Observing Agriculture in Early Twentieth-Century Italy Federico D'Onofrio, 2016-05-20 Agricultural Economists in Early Twentieth Century Italy describes how Italian agricultural economists collected information about the economy of Italy between the Giolittian and the Fascist era The book carefully describes three main forms of economic observation enquiries statistics and farm surveys For each of these forms of observation the main participants to the investigation are discussed with their respective agendas alongside the purposes of the investigation and its practical constraints This work introduces the concept of stakeholder statistics and stresses the two way relation between the observer and the observed in the co production of observational knowledge Practices of observation developed together with agricultural economics as a discipline and a profession The study of forms of investigation therefore shed light on the constitution of a coherent and self conscious group of agricultural economists in Italy and the scientific and methodological alliances they forged with agricultural economists elsewhere in Europe Thanks to ambitious research projects Ghino Valenti in the Giolittian period and Arrigo Serpieri after the First World War led the transformation of Italian agricultural economists from agents of estate owners to social and economic experts in the service of the Italian state The group of agricultural economists who gathered around Serpieri played an important role in supplying the ideology of the agricultural elites with economic content especially after the First World War along lines that resemble the development of agrarian ideologies in other countries of Central Europe This work discusses how observation entered the political debate on agricultural policies of the Fascist regime namely the so called Ruralismo

Serpieri, 1999-07 **Bodies of Desire and Bodies in Distress** Xavier Mendik, 2015-09-18 In recent years there has been an explosion of critical interest in the icons genres and traditions of 1970s Italian cult film Thanks to the international success of directors such as Dario Argento and Sergio Martino and the influential giallo thriller cycle in which they worked these unconventional and often controversial films are now impacting on new generations of filmmakers scholars and moviegoers alike Bodies of Desire and Bodies in Distress The Golden Age of Italian Cult Cinema 1970 1985 considers the current interest in specific Italian directors and cult genres exploring the social political and cultural factors that spawned a decade of cinema dominated by extreme yet stylish images of sexuality and violence Bodies of Desire and Bodies in Distress situates the explosion of 1970s Italian cult excess against the toxic backdrop of political violence and terrorist activity that produced shocking images of carnage and crime during this period The volume also considers why the iconography of the sexually liberated female became recast as a symbol of fear and violation in a range of Italian cult film narratives In addition the book also analyses how longstanding regional distinctions between Italy s urban North and the much maligned rural

South fed into sex and death cycles produced between 1970 and 1985 Bodies of Desire and Bodies in Distress profiles leading 1970s Italian directors and performers including Aristide Massaccesi Joe D Amato Laura Gemser and Dario Argento who also provides an interview discussing his work and 1970s Italian society The volume also provides case studies of the giallo cycle rape and revenge dramas the Italian rogue cop series post apocalypse films barbarian movies and sex comedy formats By considering the icons and genres from the golden age of Italian cult film alongside the crucial social and sexual tensions that influenced their creation this book will be of interest to film scholars and cult movie fans alike *Catalog of Copyright*

context of different pressures that impact on European education systems from the constraints established by the European Central Bank and the European Commission across Southern Europe to the 2008 financial crisis and the increased migration. The book provides a rigorous theoretical approach to European and national policies combined with detailed analyses of national educational contexts in England, France, Greece, Hungary, and Sweden. These in-depth studies identify major issues of national education policymaking and explore the complexities of global national relationships. The economic crisis, the rise of the Left in Greece, and of the populist Right in many countries, in Europe, questions of cultural and religious diversity, tensions between marketization and inclusion, are all brought into focus, offering findings that are of great interest to researchers of education policy, politics, and sociology of education alike. In the final section of the book, the authors explore policy alternatives as embodied in the activities of both governments and non-state actors such as trade unions and social movements.

New Public Management and the Reform of Education Helen M. Gunter, Emiliano Grimaldi, David Hall, Roberto Serpieri, 2016-07-07. New Public Management and the Reform of Education addresses complex and dynamic changes to public services by focusing on new public management as a major shaper and influencer of educational reforms within and across European nation-states and policy actors. The contributions to the book are diverse and illustrate the impact of NPM locally but also the interplay between local and European policy spheres. The book offers a critical overview of NPM through an analysis of debates, projects, and policy actors. A detailed examination of NPM within 10 nation-states in Europe. A robust engagement with the national and European features of NPM as a policy strategy. The book actively contributes to debates and analysis within critical policy studies about the impact and resilience of NPM and how through a study of educational reforms in a range of political systems with different traditions and purposes, a more nuanced and complex picture of NPM can be built. As such, the book not only speaks to educational researchers and professionals within Europe but also to policymakers and can inform wider education and policy communities internationally.

Shakespeare's Drama in Poetry Alessandro Serpieri, 2018-05-01. This volume presents for the first time in English a selection of seminal studies originally published in Italian on the dramatic potential of Shakespeare's Sonnets, providing a crucial contribution to a recently revived debate on their inherent dramatic dimension. These studies long antedate the recent attention internationally dedicated to the formal and semiotic functions of the communicative structure of the sonnets, providing the basis for a new perception of their peculiar capacity to perform speech acts within dramatically defined situations. The first, longest section is dedicated to a discussion of the so-called Sonnets of Immortality, where the poet struggles with Time over the future of the fair youth, providing the argumentative premise upon which issues of mortality and loss running through the whole collection are defined in the agonistic terms of human defiance of Time.

destructive power There follow two essays devoted to Sonnets 33 and 29 and to the last sonnets for the young friend respectively Here the poet abandons the battlefield of human mortality and engages with the tensions and conflicts of affection and moral duty against the backdrop of an intrinsically conflicting world model showing a medieval symbolic universe traversed by incipient yet radical sceptical stances These poems interlace fictionality and biography constructing a lyrical drama where the I poet features as an extraordinarily artificial yet all too real voice
