Essentials of Terror Medicine Shmuel Shapira, Jeffrey Hammond, Leonard Cole, 2008-12-05 A new field of medicine has emerged as a result of the global proliferation of terrorism. Terror medicine is related to emergency and disaster medicine but focuses on the constellation of medical issues uniquely related to terrorist attacks. The field encompasses four broad areas: preparedness, incident management, mechanisms of injuries and responses, and psychological consequences. In *Essentials of Terror Medicine*, these core concerns are addressed by a distinguished international authorship brought together by the three editors of this volume, who themselves are recognized experts in relevant disciplines: Shmuel Shapira, epidemiology and hospital administration; Jeffrey Hammond, trauma surgery and emergency response; Leonard Cole, bioterrorism and public policy. *Essentials of Terror Medicine* provides insightful and practical information for physicians, nurses, emergency responders, and other health professionals who may be called to service during or after a terror incident. It is indispensable reading for the medical community of the 21st century, in which diligence, continued education, and careful preparation for a variety of possible events are a preeminent responsibility.

Injury and Trauma in Bioarchaeology Rebecca C. Redfern, 2016-12-22 The remains of past people are a testament to their lived experiences and of the environment in which they lived. Synthesising the latest research, this book critically examines the sources of evidence used to understand and interpret violence in bioarchaeology, exploring the significant light such evidence can shed on past hierarchies, gender roles, and life courses. The text draws on a diverse range of social and clinical science research to investigate violence and trauma in the archaeological record, focussing on human remains. It examines injury patterns in different groups, as well as the biological, psychological, and cultural factors that make us behave violently, how our living environment influences injury and violence, the models used to identify and interpret violence in the past, and how violence is used as a social tool. Drawing on a range of case studies, Redfern explores new research directions that will contribute to nuanced interpretations of past lives.
