Matter And Motion According To The Physics Of The Secret Doctrine:

The Physics of the Secret Doctrine William Kingsland,1910 *The Secret Doctrine (Vol. 1-3)* Helena Blavatsky,2023-12-03 Helena Blavatsky's monumental work *The Secret Doctrine Volumes 1-3* serves as an intricate tapestry weaving together elements of theology, philosophy and science integrating esoteric traditions with a profound exploration of the cosmos and human evolution. Written in a dense yet poetic literary style, the text is structured around the dual doctrines of the universal and the individual rooted deeply in theosophical thought. Blavatsky draws upon a wide array of religious and philosophical sources including Eastern and Western esotericism to expound upon the idea of a hidden knowledge that transcends the physical realm, presenting her insights as both a critique of materialism and an invitation to spiritual awakening. Helena Blavatsky, a seminal figure in the Theosophical Society, was profoundly influenced by her travels to India and her studies of ancient wisdom traditions. Her quest for universal truths led her to challenge prevailing scientific and religious dogmas of the 19th century, positioning her as a pioneer of modern spirituality and a bridge between Eastern spirituality and Western thought. *The Secret Doctrine* is a must-read for anyone intrigued by metaphysics, spirituality and the quest for knowledge that transcends conventional wisdom. Blavatsky's comprehensive examination of the world's mystical traditions invites readers to explore the depths of their own consciousness and the interconnectedness of all existence.

The Secret Doctrine Helena Petrovna Blavatsky,1895 **The Secret Doctrine (Complete 3 Volumes)** Helena Blavatsky,2022-11-13 In *The Secret Doctrine*, Helena Blavatsky presents a profound exploration of the universal truths underlying religion, philosophy and science, encapsulated in her meticulously woven narrative across three comprehensive volumes. This work employs a distinctive blend of esoteric language and analytical reasoning, drawing upon an eclectic range of sources including Eastern spirituality, Western mysticism and the natural sciences. Written during the late 19th century, the book aims to reveal the metaphysical framework of existence, introducing concepts such as cosmic evolution and the unity of all life, while challenging the prevailing materialistic worldview of her time. Helena Blavatsky, a co-founder of the Theosophical Society, was deeply influenced by her studies in Eastern philosophies and occult traditions. Her travels in India and encounters with yogic practices and spiritual teachings profoundly shaped her worldview. Blavatsky's intent in writing *The Secret Doctrine* arose from her mission to disseminate these esoteric teachings, bridging the gap between science and spirituality and appealing to an increasingly skeptical society. This essential text is recommended for those seeking an intellectual awakening or a deeper understanding of spiritual philosophies. Blavatsky's intricate ideas encourage readers to contemplate the interconnectedness of all life and prompt an exploration of their own spiritual paths, making *The Secret Doctrine* a hallmark of esoteric literature that remains relevant and thought-provoking today. *The Secret Doctrine* H. P. Blavatsky,2011-05-19 A three-volume synthesis of science, religion and philosophy by one of the nineteenth century's most controversial spiritualists *The Secret Doctrine: Cosmogony* Helena Petrovna Blavatsky,1893 *Theosophy*,1920

Peregrinations of the Metaphysical Atom Helena Petrovna Blavatsky,2019-09-17 Fohat Cosmic Electricity by infusing energy into primordial matter electrifies into life and scatters into atoms It is through Fohat that the ideas of the Universal Mind are impressed upon matter Occultism asserts that Electricity is Matter not mere motion Force or Energy may be better names for it Electricity is immaterial only in the sense that its molecules are not subject to perception and experiment yet Occultism says it is atomic therefore material Fohat is connected with Vishnu from the root vish to pervade therefore he is called the Pervader and the Manufacturer because he shapes the atoms from crude material From the first awakening of Kosmos to a new Day of Brahm or Motion which even during the periods of Rest Night pulsates and thrills through every slumbering atom assuming an ever growing tendency to circular movement The gyratory movement of atoms and spheres exists from eternity The Elementary Germs with which Fohat fills the Universe from the Heaven of Mind are the atoms of Science and the monads of Leibniz A perpetual exchange of atoms is taking place in Space thus changing their combining equivalents on every planet Atoms enter into new forms of existence undreamt of and incognisable to physical Science The essence of cometary matter for instance is totally different from any of the chemical or physical characteristics with which the greatest chemists and physicists of the earth are familiar with Enshrined in its pristine state within the bosom of the Eternal Mother every atom born beyond the threshold of her realm is doomed to incessant differentiation If we follow the atoms and molecules of the lower plane in their transformation upwards these will come to a point where they pass altogether beyond the range of our faculties As the spiritual Monad is One Universal Boundless and Impartite whose rays form what we in our ignorance call the Individual Monads of men so the Mineral Monad being at the opposite point of the circle is also One and from it proceed the countless physical atoms which Science is beginning to regard as individualized

