is based on several key questions: What are the main approaches? How do they work? For whom do they work? And how successful are they in promoting high rates of completion and equivalent outcomes for all? This book examines the nature of the dropout problem in advanced industrialized countries with the goal of developing a broader international understanding that can feed into public policy to help improve completion rates worldwide.

Catholic High Schools and Minority Students, 2002 The effect of Catholic secondary schools on minority students does not occur among students from well educated families who have been successful in their previous education experiences but rather among students disadvantaged by race, the fact that their parents did not attend college and by their own previous educational experiences. As these schools were originally established at the beginning of the twentieth century to socialize the children of the urban poor, their present success with today's urban poor may be due to the fact that these schools are simply doing what they have always done. BOOK JACKET

Catholic High Schools and Minority Students Andrew M. Greeley, 2017-07-05 The number of minority students, many of them not Catholic, who have enrolled in Catholic secondary schools is substantial. Since it is reasonable to assume that the cost of tuition in such schools is considerable for a minority family, the phenomenon suggests that parents in these families believe that their children will obtain a better education in Catholic secondary schools. The problem of measuring the effect of Catholic secondary schools on minority students is difficult because it is a complex and intricate task to separate family background and student motivation as influences on academic performance from the school's contribution. Here Andrew M. Greeley makes the case that the burden of proof rests on those who contend that family and student motivation are more important than the character of the school. Using a complex analytic technique that includes sophisticated mathematical models, Greeley demonstrates that the preponderance of evidence tilts in favor of the school. There appears to be an authentic Catholic school effect attributable to

religious order ownership of some schools more regular discipline in the schools and especially to a higher quality of teaching in such schools The effect of Catholic secondary schools on minority students does not occur among students from well educated families who have been successful in their previous education experiences but rather among students disadvantaged by race the fact that their parents did not attend college and by their own previous educational experiences As these schools were originally established at the beginning of the twentieth century to socialize the children of the urban poor their present success with today s urban poor may be due to the fact that these schools are simply doing what they have always done In a preface written for this new paperback edition of *Catholic High Schools and Minority Students* Greeley confirms the continued success of Catholic schools based on Public and Private Schools James S.
