Economics Radical Economics and Marxist Economics from the point of view of the four paradigms and locates them within the four paradigm framework Age of Contradiction Howard Brick,2000 In *Age of Contradiction* Howard Brick provides a rich context for understanding historical events cultural tensions political figures artistic works and trends of intellectual life His lucid and comprehensive book combines the best methods of historical analysis and assessment with fascinating subject matter to create a three dimensional portrait of a complicated time In one of the only books on the 1960s to put ideas at the center of the period s history Brick carefully explores the dilemmas the promise and the legacy of American thought in that time *Class Theory and History* Stephen A. Wolff,2013-12-16 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company **Building Information Modelling, Building Performance, Design and Smart Construction** Mohammad Dastbaz,Chris Gorse,Alice Moncaster,2017-03-31 This book charts the path toward high performance sustainable buildings and the smart dwellings of the future The volume clearly explains the principles and practices of high performance design the uses of building information modelling BIM and the materials and methods of smart construction Power Systems Architecture Material Science Civil Engineering and Information Systems are all given consideration as interdisciplinary endeavours are at the heart of this green building revolution **Global Capital and Peripheral Labour** Ravi Raman,2010-01-21 This book presents a historical account of plantations in India in the context of the modern world economy It brings history up to the present thereby showing how history can assist in explaining contemporary conditions and trends The author focuses on labour and economic development problems and uses the World Systems theory so as to demonstrate the practical utility of the theory and its limitations as a guide to historical research Based on extensive archival research the book interprets the dynamics of plantation capitalism by focusing on the work life and struggle of the dalits on plantations in colonial and post colonial South India as they evolved from the mid 19th century It argues that these elements of the plantation life world were fashioned by the specific characteristics of the workers location within the capitalist world economy the then prevailing local social structure and the scheme of disciplining to which the workers were subjected to Treating the relations among various social forces the planting communities the oppressed communities dalits in India the regional and national state and the Imperial regime this book fills a gap in academic literature on capitalism economic development and globalization *The Restructuring of Capitalism in Our Time* William K. Tabb,2012 Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth Once the markets stabilized the United States enacted regulatory reforms that ultimately left basic economic structures unchanged At the same time the political class pursued austerity measures to curb the growing national debt Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance William K Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform Tabb follows the rise of banking practices and financial motives in America

over the past thirty years and the simultaneous growth of a shadow industry of hedge funds private equity firms and financial innovations such as derivatives He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization then shows how these developments perspectives and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization Revealing the willful blind spots of mainstream finance theory Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive sustainable model for growth *Leviathans* Alfred D. Chandler, Bruce Mazlish, 2005-01-17 A groundbreaking 2005 exploration of multinational corporations that differs from other books on the subject by offering the reader a totally global perspective of multinationals without portraying them simply as economic entities Written by experts on various aspects of the history development cultural and social implications of the multinational corporation the book paints a compelling and coherent picture of the way these businesses affect almost all areas of our existence As we might expect the multinational company is shown to play a major role in the globalization that is reshaping so much of our lives

Development and Distribution Andy Sumner, 2018-07-03 Since the Second World War surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations East Asia has exceeded most regions in its achievement of convergence and much has been written on comparative industrialization and development in North East Asia Less discussed is South East Asia and the surprising and inclusive transformation several of its countries has undergone Development and Distribution focuses on South East Asia and more specifically on Malaysia Indonesia and Thailand These three nations have all undergone a major transformation in a way never anticipated from being poor agrarian countries to middle income countries with developed industrial and manufacturing bases How did Malaysia Indonesia and Thailand achieve such a transformation and how did they achieve the transformation with a form of economic growth that was driven by structural transformation but that was inclusive Given that historically it has been thought that structural transformation tends to push up inequality whilst inclusive growth necessitates static or even falling inequality this last point is particularly salient to developing countries Understanding how the transformation was possible in a relatively small space of time the extent to which it was inclusive and the caveats and prospects for South East Asia is thus an area of enquiry significant to all developing countries as they seek economic and social transformation
