Reason And World Between Tradition And Another Beginning

John J. Drummond

Reason And World Between Tradition And Another Beginning:

Introduction to Aristotle's Theory of Being as Being August Marx, 2013-11-21 Philosophy finds itself between tradition and another beginning 1 For this reason it seems necessary to reconsider the foundations of traditional philosophy in the hope that out of these considerations new questions may arise which may lead to a new philosophical foundation To this end neither the large manual nor the monograph is well suited What is required instead is to take a few steps which lead our thoughts directly into the problems of a given traditional philosophical foundation In this sense the present work wishes to provide an introduction into that philosophical foundation which until Hegel had a decisive influence upon traditional philosophy_ Consequently it does not see its task in providing a survey of this whole complex of problems Nor does it offer solutions to questions about difficult passages which have been the subject of two thousand years of Aristotelian scholarship_ Instead it follows a definite path which might bring this Aristotelian science the theory which seeks to determine being as being on he i on closer to the student of philosophy **Hegel and the History of Philosophy** J.J. O'Malley, K.W.

Algozin, F.G. Weiss, 2012-12-06 The papers published here were given at the second biennial conference of the Hegel Society of America held at the University of Notre Dame November 9 11 1972 They appear in an order which reflects roughly two headings 1 Hegel's conception of the history of philosophy in general and 2 his relation to individual thinkers both before and after him Given the importance of the history of philosophy for Hegel and the far reaching impact of his thought upon subsequent philosophy it becomes immediately apparent that we have here only a beginning At the conference cries went up Why not Hegel and Aristotle Aquinas Husserl and Hartmann Indeed why not The answer of course might be given by Hegel himself if we wish to accomplish anything we have to limit ourselves We trust that future conferences and scholarship will bring to light these relationships and the many more which testify to Hegel's profound presence in the mainstream of past and present thought It is furthermore no accident that the renaissance of Hegelian studies has brought with it a rebirth of the history of philosophy as something relevant to our own problems For Hegel the object of philosophy is alone the truth the history of philosophy is philosophy itself and this truth which it gives us cannot be what has passed away *Historical Dictionary of Husserl's Philosophy* John J. Drummond, 2022-03-14 Edmund Husserl is generally regarded as the founding figure of the philosophical movement of phenomenology by which he understands a descriptive science of the essential structures of experiences and of their objects precisely as these are experienced Phenomenology has had a decisive influence on philosophy in the 20th century especially in Europe The movement known as continental philosophy whether practiced in Europe or elsewhere has its roots in phenomenology and in the post Hegelian philosophies of Søren Kierkegaard Friedrich Nietzsche and Karl Marx *Historical Dictionary of Husserl's Philosophy* Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has more than 600 cross referenced entries on his key concepts and major writings as well as entries on his most important predecessors contemporaries and successors This book is an

excellent resource for students researchers and anyone wanting to know more about Edmund Husserl *Is There a Measure on Earth?* Werner Marx, 1987-04 The search for an ethics rooted in human experience is the crux of this deeply compassionate work here translated from the 1983 German edition Distinguished philosopher Werner Marx provides a close reading critique and Weiterdenken or further thinking of Martin Heidegger's later work on death language and poetry which has often been dismissed as both obscure and obscurantist In it Marx seeks and perhaps finds both a measure for distinguishing between good and evil and a motive for preferring the former The poet Holderlin posed the question Is there a measure on earth His own answer was emphatic There is none for he was convinced that the measure for man was to be found only in the domain of the heavenly beings Such metaphysical assumptions as well as the attempt to found ethical conduct in the nature of man as a rational being have been rejected by many contemporary thinkers particularly Heidegger Yet these thinkers have not been able to provide a satisfactory alternative to metaphysical foundations of the standards for responsible human conduct Marx therefore goes beyond Heidegger in demonstrating how several of his most basic notions could be relevant to a secular morality in our age It is death Marx claims that unsettles man and transforms his conduct toward his fellow man the common experience of mortality nourishes ethical life and leads to the measures of compassion love and recognition of one's fellow human beings It is only on the basis of these traditional virtues Marx writes that we can find a motive for averting the impending dangers which have often enough been described so vividly and convincingly

Seditions Heribert Boeder, 1997-06-30 This is the first book length work by Heribert Boeder to appear in English The essays brought together here several of which are to be found only in this volume bear witness to a new perspective on metaphysics modernity and so called postmodernity The seditiousness of Boeder's undertaking lies in his twofold intention to explicate what has been thought in metaphysics modernity and postmodernity as self contained rational totalities as history world and speech respectively and by means of those explications to recover dwelling as it has been made visible in the configurations of wisdom for example in Homer Paul and Holderlin He approaches each of these totalities by way of Heidegger's thought which marks the limit of modernity and as such is pivotal to Boeder's enterprise **Edmund Husserl and His Critics, an International Bibliography (1894-1979)** François Lapointe, 1980 *Towards a Phenomenological Ethics* Werner Marx, 1992-10-14 This book investigates the possibility of a contemporary ethics of compassion based upon the experience of human mortality During an age in which the traditional metaphysical guarantors of order transcendent sources of meaning and appeals to human rationality are becoming historical phenomena it is important to investigate whether an alternative source of measure for human conduct can be discovered through phenomenological analysis Marx shows how a confrontation with one's mortality as a basic condition of human existence which is ignored or actively avoided for the most part can transform a person's attitude from one of indifference to one of active concern for other human beings how it can heighten one's awareness of the social nature of human existence and how it can serve as an integrative force in the various

