**New Views on an Old Planet** Tjeerd H. van Andel, 1994-10-28 In this 1994 revised edition of his award winning book on the Earth's history Professor van Andel updates and expands his earlier text drawing on a wealth of new knowledge that has become available in the last decade This book examines the major changes in the Earth's history the evolution of the solid Earth the changing oceans and atmospheres and the progression of life to render a historical account of the Earth's evolution Much knowledge was gained in the previous decade and while little material has been deleted this new edition has grown to cover the key topics including a chapter on how we can improve our grasp on geological time Mindful of the current interest in global change new sections describe the green house effect and address its possible future ramifications In prose that is both concise and compelling *New Views on an Old Planet A History of Global Change* makes Earth history appealing to the general reader It will serve as an excellent text for introductory courses in the earth and environmental sciences

**Rainforest** Tony Juniper, 2018-03-29 Rainforests are the lungs of our planet regulators of the earth's temperature and weather They are also home to 50 per cent of the world's animals and plants which for centuries have been the source of many of our key medicines And yet we've all heard of their systematic destruction the raising of trees to make way for plantations of oil palms or cattle the disenfranchisement of indigenous peoples and the corruption that leads to illegal logging and pollution But this is the full story you've never heard an in depth wide ranging first hand narrative that not only looks at the state of the world's tropical rainforests today and the implications arising from their continuing decline but also at what is being done and can be done in future to protect the forests and the 1.6 billion people that depend upon them It is inspirational too in its descriptions of the rainforest's remarkable birds and plants and its indigenous people *Rainforest* is a personal story drawing on the author's many years experience at the frontline of the fight to save the rainforests explaining the science and history of the campaigns and what it has felt like to be there amid the conflicts and dilemmas *Rainforest Radio* Georgia Ennis, 2025 *Rainforest Radio* follows Napo Kichwa media producers performers and consumers across a disrupted Amazon rainforest to understand the effects of different methods and media in language reclamation projects

**Isle of Fire** Christian A. Kull, 2004-07-19 Long considered both best friend and worst enemy to humankind fire is at once creative and destructive On the endangered tropical island of Madagascar these two faces of fire have fueled a century long conflict between rural farmers and island leaders Based on detailed fieldwork in Malagasy villages and a thorough archival investigation *Isle of Fire* offers a detailed analysis of why Madagascar has always been aflame why it always will be aflame and ultimately as Christian Kull argues why it should remain aflame *Islands of Rainforest* Edvard Hviding, Tim Bayliss-Smith, 2018-05-08 This title was first published in 2000 An original and thought provoking analysis of modern initiatives in the tropical rain forest While issues such as logging eco timber eco tourism have been widely analyzed from an outsider's perspective this book considers them from the local people's viewpoint in terms of a long history of the rainforest

uses The authors demonstrate that the relationship of indigenous people to the tropical forest is not essentially timeless nor is it primarily spiritual or mystical It is in fact firmly connected to modern realities while still being rooted in historical beliefs and practices Standing at the intersection of anthropology historical geography and rainforest ecology and also at the interface of the local and the global this ethnographically grounded study dispels a number of commonly held assumptions It reveals how processes of impact are actually two way interactions as local communities in Melanesia incorporate industries like logging into rapidly evolving post colonial society and economy **My Teacher Rides a Harley** Gary Dulabaum,2003 In this memoir about kids creativity and the power of songwriting Gary Dulabaum inspires and entertains Whether recounting his early days as a struggling reader and writer or outlining the songwriting process he uses in student workshops around the country Gary s belief in creativity as a learning tool is empowering This book includes the tools and processes teachers need to begin writing songs in their classrooms a CD of songs students can sing along with and classroom activities to enhance the educational value of the songs Throughout Gary shows concern for children and their ability to communicate A great way for teachers to expose their students to the writing process and encourage their personal creativity Book jacket Probing the Chemistry/climate Connection ,1990 **The Rough Guide to Costa Rica** Jean McNeil,2001

*Water and the Rainforest in Malaysian Borneo* Ian Douglas,2022-01-01 This volume synthesizes and analyzes thirty years of hydrological research in the Danum Valley Conservation Area a lowland dipterocarp rainforest in Sabah Malaysia Ian Douglas explores the role of water in the rainforest ecosystem setting out the ecological climatological and geological context of present day hydrological processes soil erosion and stream sedimentation He emphasizes the role of extreme events and natural disturbances in sediment supplies and the evolution of drainage pathways and explains the pathways of rainfall and stream sediment Douglas then explores the impacts caused by logging the extreme pulses of sedimentation and the effects of log removal and logging road construction examining the effects of major storms in the 20 years after tree harvesting Methods of minimizing logging damage to soils and streams are discussed and the effects on flora and fauns are considered

What We Learned in the Rainforest Tachi Kiuchi,William K. suddenly realized that I was taking wider views of my own mind's sky than I have enjoyed in a long time Ferris illuminates among other matters the mysteries of laughter nirvana common sense and Joe Montana He makes us think big thoughts Jonathan Weiner author of *The Next 100 Years* and *Planet Earth* One of our best and most imaginative writers Timothy Ferris has never been afraid to tackle big themes *The Mind's Sky* is a dazzling and provocative synthesis of inner and outer space This book is sure to be as controversial as it is elegant Dennis Overbye author of *Lonely Hearts of the Cosmos* [Women's Voices from the Rainforest](#) Janet Gabriel Townsend, 2005-08-05 International development policy is responsible for much of the destruction of Central and Latin American rainforests This explores how indigenous women are at last turning their voices to action demanding grassroots strategies as the solution *Tropical Rain Forest: A Wider Perspective* F.B. Goldsmith, 2012-12-06 The international perspective for this book is the unprecedented level of concern over deforestation recognized by the meeting of world leaders at the 1992 Earth Summit in Rio de Janeiro and culminating in the appointment of the Intergovernmental Panel on Forests IPF under the auspices of the UN Commission on Sustainable Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance
