Senses Of Modernism Technology Perception And Aesthetics:

The Senses of Modernism Sara Danius, 2019-01-24 In *The Senses of Modernism* Sara Danius develops a radically new theoretical and historical understanding of high modernism The author closely analyzes Thomas Mann's *The Magic Mountain* Marcel Proust's *Remembrance of Things Past* and James Joyce's *Ulysses* as narratives of the sweeping changes that affected high and low culture in the age of technological reproduction In her discussion of the years from 1880 to 1930 Danius proposes that the high modernist aesthetic is inseparable from a technologically mediated crisis of the senses She reveals the ways in which categories of perceiving and knowing are realigned when technological devices are capable of reproducing sense data Sparked by innovations such as chronophotography phonography radiography cinematography and technologies of speed this sudden shift in perceptual abilities had an effect on all arts of the time Danius explores how perception notably sight and hearing is staged in the three most significant modern novels in German French and British literature *The Senses of Modernism* connects technological change and formal innovation to transform the study of modernist aesthetics Danius questions the longstanding acceptance of a binary relationship between high and low culture and describes the complicated relationship between modernism and technology challenging the conceptual divide between a technological culture and a more properly aesthetic one

Considering the ways in which literary texts intersect with and diverge from scientific epistemological and philosophical perspectives these essays explore a wide variety of literary moments of sensation including the interspecies exchange of a look between a swan and a young Indigenous Australian girl the sound of bees as captured in an early modern poem the noxious smell of the Great Stink that recurs in the Victorian novel the taste of an eggplant registered in a poetic performance tactile gestures in medieval romance and the representation of a world in which the interdependence of human beings with the purple hibiscus plant is experienced through all five senses The collection builds upon and breaks new ground in the field of sensory studies focusing on what makes literature especially suitable to engaging with contributing to and challenging our

perennial understandings of the senses **Modernist Soundscapes** Angela Frattarola,2018-11-12 This study questions how early twentieth century auditory technologies altered sound perception and how these developments shaped the modernist novel Without polarizing vision and audition this book reveals how modernists tend to use auditory perception to connect characters shifting the subject from a distanced judgmental observer to a reverberating body attuned to the moment
