Separation Processes In Biotechnology:

Separation Processes in Biotechnology Juan A. Asenjo, 2020-08-26 Edited to avoid duplication and favor comprehensiveness 20 contributors detail the recovery separation and purification operations of bioprocess technology Individual chapters in this classic yet still highly relevant work emphasize concepts that are becoming more and more important when applied to the large scale versions of techniques that are considered well established Aside from fully discussing processes Separation Processes in Biotechnology includes sections on concentration separation and operation purification operations and product release and recovery It also discusses plant operation and equipment and delves into economic considerations *Separation Processes in the Food and Biotechnology Industries* A S Grandison, M J

Lewis, 1996-01-01 This book reviews methods and techniques for separating food components and products of the biotechnology industry The introduction focuses on food composition and some of the conventional separation techniques Subsequent chapters deal with each specific type or area of application individually and include information on the basic principles industrial equipment available commercial applications and an overview of research and development

Biotechnology Industries A.S. Grandison,1996-07-10 From the Editors Preface This book concentrates on the more recent methods and techniques for separating food components and products of the biotechnology industry Each chapter deals with a specific type or area of application and includes information on the basic principles industrial equipment available commercial applications and an overview of current research and development Much of the emphasis is on extraction of macromolecules increasing the added value of foods and recovering valuable components from by products and fermentation media Many of the methods discussed are now in commercial practice while others are being vigorously researched Separation and filtration technology is of major importance in food processing and biotechnology This new book provides a very detailed examination of the most important advanced separation processes now in use Each chapter is prepared by a specialist or specialists in the type of separation discussed Each separation method is related to practical commercial applications **Engineering Processes for Bioseparations** LAURENCE R. WEATHERLEY,2013-10-22 The use of

biotechnology in chemical synthesis offers up numerous advantages to the engineer in the process industries but it also presents a number of fundamental challenges and difficulties which impinge directly on separation process requirements The use of biochemical separations has grown significantly during the past decade and is especially used in process industries such as healthcare and food processing However it is becoming increasingly more important in areas such as recycling and waste water treatment and as industry shifts towards cleaner processes biochemical separations will continue to grow The two main objectives of this book are to focus on the application of existing separation process techniques to the recovery and purification of biologically derived products and to examine the state of knowledge of new techniques which have future potential Within these objectives the complexities and breadth of problems associated with biological separations are discussed specific engineering techniques are featured and their adaptation to biochemical separations are highlighted

Separation Process Engineering Phillip C. Wankat,2022-10-24 The Definitive Learner Friendly Guide to Chemical Engineering Separations Extensively Updated Including a New Chapter on Melt Crystallization Efficient separation processes are crucial to addressing many societal problems from developing new medicines to improving energy efficiency and reducing emissions Separation Process Engineering Fifth Edition is the most comprehensive accessible guide to modern

separation processes and the fundamentals of mass transfer In this completely updated edition Phillip C Wankat teaches each key concept through detailed realistic examples using actual data with up to date simulation practice spreadsheet based exercises and references Wankat thoroughly covers each separation process including flash column and batch distillation exact calculations and shortcut methods for multicomponent distillation staged and packed column design absorption stripping and more His extensive discussions of mass transfer and diffusion enable faculty to teach separations and mass transfer in a single course And detailed material on liquid liquid extraction adsorption chromatography and ion exchange prepares students for advanced work New and updated content includes melt crystallization steam distillation residue curve analysis batch washing the Shanks system for percolation leaching eutectic systems forward osmosis microfiltration and hybrid separations A full chapter discusses economics and energy conservation including updated equipment costs Over 300 new and updated homework problems are presented all extensively tested in undergraduate courses at Purdue University New chapter on melt crystallization solid liquid phase equilibrium suspension static and falling film layer approaches and 34 questions and problems New binary VLE equations and updated content on simultaneous solutions New coverage of safety and fire hazards New material on steam distillation simple multi component batch distillation and residue curve analysis Expanded discussion of tray efficiencies packed column design and energy reduction in distillation New coverage of two hybrid extraction with distillation and the Kremser equation in fractional extraction Added sections on deicing with eutectic systems eutectic freeze concentration and scale up New sections on forward osmosis and microfiltration Expanded advanced content on adsorption and ion exchange including updated instructions for eight detailed Aspen Chromatography labs Discussion of membrane separations including gas permeation reverse osmosis ultrafiltration pervaporation and applications Thirteen up to date Aspen Plus process simulation labs adaptable to any simulator This guide reflects an up to date understanding of how modern students learn designed organized and written to be exceptionally clear and easy to use It presents detailed examples in a clear standard format using real data to solve actual engineering problems preparing students for their future careers

Separations for Biotechnology 2 D. Leo Pyle, 2012-12-06 The challenge of

bioseparations is to isolate and purify identified products from the dilute product broth produced from cell culture Innovation in bioseparations technology is increasingly driven by the requirements imposed by the growing importance of production on a process scale of injectable grade products and economic pressures to improve the efficiency of downstream processing As in other areas of technical change science does not necessarily precede new technology progress results from a complex and messy mixture of advances in understanding ingenious ideas novel techniques and chance discoveries What is certain is that close interaction between academics and practitioners biological scientists and process engineers is needed to solve the problems of bioseparations The Second International Conference on Separations for Biotechnology at Reading UK in September 1990 set out to provide a critical multidisciplinary forum for the discussion of bioseparations This volume contains

the papers presented at the meeting The meeting was organised around six themes with oral and poster presentations on the science and practice of bioseparations technology and the same structure has been kept for this book We have also included the texts of the keynote review paper by Professor Alan Michaels and the introductory review papers specially commissioned for the conference Within each part of this book the review paper is followed by the contributed papers grouped alphabetically by their first author All the original papers published here were accepted for publication after scientific refereeing
