*Recent Trends in Biotechnology* M.K. Rai,N.J. Chikhake,P.V. Thakare,P.A. Wadegaonkar,A.P. Ramteke,2004-09-01

Biotechnology is an emerging field and has been the center of attraction for researchers politicians and common people globally The present proceedings *Recent Trends in Biotechnology* as the name signify reflects an interdisciplinary approach and status of the technology The book would be useful for readers of diverse disciplines including biotechnologists botanists zoologists pharmacologists bioinformatist and people loving the new technology *Recent Trends in Biotechnology and Therapeutic Applications of Medicinal Plants* Mohd. Shahid,Anwar Shahzad,Abida Malik,Aastha Sahai,2013-05-13 The book provides an overview of current trends in biotechnology and medicinal plant sciences The work includes detailed chapters on various advance biotechnological tools involved in production of phytoactive compounds of medicinal significance Some recent and novel research studies on therapeutic applications of different medicinal plants from various geographical regions of the world have also been included These studies report the antimicrobial activity of various natural plant products against various pathogenic microbial strains Informative chapters on recent emerging applications of plant products such as source for nutraceuticals and vaccines have been integrated to cover latest advances in the field This book also explores the conservation aspect of medicinal plants Thus chapters having comprehensively complied in vitro conservation protocols for various commercially important rare threatened and endangered medicinal plants were provided in the present book

**Biotechnology: Recent Trends and Emerging Dimensions** Atul Bhargava,Shilpi Srivastava,2017-11-22

Biotechnology is a multidisciplinary field encompassing microbiology bichemistry genetics molecular biology chemistry immunology cell and tissue culture physiology This book describes the recent developments in these areas Current research topics such as Quorum sensing Integrins Phytomining are discussed which would serve as an excellent reference work for both academicians and researchers in the field *Agricultural Biotechnology: Latest Research and Trends* Dinesh Kumar Srivastava,Ajay Kumar Thakur,Pankaj Kumar,2022-01-08 This book caters to the need of researchers working in the ever evolving field of agricultural biotechnology It discusses and provides in depth information about latest advancements happening in this field The book discusses evolution of plant tissue culture techniques development of doubled haploids technology role of recombinant DNA technology in crop improvement It also provides an insight into the global status of genetically modified crops use of RNAi technology and mi RNAs in plant improvement Chapters are also dedicated for different branches of omics science including genomics bioinformatics proteomics metabolomics and phenomics along with the use of molecular markers in tagging and mapping of various genes QTLs of agronomic importance This book also covers the role of enzymes and microbes in agriculture in productivity enhancement It is of interest to teachers researchers of biotechnology and agriculture scientists Also the book serves as additional reading material for undergraduate and postgraduate students of biotechnology agriculture horticulture forestry ecology soil science and environmental sciences

National and international biotechnologists and agricultural scientists will also find this to be a useful read *New Trends in Biotechnology* Nanjappa Shamanna Subba Rao,1992 **Current Trends in Microbial Biotechnology for Sustainable**

**Agriculture** Ajar Nath Yadav,Joginder Singh,Chhatarpal Singh,Neelam Yadav,2020-11-10 Microbial biotechnology is an emerging field with applications in a broad range of sectors involving food security human nutrition plant protection and overall basic research in the agricultural sciences The environment has been sustaining the burden of mankind from time immemorial and our indiscriminate use of its resources has led to the degradation of the climate loss of soil fertility and the need for sustainable strategies The major focus in the coming decades will be on achieving a green and clean environment by utilizing soil and plant associated beneficial microbial communities Plant microbe interactions include the association of microbes with plant systems epiphytic endophytic and rhizospheric The microbes associated with plant ecosystems play an important role in plant growth development and soil health Moreover soil and plant microbiomes help to promote plant growth either directly or indirectly by means of plant growth promoting mechanisms e g the release of plant growth regulators solubilization of phosphorus potassium and zinc biological nitrogen fixation or by producing siderophores ammonia HCN and other secondary metabolites These beneficial microbial communities represent a novel and promising solution for agro environmental sustainability by providing biofertilizers bioprotectants and biostimulants in addition to mitigating various types of abiotic stress in plants This book focuses on plant microbe interactions the biodiversity of soil and plant microbiomes and their role in plant growth and soil health Accordingly it will be immensely useful to readers working in the biological sciences especially microbiologists biochemists and microbial biotechnologists *Recent Trends in*

*Biotechnology* M. P. Singh,Anju Agrawal,Bechan Sharma,2011-09-26 The revolution in technology has led to the emergence of biotechnology which is one of the most rapidly moving branches of science and holds a lot of promises and surprises for the present and future Spread over fourteen chapters the book starts with ageing followed by application of RNAi and then moves to transcription regulation of plant genes The book focuses upon the latest research and developments in diverse areas like vaccines chemistry biology interphase application of bioinformatics tools enzyme technology and mycoremediation philosophical implication of biotechnology and genetic diversity in Indian populations **Recent Trends in Horticultural**

**Biotechnology** R. Keshavachandran,2007-01-21 Biotechnology is emerging as one of the most innovative technologies in life sciences and is influencing almost every aspect of human life It provides a set of tools which if appropriately integrated with other technologies can be applied for the sustainable development of agriculture Tissue culture is being used to propagate rapidly difficult to root crops and conserve endangered rare medicinal plants PCR technology has made it possible to fingerprint genotypes and understand better their genetic relationship Genetic transformation through direct and vector mediated gene transfer now makes it possible to incorporate novel genes for desirable traits The various bioinformatics tools help to interpret the complex data available from biological experiments the book has two volumes divided into 8 sections

comprising of more than 140 research articles and papers      **Biowarfare lessons, emerging biosecurity issues, and ways to monitor dual-use biotechnology trends in the future** ,      Recent Trends in Mycological Research Ajar Nath Yadav, 2021-04-14 Fungi range from being microscopic single celled yeasts to multicellular and heterotrophic in nature Fungal communities have been found in vast ranges of environmental conditions They can be associated with plants epiphytically endophytically or rhizospherically Extreme environments represent unique ecosystems that harbor novel biodiversity of fungal communities Interest in the exploration of fungal diversity has been spurred by the fact that fungi perform numerous functions integral in sustaining the biosphere ranging from nutrient cycling to environmental detoxification which involves processes like augmentation supplementation and recycling of plant nutrients a particularly important process in sustainable agriculture Fungal communities from natural and extreme habitats help promote plant growth enhance crop yield and soil fertility via direct or indirect plant growth promoting PGP mechanisms of solubilization of phosphorus potassium and zinc production of ammonia hydrogen cyanides phytohormones Fe chelating compounds extracellular hydrolytic enzymes and bioactive secondary metabolites These PGP fungi could be used as biofertilizers bioinoculants and biocontrol agents in place of chemical fertilizers and pesticides in eco friendly manners for sustainable agriculture and environments Along with agricultural applications medically important fungi play significant role for human health Fungal communities are useful for sustainable environments as they are used for bioremediation which is the use of microorganisms metabolism to degrading waste contaminants sewage domestic and industrial effluents into non toxic or less toxic materials by natural biological processes Fungi could be used as mycoremediation for the future of environmental sustainability Fungi and fungal products have the biochemical and ecological capability to degrade environmental organic chemicals and to decrease the risk associated with metals semi metals and noble metals either by chemical modification or by manipulating chemical bioavailability The two volumes of Recent Trends in Mycological Research aim to provide an understanding of fungal communities from diverse environmental habitats and their potential applications in agriculture medical environments and industry The books are useful to scientists researchers and students involved in microbiology biotechnology agriculture molecular biology environmental biology and related subjects
