Net Spies Whos Watching You On The Web:

Net Spies Andrew Gauntlett, 2007-09 Do you have a private life If you think you do you may have to think again The Internet poses a threat to everyone s personal privacy it offers untold benefits but poses dangers that have to be addressed by companies the media governments The book assumes no knowledge of computers it offers hints tips on how to safeguard one s privacy in the Information Age *Net Spies* Andrew Gauntlett, 2004 **Ill Effects** Martin Barker, Julian Petley, 2002-09-26 The influence of the media remains a contentious issue Every time a particularly high profile crime of violence is committed there are those who blame the effects of the media The familiar culprits of cinema television video and rock music have now been joined particularly in the wake of the massacre at Columbine High by the Internet and the World Wide Web Yet any real evidence that the media do actually have such negative effects remains as elusive as ever and consequently the debate about effects frequently ends up as being little more than strident and rhetorical appeals to common sense *Ill Effects* argues that the question of media influence needs to be debated by those with a clearer understanding of how audiences and media interact with one another Analysing the failure of the effects approach to understand both the modern media and their audiences this second edition examines the influence of the effects tradition in America the United Kingdom Australia and Europe as well as the role of the British Board of Film Classification Contributors examine the increasing number of stories about the alleged ill effects of the Internet and enquire whether this is a prelude to and a crude attempt to legitimise the imposition of tighter controls on new media *Ill Effects* is a guide for the perplexed It suggests new and productive ways in which we can understand the effects of the media and questions why many in media education accept a simple interpretation of the effects debate particularly at times of moral panic Refusing to adopt the absurd position that the media have no influence at all *Ill Effects* reconceptualises the notion of media influence in ways which take into account how people actually use and interact with the media in their everyday lives Martin Barker Sara Bragg David Buckingham Tom Craig David Gauntlett Patricia Holland Annette Hill Mark Kermode Graham Murdoch Julian Petley Sue Turnbull

Look Who's Watching, Revised Edition Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue trust To meet its full potential users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking while also being secure private and safe When trust in the Internet wanes the network s stock of digital social capital falls and users begin to alter their online behaviour These often subtle changes in behaviour tend to be collectively highly maladaptive hindering the economic developmental and innovative potential of the globe spanning network of networks *Look Who's Watching* Surveillance Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced Edward Snowden s revelations that the United States National Security Agency and other government agencies are spying on Internet users the proliferation of cybercrime and the growing commodification of user data and regulatory changes which threaten to fragment

the system are all rapidly eroding the confidence users have in the Internet ecosystem Based on a combination of illustrative anecdotal evidence and analysis of new survey data Look Who's Watching clearly demonstrates why trust matters how it is being eroded and how with care and deliberate policy action the essential glue of the Internet can be restored The Hacker Ethic Pekka Himanen,2009-03-12 You may be a hacker and not even know it Being a hacker has nothing to do with cyberterrorism and it doesn't even necessarily relate to the open source movement Being a hacker has more to do with your underlying assumptions about stress time management work and play It's about harmonizing the rhythms of your creative work with the rhythms of the rest of your life so that they amplify each other It is a fundamentally new work ethic that is revolutionizing the way business is being done around the world Without hackers there would be no universal access to e-mail no Internet no World Wide Web but the hacker ethic has spread far beyond the world of computers It is a mind set a philosophy based on the values of play passion sharing and creativity that has the potential to enhance every individual's and company's productivity and competitiveness Now there is a greater need than ever for entrepreneurial versatility of the sort that has made hackers the most important innovators of our day Pekka Himanen shows how we all can make use of this ongoing transformation in the way we approach our working lives Computer Security John S.