Instead of saying a Mineral Monad the more correct phraseology in physical science which differentiates every atom would have been to call it the Monad manifesting in that form of Prakriti called the Mineral Kingdom The atom as represented in the ordinary scientific hypothesis is not a particle of something animated by a psychic something destined after aions to blossom as a man It is a concrete manifestation of the Universal Energy which itself has not yet become individualized i e a sequential manifestation of the One Universal Monad As the monads are uncompounded things it is the spiritual essence which vivifies them in their degrees of differentiation which properly constitutes the Monad not the atomic aggregation which is only the vehicle and the substance through which thrill the lower and the higher degrees of Intelligence Every form on earth and in Space strives towards self formation following the model placed for it in the Heavenly Man The atom s evolution and involution its external and internal growth and development have all one and the same object Man or Humanity at large Not only the chemical compounds are the same but the same infinitesimal invisible lives compose the atoms of the bodies of the mountain and the daisy of man and the ant of the elephant and of the tree which shelters him from the sun Each particle whether organic or inorganic is a life Each atom may reach by self induced and self devised efforts that plane where it re becomes the One Unconditioned All Starting upon the long journey immaculate descending more and more into sinful matter and having connected himself with every atom in manifested space the Pilgrim having struggled through and suffered in every form of life and being is only at the bottom of the valley of matter and half through his cycle when he has identified himself with Humanity at large This he has made in his own image Myths are now proved to be fables just in proportion as we misunderstand them truths in proportion as they were once understood The Ether of Science the Ilus of Berosus the Protyle of Sir William Crookes are one the same primordial matter out of which the Builders following the plan traced out for them in the Divine Thought fashion the systems in Cosmos Such grand metaphysical concepts can no longer be brushed aside as myths Materialism and the malignancy of Scepticism are two evils that must remain in the world as long as man has not quitted his present gross form to don the one he had during the first and second Root Races of this Round The atom of the chemist the atom of the physicist that of the mathematician and that of the metaphysician have absolutely nothing in common but the name Each lower mind constructs an atom to suit his own fancy in order to explain some special phenomenon with which he is particularly concerned The primordial Atom belongs wholly to the domain of metaphysics It is an entified abstraction and has nought to do with physics strictly speaking as it can never be brought to the test of retort or balance The whole Universe focuses on a single metaphysical point Atoms Ether and the Evolution itself of modern Science are based on the conceptions of archaic nations Conceptions for the profane under the shape of allegories plain truths taught during the Initiations of the Elect Force is not in the Atom it is in the space which separates atoms from each other Matter exists in two conditions latent or undifferentiated and patent or differentiated Atomic however is a substance not subject to the qualities of matter from which it is quite different The Matter of the Esoteric Doctrine is eternal because it is Unevolved Cause Eternal

Matter becomes atomic only periodically In the language of the Initiates Atoms are Souls and Intelligences The atom imagined by modern Science now called energy is inseparable from Spirit Stones minerals rocks and even chemical atoms are simply organic units in profound lethargy Their coma comes to an end when their inertia becomes activity Replace the chemical terms molecule atom particle etc by the words Hosts Monads Devas etc and one might think the genesis of gods the primeval evolution of manvantaric Intelligent Forces was being described Were Leibniz and Spinoza's systems to be reconciled the essence of Esoteric Philosophy would be made to appear From the shock of the two as opposed to the Cartesian system emerge the Truths of the Archaic Doctrine and the Spirit which is at the heart of the Occult Doctrine and Thought Though both admitted but one real Entity while Spinoza made it impersonal and indivisible Leibniz divided his personal Deity into a number of divine and semi divine Beings Spinoza was a subjective Leibniz an objective Pantheist yet both were great philosophers in their intuitive perceptions To the follower of the true Eastern Archaic Wisdom to him who worships in spirit nought outside the Absolute Unity that ever pulsating great Heart that beats throughout as in every atom of nature each such atom contains the germ from which he may raise the Tree of Knowledge whose fruits will give life eternal and not physical life alone Spirit is abstract light uncreated latent in every atom in whose profound and sacred repose all motion must cease for ever Latent Electricity becomes patent under certain conditions The elementary atoms are compound bodies that contain primordial globules the gross encasement of the still finer atom spark the spark of Life and source of Electricity which is matter still When the Life energy is active in the atom that atom is organic when dormant or latent inorganic The distinction between the two states is arbitrary and spurious Life is as much present in the inorganic as in the organic matter Matter in atomizing differentiates Restore the differentiated matter to the status quo ante and there is no difficulty in seeing how it can pass through the interstices of dense substance in its differentiated state as we easily conceive of the travel of electricity and other forces through their conductors There are no blind forces in nature Every atom in the universe is permeated with Universal Intelligence from the latent spark in the mineral up to the quasi divine light in man's brain Matter and force are ever allied Matter without force and force without matter are inconceivable Every atom is endowed with consciousness yet the potential of man's ability to control the cells and atoms of his body have not been honoured with the imprimatur of the popes of modern science Every atom is a little universe of its own Every cell and organ in the human body has a brain and memory of its own and thus also experience and discriminative powers Physical Science calls atoms that which the Occultists regard as particles or molecules The real atoms are the inner principles and the intelligent spiritual guides of the cells and the particles they inform Atom is not the smallest constituent unit of matter not even a mathematical point It is an immutable Entity a reality within an appearance the molecule being in Occult Philosophy but a figment of maya illusion It may be described as a compact or crystallized point of Divine Energy and Ideation The Hermetic Divine Fire is the fons et origo of life that Uncreated Spirit which starts from and is immediately reabsorbed into

primordial matter It is the ultimate essence of every atom whether pertaining to animate or inanimate organic or inorganic substance Before that Spirit is immersed into matter it is self existent and independent of matter The real Atom does not exist on the material plane it is beyond space and time Atom in its eternal state is invisible even to the eye of an Archangel Brahm is called Atom because we have to imagine it as a mathematical point which however can be extended to Absoluteness He who would be an occultist must not separate either himself or anything else from the rest of creation or non creation For the moment he distinguishes himself from even a vessel of dishonour he will not be able to join himself to any vessel of honour He must think of himself as an infinitesimal something not even as an individual atom but as a part of the world atoms as a whole or become an illusion a nobody and vanish like a breath leaving no trace behind The Secret Doctrine:
