Sharpening Writing Skills , The Core Leigh A. Bortins, 2025-10-16 In the past correct spelling the multiplication tables the names of the state capitals and the American presidents were basics that all children were taught in school Today many children graduate without this essential knowledge Most curricula today follow a haphazard sampling of topics with a focus on political correctness instead of teaching students how to study Leigh Bortins a leading figure in the homeschooling community is having none of it She believes that there are core areas of knowledge that are essential to master Without knowing the multiplication tables children can t advance to algebra Without mastery of grammar students will have difficulty expressing themselves Without these essential building blocks of knowledge students may remember information but they will never possess a broad and deep understanding of how the world works In The Core Bortins gives parents the tools and methodology to implement a rigorous thorough and broad curriculum based on the classical model including Rote memorization to cement knowledge Systematic learning of geography historical facts and timelines Reading the great books and seminal historical documents instead of adaptations and abridged editions Rigorous training in math and the natural sciences

Fictions of Integration Naomi Lesley, 2017-03-03 This book examines how children s and young adult literature addresses and interrogates the legacies of American school desegregation Such literature narrates not only the famous battles to implement desegregation

in the South in places like Little Rock Arkansas but also more insidious and less visible legacies such as re segregation within schools through the mechanism of disability diagnosis Novelizations of children s experiences with school desegregation comment upon the politics of getting African American children access to white schools but more than this as school stories they also comment upon how structural racism operates in the classroom and mutates over the course of decades through the pedagogical practices depicted in literature for young readers Lesley combines approaches from critical race theory disability studies and educational philosophy in order to investigate how the educational market simultaneously constrains how racism in schools can be presented to young readers and also provides channels for radical critiques of pedagogy and visions of alternative systems The volume examines a range of titles from novels that directly engage the Brown v Board of Education decision such as Sharon Draper s *Fire From the Rock* and Dorothy Sterling s *Mary Jane* to novels that engage less obvious legacies of desegregation such as Cynthia Voigt s *Dacey s Song* Sharon Flake s *Pinned* Virginia Hamilton s *The Planet of Junior Brown* and Louis Sachar s *Holes* This book will be of interest to scholars of American studies children s literature and educational philosophy and history
