Radio Journalism:

Essential Radio Journalism Paul Chantler, Peter Stewart, 2009-05-29 Incredibly comprehensive Learn and understand this lot and you will have a fine grasp Jon Snow This sets the standard for every radio newsroom Andy Ivy Editor Sky News Radio In an age of infinite choice made possible by new technology and a disturbing move away from traditional reporting into colourful comment and speculation by blogs and citizen journalists there has never been a better time to focus on pure journalism skills *Essential Radio Journalism* is a vastly comprehensive working manual for radio journalists as well as a textbook for broadcast journalism students It contains practical advice for gathering reporting writing editing and presenting the news alongside media law and ethics There is a wealth of inside information checklists and on the job advice that you can immediately put to use whether you are in your first job or have several years of experience This is a book to inspire responsible accurate and exceptional journalism skills

Radio Journalism Guy Starkey, Andrew Crisell, 2009-01-13 This is not another turgid guide to digital editing writing for radio and the structure of a newsroom team It is an ambitious and accessible study that combines a succinct narrative history of radio journalism with an analysis of its power in the public sphere It describes the development of British audio broadcasting before locating it in an international context and contemplating the contours of the convergent future Such ambition is often the prelude to failure Instead Starkey and Crisell have written a precious introduction to the theory practice and purposes of radio journalism that will be very useful to serious students of the subject This is a very good book THE Times Higher Education Radio Journalism introduces key themes in journalism studies to explore what makes radio reporting distinctive and lay out the claims for radio's critical importance in the news landscape With their extensive experience in radio production and academia authors Guy Starkey and Andrew Crisell take readers on a tour through the past present and future of radio broadcasting from the infancy of the BBC in the 1920s up to the prospect of rolling news delivered to mobile telephones Grounding each chapter in a survey of scholarly writing on the radio they explore the connections between politics policy and practice inviting critical reflection on who radio professionals are what they do and why Putting theory and practice into dialogue this book is the perfect bridge between unreflective production manuals and generalised media theory texts Witty and engaging *Radio Journalism* provides an essential framework for understanding the continuing relevance of radio journalism as a profession set of practices and arena for critical debate
