According to the Book Gilbert A. Valverde, Leonard J. Bianchi, Richard G. Wolfe, W.H. Schmidt, Richard T. Houang, 2012-10-08

How are curriculum policies translated into opportunities to learn in the classroom

According to the Book presents findings from the largest cross national study of textbooks carried out to date the curriculum analysis of the 1995 Third International Mathematics and Science Study TIMSS

This study included a detailed page by page inventory of the mathematics and science content pedagogy and other characteristics collected from hundreds of textbooks in over forty countries

Drawing on these data the authors investigate the rhetorical and pedagogical features of textbooks to understand how they promote and constrain educational opportunities

They investigate how textbooks are constructed and how they structure diverse elements into prescriptions for teaching practice

The authors break new ground in understanding textbooks in terms of different educational opportunities that they make possible

The book examines policy implications from these new understandings

In particular conclusions are offered regarding the role of textbooks in curriculum driven educational reform in light of their role as promoters of qualitatively distinct educational opportunities

Teaching in the Standards-based Classroom, 2001

Virtually every national standards document every state framework and every local set of standards calls for fundamental changes in what and how teachers teach

The challenge for teachers is to implement the vision for mathematics and science classrooms called for in the standards

This issue describes that vision and suggests ways to use the standards mandated in your school to improve your practice to help you teach in your standards based classroom
