Faith and the Philosophy of History Martin Wight, 2025-02-25 This book collects works by the late Professor Martin Wight 1913 1972 an historian and scholar of international relations Wight conducted research on many topics including British colonial history European studies international institutions and the history of states systems He is nonetheless best known for his lectures about the political philosophy of international relations at the London School of Economics 1949 1961 and the University of Sussex 1961 1972 He is widely regarded as an intellectual ancestor and pathbreaker of the English School of international relations even though this term only gained currency nine years after his death While there is no generally accepted definition of the English School it is usually construed as signifying an approach to the study of international relations more rooted in historical and humanistic learning than in the social sciences Wight's achievements are consistent with this broad definition This volume draws together a number of Wight's published works as well as many of his previously unpublished obscurely published and anonymous writings about faith and the philosophy of history Owing to his premature death at the age of 58 he

was unable to complete several works in progress partly because his perfectionism led him to refrain from publishing many of them

Saeculum R. A. Markus, Robert Austin Markus, 1988 The main concern of this book is with those aspects of Augustine's thought which help to answer questions about the purpose of human society

Augustine and the Art of Ruling in the Carolingian Imperial Period Sophia Moesch, 2019-06-26 The Open Access version of this book available at <http://www.tandfebooks.com/doi/view/10.4324/9781351116022> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 licence DOI: <https://doi.org/10.4324/9781351116022> Published with the support of the Swiss National Science Foundation This volume is an investigation of how Augustine was received in the Carolingian period and the elements of his thought which had an impact on Carolingian ideas of state rulership and ethics It focuses on Alcuin of York and Hincmar of Rheims authors and political advisers to Charlemagne and to Charles the Bald respectively It examines how they used Augustinian political thought and ethics as manifested in the *De civitate Dei* to give more weight to their advice A comparative approach sheds light on the differences between Charlemagne's reign and that of his grandson It scrutinizes Alcuin's and Hincmar's discussions of empire rulership and the moral conduct of political agents during which both drew on the *De civitate Dei* although each came away with a different understanding By means of a philological historical approach the book offers a deeper reading and treats the Latin texts as political discourses defined by content and language

Histories of Postmodernism Mark Bevir, Jill Hargis, Sara Rushing, 2020-09-19 *Histories of Postmodernism* reexamines the history of the constellation of ideas and thinkers associated with postmodernism The increasingly dominant historical narrative depicts a relatively smooth development of ideas from Friedrich Nietzsche and Martin Heidegger through a range of French theorists most notably Jacques Derrida and Michel Foucault to contemporary American thinkers such as Richard Rorty Edward Said and Judith Butler *Histories of Postmodernism* challenges this narrative by highlighting the local contexts of relevant theorists and thus the crucial distinctions that divide successive articulations of the themes and concepts associated with postmodernism As postmodern ideas traveled from nineteenth century Germany to mid twentieth century France and on to the contemporary United States so the relevant theorists transformed that heritage within the context of particular intellectual traditions and specific political and aesthetic issues

Allegoresis Longxi Zhang, 2018-05-31 Why is it that a text particularly a canonical text is often said to contain a meaning different from what it literally says How did allegorical readings arise and develop By looking at such examples as Jewish and Christian interpretations of the Song of Songs and traditional Chinese commentaries on the Confucian classic Book of Poetry Zhang Longxi discusses allegorical readings from a broad perspective that bridges the usual East West cultural divide and examines their social and political implications His approach is wide ranging cross cultural and cross disciplinary exploring allegoresis with regard to religion philosophy and literature In his inquiry into allegory and allegorical interpretation Zhang examines the idea of a self explanatory text of the Bible as conceived by Augustine Aquinas and Luther discusses the importance of the

literal basis of textual interpretation and takes up the question of moral responsibility and political allegiance Zhang who regards utopia as an allegory of social and political ideas explores how utopian visions vary in their Chinese and Western expressions in the process commenting on contemporary literary theory and political readings of literature past and present

Metropolitan Pulpit and Homiletic Monthly ,1894 Seeming Knowledge John D. Cox,2007 Seeming Knowledge revisits the question of Shakespeare and religion by focusing on the conjunction of faith and skepticism in his writing Cox argues that the relationship between faith and skepticism is not an invented conjunction The recognition of the history of faith and skepticism in the sixteenth century illuminates a tradition that Shakespeare inherited and represented more subtly and effectively than any other writer of his generation **The American Indian and the Problem of History** Calvin

Martin,1987 North American Indians have traditionally held conceptions of history time and the universe that are vastly different from those of European civilizations How then can Western historians begin to write accurately and without bias about societies who shunned history and who performed in our Western vision and errand of history only through coercion Here eighteen prominent authors wrestle with the phenomenon that in writing about Indian white relations they are perforce trying to mesh two fundamentally different world views In pieces written expressly for this volume the contributors who include a cross section of historians anthropologists professional writers and native Americans cover such diverse topics as cultural pluralism and ethnocentrism native American dancing and ritual the experiences of native American women and attitudes toward the environment In considering the deep and chronic issues of Indian white relations these controversial essays look anew at Indian cultural ideals and restore them to their proper place in American history
