Radicals In Urban Politics The Alinsky Approach:

Radicals in Urban Politics Robert Bailey (Jr.),1974 **Radicals in Urban Politics** Robert Bailey,1974 *Community Organizing for Urban School Reform* Dennis Shirley,2010-01-01

Observers of all political persuasions agree that our urban schools are in a state of crisis Yet most efforts at school reform treat schools as isolated institutions disconnected from the communities in which they are embedded and insulated from the political realities which surround them *Community Organizing for Urban School Reform* tells the story of a radically different approach to educational change Using a case study approach Dennis Shirley describes how working class parents public school teachers clergy social workers business partners and a host of other engaged citizens have worked to improve education in inner city schools Their combined efforts are linked through the community organizations of the Industrial Areas Foundation which have developed a network of over seventy Alliance Schools in poor and working class neighborhoods throughout Texas This deeply democratic struggle for school reform contains important lessons for all of the nation s urban areas It provides a striking point of contrast to orthodox models of change and places the political empowerment of low income parents at the heart of genuine school improvement and civic renewal

This Could Be the Start of Something Big Manuel Pastor Jr.,Chris Benner,Martha Matsuoka,2015-10-27

For nearly two decades progressives have been dismayed by the steady rise of the right in U S politics Often lost in the gloom and doom about American politics is a striking and sometimes underanalyzed phenomenon the resurgence of progressive politics and movements at a local level Across the country urban coalitions including labor faith groups and community based organizations have come together to support living wage laws and fight for transit policies that can move the needle on issues of working poverty Just as striking as the rise of this progressive resurgence has been its reception among unlikely allies In places as diverse as Chicago Atlanta and San Jose the usual business resistance to pro equity policies has changed particularly when it comes to issues like affordable housing and more efficient transportation systems To see this change and its possibilities requires that we recognize a new thread running through many local efforts a perspective and politics that emphasizes regional equity Manuel Pastor Jr Chris Benner and Martha Matsuoka offer their analysis with an eye toward evaluating what has and has not worked in various campaigns to achieve regional equity The authors show how momentum is building as new policies addressing regional infrastructure housing and workforce development bring together business and community groups who share a common desire to see their city and region succeed Drawing on a wealth of case studies as well as their own experience in the field Pastor Benner and Matsuoka point out the promise and pitfalls of this new approach concluding that what they term social movement regionalism might offer an important contribution to the revitalization of progressive politics in America

Chocolate Cities Marcus Anthony Hunter,Zandria Robinson,2018-01-16

When you think of a map of the United States what do you see Now think of the Seattle that begot Jimi Hendrix The Dallas that shaped Erykah Badu The Holly Springs Mississippi that compelled Ida B Wells to

activism against lynching The Birmingham where Martin Luther King Jr penned his most famous missive Now how do you see the United States Chocolate Cities offers a new cartography of the United States a Black Map that more accurately reflects the lived experiences and the future of Black life in America Drawing on cultural sources such as film music fiction and plays and on traditional resources like Census data oral histories ethnographies and health and wealth data the book offers a new perspective for analyzing mapping and understanding the ebbs and flows of the Black American experience all in the cities towns neighborhoods and communities that Black Americans have created and defended Black maps are consequentially different from our current geographical understanding of race and place in America And as the United States moves toward a majority minority society Chocolate Cities provides a broad and necessary assessment of how racial and ethnic minorities make and change America s social economic and political landscape

The Public Opinion Process Irving Crespi, 2013-11-05

What is public opinion How can we best study it This work presents a process model that answers these questions by defining public opinion in a way that also identifies an approach to studying it The model serves as a framework into which the findings of empirical research are integrated producing a comprehensive understanding of public opinion that encompasses the congeries of middle range theories that have emerged from empirical research The three dimensional process model and the way it is explicated satisfies the diverse and sometimes divergent needs and interests of political scientists sociologists social psychologists and communication specialists who study public opinion This is achieved by clearly differentiating and interrelating the following individual opinions the judgmental outcomes of a process in which attitudinal systems comprised of beliefs values interests and feelings function as intervening variables that direct and structure perceptions of public issues collective opinions the outcomes of communication from which mutual awareness emerges and that integrate separate individual opinions into a significant social force and political roles of collective and individual opinions the outcomes of the extent to which collective and individual opinions have achieved legitimacy as the basis for governing a people

DON T USE THIS PARAGRAPH FOR GENERAL CATALOGS Each dimension of the model has its corresponding subprocess transactions between individuals and their environments communications among individuals and collectives and political legitimation of public opinion Since the process model is by definition interactional none of the three dimensions has theoretical or sequential priority over the others Instead of treating the psychological political and sociological aspects of public opinion as separate stages of an unidirectional process the three aspects are modeled as dimensions of a complex ongoing system in continuous interaction with each other This conceptualization satisfies the need for a truly interdisciplinary theory in that it demands that each dimension be studied in terms of its defining sub process It also avoids the twin errors of reductionism and reification in the study of public opinion

Architecture of Fear Nan Ellin,1997 Essays explain how fear shapes the contemporary landscape giving us security systems gated communities and semi public mall and atrium spaces

Block by Block Amanda I. Seligman,2005-05-10 In the decades following World War II cities across the United States saw an influx of African American families into otherwise homogeneously white areas This racial transformation of urban neighborhoods led many whites to migrate to the suburbs producing the phenomenon commonly known as white flight In Block by Block Amanda I Seligman draws on the surprisingly understudied West Side communities of Chicago to shed new light on this story of postwar urban America Seligman s study reveals that the responses of white West Siders to racial changes occurring in their neighborhoods were both multifaceted and extensive She shows that despite rehabilitation efforts deterioration in these areas began long before the color of their inhabitants changed from white to black And ultimately the riots that erupted on Chicago s West Side and across the country in the mid 1960s stemmed not only from the tribulations specific to blacks in urban centers but also from the legacy of accumulated neglect after decades of white occupancy Seligman s careful and evenhanded account will be essential to understanding that the flight of whites to the suburbs was the eventual result of a series of responses to transformations in Chicago s physical and social landscape occurring one block at a time
