Perry (Jr.),George S. Perry, Jr.,Joan Richardson,2022-01-14 Equity leadership is a complex and often perilous endeavor particularly in our current era of political polarization The fundamental and paradoxical challenge is advancing equity in a system that was never designed to serve all children Deep systemic change will happen only when educators and their community partners understand how the interlocking systems in education operate and learn how to crack the codes that have perpetuated those systems A number of books on equity leadership focus on single improvement strategies such as equity audits equitable grading practices and cultural competence However there are few guides to navigating the complex barriers to implementing deep rooted change The proposed title is unique in that it honors the complexity of such change but at the same time equips leaders with actionable strategic moves to advance an equity agenda And while knowing these moves is important knowing when to make the moves is critical The moves are non linear interconnected and sometimes overlapping possibly ambiguous and always situational *Current Index to Journals in Education* ,2000-04 **Teaching Mathematics as to be Meaningful - Foregrounding Play and Children's Perspectives** Hanna Palmér,Camilla Björklund,Elin Reikerås,Jessica Elofsson,2023-10-29 This open access book s theme is Teaching mathematics as to be meaningful foregrounding children s play and perspectives It discusses the relation between teachers children and mathematical content within the context of play with a particular focus on the framing of these relations within this context which is an important theme in the debate on whether teaching should be integrated with or separated from children s play The work further addresses meaningfulness in the learning process particularly from the child s perspective Globally most guidelines and curricula for early childhood education mention play as one of the key features for young children s learning Still there are quite different views on the definitions of play and in what ways play should become part of children s learning The chapters of the book mirror the research topics presented at the fifth POEM conference in May 2022 divided into four sub themes Play and learning Children s perspectives on mathematics Teachers competencies and Theorizing aspects of early mathematics education ERIC Educational Documents Index, 1966-69: Minor descriptors and author index ,1970 **Pacesetters in Innovation Fiscal**