spheres of human life The transformation Marx outlines depends not upon deliberation and conscious decision or upon a demand to conform to formal rules or maxims but rather upon a change in one's emotional attunement toward others out of which a more compassionate conduct emerges almost automatically He shows how the awareness of one's limitations and dependencies as a mortal can raise sociality to an important and pervasive factor in human existence instead of a merely unpleasant or indifferent fact Marx also shows how the development of the notion of world as a sphere of human concerns has been accompanied by a deterioration of the traditional idea of the world as a seamless unity or an integrated whole and he points out that a transformed ethical awareness of others as fellow mortals helps provide a unifying meaning to the disparate worlds in which we all live

Materialism and Social Inquiry in the Continental Tradition in Philosophy

Andrew M. Koch, 2017-08-04 The continental tradition in philosophy has gotten more materialistic over the last two hundred years This has resulted from a combination of some very specific moves with regard to the epistemological parameters of understanding and the assertion that ideas may have material force in history Therefore the materialism within the continental tradition is not a materiality of being but a materiality of understanding and action Such an inquiry opens up space between the activities of sensation and the mental faculty of cognition I think therefore I am is not an empirical statement but a statement of cognition It is assumed that this distinction is at the core of continental philosophy Cognition is always interpretive Experience is the start of cognition but not its final product Our cognitions cannot be separated from our experience of the physical social and cultural environment around us The symbolic nature of language reinforces the interpretive nature of our thoughts and ideas Our language is therefore always projecting an implicit image of the world Language is therefore always political The materiality of these cognitive world views is manifested in two ways First in their formation They are the products of sensual contact with the world Second in their effects They move people It is a picture of the world which serves to shape the content and character of human behavior Whether we want to call these phantoms of the mind world view ideas thoughts cognitions or any other term the dual character of their materiality is secure This work examines the threads materialist ideas running through the efforts of some major authors in the continental tradition in philosophy A model of materialism is constructed in Chapter One and used to assess the materialist elements in works from Kant Marx Weber Nietzsche and contemporary poststructuralism The work demonstrates the evolution of materialist thinking within the tradition and asserts an evolving and developing articulation of materialism in relation to the thoughts and activities of human beings

Jewish Liturgical Reasoning

Steven Kepnes, 2007-11-01 Liturgy a complex interweaving of word text song and behavior is a central fixture of religious life in the Jewish tradition It is unique in that it is performed and not merely thought Because liturgy is performed by a specific group at a specific time and place it is mutable Thus liturgical reasoning is always new and understandings of liturgical practices are always evolving Liturgy is neither preexisting nor static it is discovered and revealed in every liturgical performance Jewish Liturgical Reasoning is an attempt

to articulate the internal patterns of philosophical ethical and theological reasoning that are at work in synagogue liturgies This book discusses the relationship between internal Jewish liturgical reasoning and the variety of external philosophical and theological forms of reasoning that have been developed in modern and post liberal Jewish philosophy Steven Kepnes argues that liturgical reasoning can reorient Jewish philosophy and provide it with new tools new terms of discourse and analysis and a new sensibility for the twenty first century The formal philosophical study of Jewish liturgy began with Moses Mendelssohn and the modern Jewish philosophers Thus the book focuses in its first chapters on the liturgical reasoning of Moses Mendelssohn Hermann Cohen and Franz Rosenzweig However it attempts to augment and further develop the liturgical reasoning of these figures with methods of study from Hermeneutics Semiotic theory post liberal theology anthropology and performance theory These newer theories are enlisted to help form a contemporary liturgical reasoning that can respond to such events as the Holocaust the establishment of the State of Israel and interfaith dialogue between Jews Christians and Muslims

Creatures of Attention Johannes Wankhammer, 2024-06-15 *Creatures of Attention* excavates the early modern prehistory of our late modern crises of attention At the threshold of modernity philosophers scientists and poets across Europe began to see attention as the key to autonomous agency and knowledge Recovering the philosophical and literary works from eighteenth century Germany in which attention subject and aesthetics developed their modern meanings Johannes Wankhammer examines control over attention as the cultural technique underpinning the ideal of individual autonomy Aesthetics founded by Alexander Baumgarten as a science of sense perception challenged this ideal by reframing art as a catalyst for alternative modes of selfhood and attention While previous scholarship on the history of attention emphasized the erosion of subjectivity by industrial or technological modernization Wankhammer asks how attention came to define subjectivity in the first place When periodically recurring crises of attention threaten the coherence of the subject the subject comes undone at the very seams that first sutured it together *Creatures of Attention* offers the first systematic study of a foundational discourse on attention from 1650 to 1780 Presenting pre Kantian aesthetics as a critique of the Enlightenment paradigm of strained attention the book offers a fresh perspective on poetics and aesthetics in eighteenth century Germany
