[Historical Dictionary of Turkey](#) Metin Heper, Nur Bilge Criss, 2009-01-21 Turkey is both an old and a new country While the Turks have been living in Anatolia for the last millennium the country has gone through extensive Westernization since the end of the 18th century However in the case of Turkey tradition has not arrested modernization rather the traditional has adapted itself to the modern The revival of Islam and the emergence of

certain ethnic identities during the recent decades have not led to the reversal of progress in the economy and democracy. There is a thriving private sector and the economy continues to grow. At the turn of the 21st century Turkey is the only Muslim country with a democratic political system. Although Turkey belongs to both the West and the East its Western credentials are more marked. It is a member of the Council of Europe, North Atlantic Treaty Organization (NATO) and Organization for Economic Cooperation and Development (OECD) and it is presently carrying out negotiations with the European Union (EU) for accession to that Union as a full member. The third edition of the *Historical Dictionary of Turkey* explores the history of this fascinating country through a chronology, an introductory essay, a bibliography and hundreds of cross-referenced dictionary entries on important persons, places, events and institutions as well as on significant political, economic, social and cultural aspects.

*Sovereign Debt and International Financial Control* Ali Coşkun Tunçer, 2015-08-26

This book revisits an important chapter of financial history in the Middle East and the Balkans from 1870-1914. During this period capital flows in the form of sovereign debt increased rapidly throughout the region. The spiral of heavy government borrowing eventually culminated in defaults on foreign obligations in the Ottoman Empire (1875), Egypt (1876), Greece (1893) and Serbia (1895). In all four cases introducing international financial control over the finances of the debtor states became the prevalent form of dealing with defaults. The different cases of international financial control became increasingly refined and they marked important milestones in the evolution of the global governance of sovereign debt before 1914. For the defaulting states however the immediate impact of international financial control was infringement of sovereignty. The extent of international financial control and the borrowing capacity of debtor states varied in each case as well as the degree of resistance towards it. This book documents the characteristics of international financial control in a comparative perspective. It relates sovereign debt default and international financial control to political and fiscal systems and raises questions about the tension between national sovereignty and global capital. It sheds light on the impact of international financial control on the long-term credibility and fiscal capacity of the debtor states in question. The author demonstrates that the governments' decisions to borrow internationally and their attitudes towards international financial control were heavily influenced by domestic political and fiscal factors.

Dale, 2009-12-24 Between 1453 and 1526 Muslims founded three major states in the Mediterranean Iran and South Asia respectively the Ottoman Safavid and Mughal empires By the early seventeenth century their descendants controlled territories that encompassed much of the Muslim world stretching from the Balkans and North Africa to the Bay of Bengal and including a combined population of between 130 and 160 million people This book is the first comparative study of the politics religion and culture of these three empires between 1300 and 1923 At the heart of the analysis is Islam and how it impacted on the political and military structures the economy language literature and religious traditions of these great empires This original and sophisticated study provides an antidote to the modern view of Muslim societies by illustrating the complexity humanity and vitality of these empires empires that cannot be reduced simply to religious doctrine **Artisan Entrepreneurs in Cairo and Early-Modern Capitalism (1600-1800)** Nelly Hanna, 2011-06-16 Little has been written about the economic history of Egypt prior to its incorporation into the European capitalist economy While historians have mined archives and court documents to create a picture of the commercial activities networks and infrastructure of merchants during this time few have documented a similar picture of the artisans and craftspeople Artisans outnumbered merchants and their economic weight was considerable yet details about their lives the way they carried out their work and their role or position in the economy are largely unknown Hanna seeks to redress this gap with *Artisan Entrepreneurs in Cairo and Early Modern Capitalism 1600-1800* by locating and exploring the role of artisans in the historical process Offering richly detailed portraits as well as an overview of the Ottoman Empire's economic landscape Hanna incorporates artisans into the historical development of the period portraying them in the context of their work their families and their social relations These artisans developed a variety of capitalist practices both as individuals and collectively in their guilds Responding to the demands of expanding commercial environments in Egypt and Europe artisans found ways to adapt both production techniques and the organization of production Hanna details the ways in which artisans defied the constraints of the guilds and actively engaged in the markets of Europe demonstrating how Egyptian artisan production was able to compete and survive in a landscape of growing European trade Deftly synthesizing a wide range of economic and historical theory Hanna reinvigorates the current scholarship on early Ottoman history and provides a persuasive challenge to the largely shallow perception of artisans' role in Egypt's economy *Debasement* Kevin Butcher, 2020-04-30 The debasement of coinage particularly of silver was a common feature of pre-modern monetary systems Most coinages were issued by state authorities and the condition of a coinage is often seen rightly or wrongly as an indicator of the broader fiscal health of the state that produced it While in some cases the motives behind the debasements or reductions in standards are clear in many

cases the intentions of the issuing authorities are uncertain Various explanations have been advanced fiscal motives such as a desire to profit or a to cover a deficit caused by the failure to balance expenditure and revenues monetary motives such as changing demand for coined money or a desire to maintain monetary stability in the face of changing values of raw materials or labour costs pressure from groups within society that would profit from debasement misconduct at the mint or the decline of existing monetary standards due to circulation and wear of the coinage in circulation Certain explanations have tended to gain favour with monetary historians of specific periods partly reflecting the compartmentalization of scholarship Thus the study of Roman debasements emphasizes fiscal deficits whereas medievalists are often more prepared to consider monetary factors as contributing to debasements To some extent these different approaches are a reflection of discrepancies in the amount of documentary evidence available for the respective periods but the divide also underlines fundamentally different approaches to the function of coinage Romanists have preferred to see coins as a medium for state payments whereas medievalists have often emphasized exchange as an important function of currency The volume is inter disciplinary in scope Apart from bringing together monetary historians of different periods it also contains contributions from archaeometallurgists who have experience with the chemical and physical composition of coins and technical aspects of production of base alloys
