Matters Of Consequence Creating A Meaningful Life And A World That Works

Thomas Lombardo

Matters Of Consequence Creating A Meaningful Life And A World That Works:

Contemporary Futurist Thought Thomas Lombardo, 2006-06-23 Contemporary Futurist Thought describes recent thinking about the future dealing with both the hopes and the fears expressed in modern times concerning what potentially lies ahead There are many such hopes and fears perhaps an overpowering number competing with each other and swirling about in the collective mind of humanity Psychologist and futurist Tom Lombardo describes this mental universe of inspiring dreams and threatening premonitions regarding the future The book begins with an in depth examination of the highly influential literary genre of science fiction which Dr Lombardo identifies as the mythology of the future He next describes the modern academic discipline of future studies which attempts to apply scientific methods and principles to an understanding of the future Social and technological trends in the twentieth century are then reviewed setting the stage for an analysis of the great contemporary transformation occurring in our present world Given the powerful and pervasive changes taking place across the globe and throughout all aspects of human life the questions arise Where are we potentially heading and perhaps more importantly where should we be heading The final chapter provides an extensive review of different answers to these questions Describing theories and approaches that highlight science technology culture human psychology and religion among other areas of focus as well as integrative views which attempt to provide big pictures of all aspects of human life the book provides a rich and broad overview of contemporary ideas and visions about the future In the conclusion Dr Lombardo assesses and synthesizes these myriad perspectives proposing a set of key ideas central to understanding the future This book completes the study of future consciousness begun in its companion volume *The Evolution of Future Consciousness* These two volumes rich in historical detail and concise observations on the interrelatedness of a wide range of interdisciplinary topics are a significant contribution to the field of future studies and a valuable resource for educators consultants and anyone wishing to explore the significance of thinking about the future

How to Achieve a Heaven on Earth hc John E. Wade II, 2011-07-13 This collection of 101 essays from some of today's most notable thinkers and leaders focuses on the large problems of society as well as every day challenges and encourages readers to envision a positive change The essays explore the themes of peace democracy prosperity racial harmony ecology and health encouraging readers to find meaning in their own lives and share it with others

Tackling Tomorrow Today Arthur B. Shostak, 2005 Contains fourteen essays discussing major scientific and technological challenges and issues the United States will face in the coming century

Science and the Pursuit of Wisdom Leemon McHenry, 2013-05-02 Nicholas Maxwell's provocative and highly original philosophy of science urges a revolution in academic inquiry affecting all branches of learning so that the single minded pursuit of knowledge is replaced with the aim of helping people realize what is of value in life and make progress toward a more civilized world This volume of essays from an international interdisciplinary group of scholars engages Maxwell in critical evaluation and celebrates his contribution to philosophy spanning forty years Several of the

contributors like Maxwell took their inspiration from Sir Karl Popper's philosophy of science and were connected to the department he created at the London School of Economics. In the introductory chapter, Maxwell provides an overview of his thought and then defends his views against objections in a concluding essay. *Wisdom, Consciousness, and the Future*

Thomas Lombardo, 2011-06-17 *Wisdom, Consciousness, and the Future* Collected Essays Thomas Lombardo Ph.D. Center for Future Consciousness

Wisdom, Consciousness, and the Future is a profound, deeply important, and timely book that concerned people and change agents everywhere will want to read. Copthorne Macdonald, The Wisdom Page

As a college professor and teacher of psychology, philosophy, and the future, Tom Lombardo's mind has been drawn toward such questions as: How will the human mind evolve in the future? In fact, how should the human mind evolve and improve itself? What might be the standards and ideals that guide this evolution? And what role does ethical development or evolution play in this process?

The twenty previously published articles collected together in *Wisdom, Consciousness, and the Future* chronicle the development of Dr. Lombardo's ideas on these related questions and topics and together constitute a theoretical perspective on the nature of the human mind, on how to best educate and evolve the human mind in the future, and how to integrate into this vision the central importance of both future consciousness as a key dimension of human consciousness and ethical character virtues.

True to its title, three key themes emerge in this collection: wisdom, consciousness, and the future, and all three concepts tie into the author's main contribution to the field of futures studies: future consciousness.

Numerous essays, for example, *Evolving Future Consciousness through the Pursuit of Virtue* and *The Evolution and Psychology of Future Consciousness*, address the nature of future consciousness, a term Dr. Lombardo defines as the complex set of mental capacities all humans possess for imagining, conceptualizing, and approaching the future.

Aside from describing the psychological make-up of future consciousness, which includes emotional, motivational, cognitive, and personal dimensions, the author also explains in numerous essays, such as *Developing Constructive and Creative Attitudes about the Future*, how to proactively enhance one's future consciousness.

Other essays deal directly with consciousness and the human mind in the broadest sense, as in *The Future Evolution of the Ecology of Mind*, and connect this general area of inquiry with the futurist question of how consciousness and mind might evolve in the future.

Dr. Lombardo proposes that the progressive emergence of cosmic consciousness is the central evolutionary trajectory of the human mind. Hence, this book contains essays on both consciousness of the future and consciousness in the future.

While the discussion of consciousness and the future fascinates in its own right, Dr. Lombardo is a holistic and deep thinker who searches for connections among myriad philosophical topics. A number of essays address the question of ethics and virtue and how such concepts connect with both future consciousness and the evolution of consciousness in the future.

He then expands on this theme to explore how virtue applies to the goals of higher education in essays such as *Ethical Character Development and Personal and Academic Excellence*.

In thinking through the concept of virtue and how it applies to consciousness, education, and the future, Dr. Lombardo emphasizes the one

key virtue wisdom that provides the center of gravity around which all other character virtues revolve Indeed if any one concept unites the majority of essays in this collection it is wisdom In *The Wisdom of Future Consciousness* the author argues that wisdom is the highest expression of future consciousness and systematically describes the numerous connections between wisdom and heightened future consciousness Further according to the author wisdom is the key ideal that we should model and teach within education now and in the future This argue Future Consciousness Thomas Lombardo, 2017-10-27 How do our unique conscious minds reflect and amplify nature's vast evolutionary process This book provides a scientifically informed psychologically holistic approach to understanding and enhancing our future consciousness serving as a guide for creating a realistic constructive and ethical future Thomas Lombardo reveals how we can flourish in the flow of evolution and create a prosperous future for ourselves human society and the planet **Tikkun**, 2004
