Realism In The Sciences Proceedings Of The Ernan McMullin Symposium 1995 Louvain Philosophical Studies No 1:

Realism in the Sciences Igor Douven, Leon Horsten, 1996 This book contains ten papers that were presented at the symposium about the realism debate held at the Center for Logic Philosophy of Science and Philosophy of Language of the Institute of Philosophy at the Katholieke Universiteit Leuven on 10 and 11 March 1995 The first group of papers are directly concerned with the realism anti realism debate in the general philosophy of science This group includes the articles by Ernan McMullin Diderik Batens Joke Meheus Igor Douven and Herman de Regt The papers of the second group concentrate on specific problems arising from the realism anti realism debate Theo Kuipers contribution discusses the problem of truth approximation Roger Vergauwen s article pertains to the issue of realism in the philosophy of mind and semantics Jaap van Brakel s article focusses on the relation between everyday concepts and scientific concepts and on the theory dependence of observation Paul Cortois investigates the relation between the question of realism and Kuhn s concept of incommensurability between scientific theories The final group contains two papers on the realism anti realism debate in the special sciences James Cushing discusses the problem of underdetermination in quantum mechanics and Jean Paul van Bendegem addresses the question of the possibility of an empiricist philosophy of mathematics **Subject Guide to Books in Print**, 1991

Forthcoming Books Rose Arny, 1997 **Realism** Pam Morris, 2003-07-10 Coming to prominence with the nineteenth century novel literary realism has most often been associated with the insistence that art cannot turn away from the more sordid and harsh aspects of human existence However because realism is unavoidably tied up with the gnarly concept of reality and the real it has been one of the most widely debated terms in the New Critical Idiom series This volume offers a clear reader friendly guide to debates around realism examining ideas of realism in nineteenth century French and British fiction the twentieth century formalist reaction against literature s status as truth realism as a democratic tool or utopian form This volume is vital reading for any student of literature in particular those working on the realist novel *Studies in Scientific Realism* André Kukla, 1998 This book offers a clear analysis of the standard arguments for and against scientific realism i e the position that the theoretical entities postulated by science exist Kukla focuses on what Jarrett Leplin calls minimal epistemic realism which merely claims that it is not impossible to have good reasons for believing that theoretical entities exist most scientific realists want to claim more than this In surveying claims on both sides of the debate Kukla organizes them in ways that expose unnoticed connections permitting recognition of generic failings and anticipation of generic responses Time and again he reveals influential arguments to be special cases of broader patterns of inference which are mistaken or question begging in some important way At the same time he finds new ways to reconcile seemingly incompatible positions or to escape some supposed disastrous implication And some of the unoccupied positions that Kukla discovers and develops constitute positive contributions with the potential to influence further debate Kukla s book is for

students and scholars of philosophy of science as well as scientists interested in questions bearing upon the philosophical foundations of their discipline

Scientific Realism Jarrett Leplin, 1984-01-01

Studies in Scientific Realism Andre Kukla, 1998-04-30 This book offers a superbly clear analysis of the standard arguments for and against scientific realism In surveying claims on both sides of the debate Kukla organizes them in ways that expose unnoticed connections He identifies broad patterns of error reconciles seemingly incompatible positions and discovers unoccupied positions with the potential to influence further debate Kukla s overall assessment is that neither the realists nor the antirealists may claim a decisive victory

Scientific Realism N. Rescher, 1987-07-31 The increasingly lively controversy over scientific realism has become one of the principal themes of recent philosophy 1 In watching this controversy unfold in the rather technical way currently in vogue it has seemed to me that it would be useful to view these contemporary disputes against the background of such older epistemological issues as fallibilism scepticism relativism and the traditional realism idealism debate This then is the object of the present book which will recon sider the newer concerns about scientific realism in the context of these older philosophical themes Historically realism concerns itself with the real existence of things that do not meet the eye with suprasensible entities that lie beyond the reach of human perception In medieval times discussions about realism focused upon universals Recognizing that there are physical objects such as cats and triangular objects and red tomatoes the medievals debated whether such abstract objects as cathood and triangularity and redness also exist by way of having a reality indepen dent of the concretely real things that exhibit them Three fundamen tally different positions were defended 1 Nominalism Abstracta have no independent existence as such they only exist in and through the objects that exhibit them Only particulars individual substances exist Abstract objects are existents in name only mere thought fictions by whose means we address concrete particular things 2 Realism Abstracta have an independent existence as such

Critical Scientific Realism Ilkka Niiniluoto, 1999-12-09 Ilkka Niiniluoto comes to the rescue of scientific realism showing that reports of its death have been greatly exaggerated Philosophical realism holds that the aim of a particular discourse is to make true statements about its subject matter Niiniluoto surveys the different varieties of realism in ontology semantics epistemology theory construction and methodology He then sets out his own original version and defends it against competing theories in the philosophy of science Niiniluoto s critical scientific realism is founded upon the notion of truth as correspondence between language and reality and characterizes scientific progress in terms of increasing truthlikeness This makes it possible not only to take seriously but also to make precise the troublesome idea that scientific theories typically are false but nevertheless close to the truth

Realism and the Progress of Science Peter Smith, 1981-12-03 Preface Introduction 1 A realist account of scientific progress 2 The scrutability of reference 3 A theory of interpretation 4 Cluster theories of reference 5 The account in perspective Conclusion Bibliography Index
