Simple Solution To The Pyramid:

The Simple Solution to the Pyramid Bill Alford, Ken Iobst, 1982 Simple Solutions to Complex Catastrophes John Braithwaite, 2024-02-26 This open access book sets out simple solutions to managing complex catastrophes. It focusses on four kinds of crises: climate change, crime, war, cascades, epidemics, and financial crises. These catastrophes are conceived as complex and prone to cascade effects. This book is optimistic in explaining that there are identifiable simple institutions that international society can strengthen and some simple principles that can help humankind to control the expanding gamut of complex catastrophes that confront the planet, including simple stable institutions and regulatory bodies. It draws on a wide range of current and past crises and challenges from the Cold War to COVID 19 and from Weapons of Mass Destruction to restorative diplomacy with States like China to provide an urgent and timely path forward. Braithwaite argues that improved peacemaking and step by step progress toward abolition of Weapons of Mass Destruction helps prevent environmental pandemic and financial catastrophes. His method across four kinds of crises is first to prioritize simple principles and simple institutions that prevent coupled catastrophes from cascading one to the other. The next step is to pursue requisite variety in responses by diagnosing dialectically when additional interventions will and will not add value for crisis control. Braithwaite argues that minimal sufficiency of deterrence, responsive regulation of risks, and restorative diplomacy offer superior theoretical foundations than realism in international relations theory and in organizational crime control. It speaks to those interested in criminology, public policy, and international relations, political science, sociology, public health, and economics.

K2, Quest of the Gods Ralf Ellis,

The Great Pyramid in the Himalaya In Thoth Architect of the Universe Ralf discovered evidence for megalithic maps But if these megalithic maps are to be of any use in a quest for the mythical Hall of Records then they need to be a little more detailed than a simple representation of continents Luckily the shaft angles inside the Great Pyramid can refine these maps down to just a few tens of meters And so Ralf embarked on a long trek into the high Himalaya to see what lay at the heart of the Giza map Strangely enough what he found there was a giant snow white pyramid aligned with the cardinal points with a causeway aligned at 14 from its base exactly the same as the Great Pyramid itself Sequel to Thoth Architect of the Universe v3 6
