The Interval Rebecca Hill,2014-11-14 The Interval offers the first sustained analysis of the concept grounding Irigaray's thought the constitutive yet incalculable interval of sexual difference In an extension of Irigaray's project Hill takes up her formulation of the interval as a way of rereading Aristotle's concept of topos and Bergson's concept of duration Hill diagnoses a sexed hierarchy at the heart of Aristotle's and Bergson's presentations Yet beyond that phallocentrism she points out how Aristotle's theory of topos as a sensible relation between two bodies that differ in being and Bergson's intuition of duration as an incalculable threshold of becoming are indispensable to the feminist effort to think about sexual difference Reading Irigaray with Aristotle and Bergson Hill argues that the interval cannot be grasped as a space between two identities it must be characterized as the sensible threshold of becoming constitutive of the very identity of beings The interval is the place of the possibility of sexed subjectivity and intersubjectivity the interval is also a threshold of the becoming of sexed forces

Easternization of the West Colin Campbell,2015-11-17 In this provocative and groundbreaking book Colin Campbell shows that the civilization of the West is undergoing a revolutionary process of change one in which features that have characterized the West for two thousand years are in the process of being marginalized to be replaced by those more often associated with the civilizations of the East Moving far beyond popular trends Campbell assembles a powerful range of evidence to show how Easternization has been building throughout the last century especially since the 1960s Campbell demonstrates how it was largely in the 1960s that new interpretations in theology political thought and science were widely adopted by a new generation of young culture carriers This highly original and wide ranging book advances a thesis that will be of interest to scholars in many disciplines in the humanities and social sciences

The Politics of Culture in the Shadow of Capital Lisa Lowe,David Lloyd,1997-11-17 Coming from a broad cross section of academic disciplines and theoretical positions this collection of essays questions and reworks Marxist critiques of capitalism that center on the West and which posit a uniform model of development More specifically

Co-habiting with Ghosts Caron Lipman,2016-05-23 How does it feel to live in a haunted home How do people negotiate their everyday lives with the

experience of uncanny anomalous or strange events within the domestic interior What do such experiences reveal of the intersection between the material immaterial and temporal within the home How do people interpret share and narrate experiences which are uncertain and unpredictable What does this reveal about contested beliefs and different forms of knowledge And about how people co habit with ghosts a distinctive self other relationship within such close quarters This book sets out to explore these questions It applies a non reductive middle ground approach which steers beyond an uncritical exploration of supernatural experiences without explaining them away by recourse only to wider social and cultural contexts The book attends to the ways in which households in England and Wales understand their experience of haunting in relation to ideas of subjectivity gender materiality memory knowledge and belief It explores home as a place both dynamic and differentiated illuminating the complexity of everyday experience the familiarity of the strange as well as the strangeness of the familiar and the ways in which home continues to be configured as a distinctive space **Improving Secondary**

Pantheism and Ecology Luca Valera, 2023-11-14 This book provides a comprehensive overview of the relationship between pantheism and ecology particularly considering different cultural approaches and diverse religious theological and philosophical traditions Environmental ethics arises from the dangerousness and harmfulness of human beings with respect to nonhuman species and more generally with respect to the environment A common starting point for environmental ethics standpoints is that human beings are responsible for damaging nature The famous four laws of ecology drafted by Barry Commoner precisely express this guilt on the part of human beings who very often voluntarily violate the behavioral indications that emerge from nature itself These aspects concern environmental ethics outlooks Eco theology then takes a further step not only do we damage the ecosystem but also as many authors suggest when we humans destroy the natural world we are wounding God Such an idea implies a possible coincidence of God with the natural world or the ecosystem From this assumption different questions may emerge what is the kind of coincidence between God and the natural world Are God and the ecosystem coextensive If so are we re-sacralizing the natural world and grounding intrinsic values in theological postulates and statements These questions lead us to reconsider the cosmological assumptions that ground our environmental judgements from theology to different religious traditions and cultures to philosophical worldviews In particular we will focus on the cosmological assumptions of pantheism considering its differences with panentheism discussing the symmetrical or asymmetrical relationships between God and the finite ways in which God manifests Godself In this regard the book is divided into three main parts in the first part the question of pantheism is approached from different traditions and with a special focus on the main thinkers in the history of thought from Greek Stoicism to the present day In the second part some current ecological concerns are considered in relation to pantheistic cosmology the authors will deepen issues from the discussion of the different pan-conceptions to the problem of evil to Anthropocene Finally in the third part the different chapters will focus on ethical issues in the field of the current environmental crisis with a huge connection with the pantheistic cosmologies This book is oriented to a wide public interested in environmental issues and looking for an approach from different cultures and traditions Evidently due to its academic nature this book is also intended to be a great support for researchers interested in eco-theology and more specifically in the relationship between pantheism and ecology It is not in this sense a classic book on environmental ethics but a book that delves into the fundamentals of environmental philosophy privileging the Ibero-American approach

Reading Popular Physics Elizabeth Leane, 2017-03-02 Reading Popular Physics is a valuable contribution to our understanding of the nature and implications of physics popularizations A literary critic trained in science Elizabeth Leane treats popular science writing as a distinct and significant genre focusing particularly on five bestselling books Stephen Hawking s *A Brief History of Time* Steven Weinberg s *The First Three Minutes*

James Gleick's *Chaos*, M. Mitchell Waldrop's *Complexity* and Gary Zukav's *The Dancing Wu Li Masters*. Leane situates her examination of the texts within the heated interdisciplinary exchanges known as the Science Wars focusing specifically on the disputed issue of the role of language in science. Her use of literary analysis reveals how popular science books function as sites for disciplinary skirmishes as she uncovers the ways in which popularizers of science influence the public. In addition to their explicit discussion of scientific concepts, Leane argues these authors employ subtle textual strategies that encode claims about the nature and status of scientific knowledge claims that are all the more powerful because they are unacknowledged. Her book will change the way these texts are read, offering readers a fresh perspective on this highly visible and influential genre.
