The Mathematical Tourist Ivars Peterson, 2025-05-21 In the first edition of *The Mathematical Tourist* renowned science journalist Ivars Peterson took readers on an unforgettable tour through the sometimes bizarre but always fascinating landscape of modern mathematics Now the journey continues in a new updated edition that includes all the latest information on mathematical proofs fractals prime numbers and chaos as well as new material on the relationship between mathematical knots and DNA how computers based on quantum logic can significantly speed up the factoring of large composite numbers the relationship between four dimensional geometry and physical theories of the nature of matter the application of cellular automata models to social questions and the peregrinations of virtual ants a novel mathematical model of quasicrystals based on decagon shaped tiles Blazing a trail through rows of austere symbols and dense lines of formulae Peterson explores the central ideas behind the work of professional mathematicians how and where their pieces of the mathematical puzzle fit in the sources of their ideas their fountains of inspiration and the images that carry them from one discovery to another

The Mathematical Tourist Ivars Peterson, 1988 In this revised updated edition of Peterson's classic work the author blazes a trail into mathematics' wilderness a domain of unsettled truths full of unanswered questions and shows us the wonderland beyond the thicket He presents the latest information on mathematical proofs fractals prime numbers and chaos as well as new material on such intriguing topics as the relationship between mathematical knots and DNA the application of cellular automata models to social questions and the significant increase in the speed of factoring large composite numbers by means of computers based on quantum logic Demystifying the major discoveries in mathematics Peterson explores the work of key mathematicians along with the sources of their ideas and inspiration He also shows how their discoveries fit into the mathematical puzzle and have spawned further developments More than 100 lively line drawings and sixteen color plates of computer generated images graphically illuminate the concepts From publisher description

Is God a Mathematician? Mario Livio, 2011-02-22 Bestselling author and astrophysicist Mario Livio examines the lives and theories of history's greatest mathematicians to ask how if mathematics is an abstract construction of the human mind it can so perfectly explain the physical world Nobel Laureate Eugene Wigner once wondered about the unreasonable effectiveness of mathematics in the formulation of the laws of nature Is God a Mathematician investigates why mathematics is as powerful as it is From ancient times to the present scientists and philosophers have marveled at how such a seemingly abstract discipline could so perfectly explain the natural world More than that mathematics has often made predictions for example about subatomic particles or cosmic phenomena that were unknown at the time but later were proven to be true Is mathematics ultimately invented or discovered If as Einstein insisted mathematics is a product of human thought that is independent of experience how can it so accurately describe and even predict the world around us Physicist and author Mario Livio brilliantly explores mathematical ideas from Pythagoras to the present day as he shows us how intriguing questions and ingenious answers have led to ever deeper insights into our world This fascinating book will interest anyone curious about the human mind the scientific world and the relationship between them

Mathematical Treks: From Surreal Numbers to Magic Circles Ivars Peterson,2020-08-03 **Cognitive Structures in Scientific Inquiry** ,2016-08-01 This book is the second of two volumes devoted to the work of Theo Kuipers a leading Dutch philosopher of science Philosophers and scientists from all over the world thirty seven in all comment on Kuipers philosophy and each of their commentaries is followed by a reply from Kuipers The present volume is devoted to Kuipers neo classical philosophy of science as laid down in his Structures in Science Kluwer 2001 Kuipers defends a dialectical interaction between science and philosophy in that he views philosophy of science as a meta science which formulates cognitive structures that provide heuristic patterns for actual scientific research including design research In addition Kuipers pays considerable attention to the computational approaches to philosophy of science as well as to the ethics of doing research Thomas Nickles David Atkinson Jean Paul van Bendegem Maarten Franssen Anne Ruth Mackor Arno Wouters Erik Weber Helena de Preester Eric Scerri Adam Grobler Andrzej Wisniewski Alexander van den Bosch Gerard Vreeswijk Jaap Kamps Paul Thagard Emma Ruttkamp Robert Causey Henk Zandvoort comment on these ideas of Kuipers and many present their own account The present book also contains a synopsis of Structures in Science It can be read independently of the first volume of Essays in Debate with Theo Kuipers which is devoted to Kuipers From Instrumentalism to Constructive Realism 2000

Mallarmé and Debussy Elizabeth McCombie,2003 This book examines afresh the web of similarities and differences between music and poetry using works by Mallarm and Debussy as case studies It challenges the easy metaphorical impressionism that has characterized much of the scholarly literature to date Analyzing Mallarm s vision of a shared musico poetic aesthetic Elizabeth McCombie derives a set of performative structural motifs analytical tools that express our experience of the two arts and their middle ground

Cognitive Structures in Scientific Inquiry Roberto Festa,Atocha Aliseda,Adriana Johanna Maria Peijnenburg,2005 This book is the first of two volumes devoted to the work of Theo Kuipers a leading Dutch philosopher of science Philosophers and scientists from all over the world thirty seven in all comment on Kuipers philosophy and each of their commentaries is followed by a reply from Kuipers The present volume focuses on Kuipers views on confirmation empirical progress and truth approximation as laid down in his From Instrumentalism to Constructive Realism Kluwer 2000 In this book Kuipers offered a synthesis of Carnap s and Hempel s confirmation theory on the one hand and Popper s theory of truth approximation on the other The key element of this synthesis is a sophisticated methodology which enables the evaluation of theories in terms of their problems and successes even if the theories are already falsified and which also fits well with the claim that one theory is closer to the truth than
