**An Invitation to Cognitive Science** Daniel N. Osherson, Don Scarborough, 1995 The chapters in this volume span many areas of cognitive science including artificial intelligence neural network models animal cognition signal detection theory computational models reaction time methods and cognitive neuroscience An Invitation to Cognitive Science provides a point of entry into the vast realm of cognitive science by treating in depth examples of issues and theories from many subfields The first three volumes of the series cover Language Visual Cognition and Thinking Volume 4 Methods Models and Conceptual Issues expands the series in new directions The chapters span many areas of cognitive science including artificial intelligence neural network models animal cognition signal detection theory computational models reaction time methods and cognitive neuroscience The volume also offers introductions to several general methods and theoretical approaches for analyzing the mind and shows how some of these approaches are applied in the development of quantitative models Rather than general and inevitably superficial surveys of areas the contributors present case studies detailed accounts of one or two achievements within an area The goal is to tell a good story challenging the reader to embark on an intellectual adventure

**On Intelligence** Stephen J. Ceci, 2009-07-01 Ceci argues that traditional conceptions of intelligence ignore the role of society in shaping intelligence and underestimate the intelligence of non Western societies He puts forth a bio ecological framework of individual differences in intellectual development that is intended to address some of the major deficiencies of extant theories of intelligence The focus is on alternative interpretations of phenomena that emerge when implicit assumptions of intelligence researchers are challenged
