Exotic Visions in Marketing Theory and

Practice Alf H. Walle, 2001-12-30 An anthropologist folklorist and literary critic besides being a marketing professor Alf H Walle takes a refreshingly interdisciplinary look at the impact of modern social thought upon marketing and social research Tracing key ideas back to their intellectual roots Walle shows how the evolution of social theory and the controversies it has engendered can and should transform the way marketers approach consumers He provides a theoretic underpinning for qualitative consumer research and presents a lucid theoretical and methodological overview for qualitative methods in marketing research that parallels what others such as Shelby Hunt have provided for scientific methods in marketing His book is a provocative thoughtful and probing study of qualitative social theory and its important contributions to marketing and consumer research It is of value to both practitioners and academics Arguing that the social structural methods have been largely ignored Walle rehabilitates this general method and compares it to poststructural alternatives Walle shows that to understand the evolution of modern social theory one must come to grips with the work of three towering pioneers Immanuel Kant Friedrich Hegel and Karl Marx and that researchers must understand and appreciate the contributions and influence of pioneers in order to avoid the myopic vision of our own time Praising Hegel's metaphor of cultures as living organisms and his forging of the concept we now call National Character Walle points to Hegel as the pioneering social structuralist and as the man who as a negative example inspired the poststructuralists to action Walle ends with a well reasoned analysis of poststructural thought in marketing consumer research and suggests that conflict theory an alternative to poststructural methods that evolved from social structural roots is often more appropriate than poststructural analysis in marketing and consumer research Relating both conflict theory and poststructural analysis to the actual needs of marketing consumer researchers *Exotic Visions in Marketing Theory and Practice* provides unique practical insights for those who teach market research as well as practitioners who pursue it for a living

Claude Levi-Strauss David Pace, 2015-07-03 L vi Strauss is one of the intellectual giants of the twentieth century yet he is a very private and isolated figure who has been reticent about himself This book first published in 1983 provides a fascinating insight into his character through a careful reading of the more speculative passages of his books and interviews His personal existential and psychological orientation is explored through a structural analysis of *Tristes Tropiques* his most personal book and his writings on art nature and civilization and through a consideration of his debt to Rousseau Dr Pace examines in depth L vi Strauss's critique of cultural evolutionism and his attack on the notion of world history He assesses the political implications of L vi Strauss's own interpretation of human progress through an examination of his debates with Sartre and other Marxists in the 1950s and 1960s and his subsequent movement to the right The author's concern throughout is to place the world view of this great French anthropologist in the context of twentieth century intellectuals struggle to come to grips with cultural relativism and the problem of the primitive

The Transformation of the Southeastern Indians, 1540-1760 Robbie Ethridge, Charles Hudson, 2010-12-01 With essays by Stephen Davis Penelope Drooker Patricia K Galloway Steven Hahn Charles Hudson

Marvin Jeter Paul Kelton Timothy Pertulla Christopher Rodning Helen Rountree Marvin T Smith and John Worth The first two hundred years of Western civilization in the Americas was a time when fundamental and sometimes catastrophic changes occurred in Native American communities in the South In *The Transformation of the Southeastern Indians 1540 1760* historians anthropologists and archaeologists provide perspectives on how this era shaped American Indian society for later generations and how it even affects these communities today This collection of essays presents the most current scholarship on the social history of the South identifying and examining the historical forces trends and events that were attendant to the formation of the Indians of the colonial South The essayists discuss how Southeastern Indian culture and society evolved They focus on such aspects as the introduction of European diseases to the New World long distance migration and relocation the influences of the Spanish mission system the effects of the English plantation system the northern fur trade of the English and the French Dutch and English trade of Indian slaves and deerskins in the South This book covers the full geographic and social scope of the Southeast including the indigenous peoples of Florida Virginia Maryland the Appalachian Mountains the Carolina Piedmont the Ohio Valley and the Central and Lower Mississippi Valleys

The Building of British Social Anthropology K. Langham, 2012-12-06 The nature of that transition to maturity a transition involving The acquisition of the sort of paradigm that identifies challenging puzzles supplies clues to their solution and guarantees that the truly clever practitioner will succeed deserves fuller discussion than it has received in this book particularly from those concerned with the development of the contemporary social sciences Thomas S Kuhn 1969 *Postscript to The Structure of Scientific Revolutions* The first two or three decades of the twentieth century represents a shadowy period in the history of science For most contemporary scientists the period is a little too far away to be the subject of a first hand oral tradition while at the same time it is not sufficiently remote to have acquired the epic and oversimplified contour of history which has been transformed into mythology Historians of science by contrast who want to free themselves from the mythology which is used to legitimize the present state of the discipline are interested in discovering what really happened and how it was regarded at the time For them the nature of science in the early twentieth century is obscured by what they regard as its proximity in time and they are disturbed by a general lack of depth in scholarly work in the area which makes it difficult to see the period in proper perspective

Relations of Production David Seddon, 2012-11-12 First Published in 1978 This book seeks to fill the gap of works in English that systematically deal with social and economic life in primitive tribal and peasant societies the main object of economic anthropology as of any branch of anthropology from a Marxist theoretical standpoint Using such relevant texts as Marx himself the *Pre Capitalist Economic Formations* which appeared in English in 1964 with an introduction by Eric Hobsbawm and that of Engels of which *The Origin of the Family Private Property and the State* *The Evolutionary History of Witch-hunting* Steije Hofhuis, 2024-12-06 Why did early modern Europeans hunt for witches Were these persecutions a shrewd tool to oppress women or the poor or were they just a way of making money Or were witch

hunters primarily driven by a genuine belief in witchcraft The witches sabbath the diabolical pact and the nightly flight were elements in the early modern concept of witchcraft that seem to have been intelligently designed to trigger persistent witch persecutions But in contrast to what many past historical scholars presumed witch hunts were not based on intelligent design So how to explain them This book proposes a new model Darwinian cultural evolution It contends that witch hunting s apparent design emerged from a hidden evolutionary process in which cultural variants which accidentally unleashed larger persecutions were cumulatively preserved Witch hunting did not so much evolve to serve human interests but to ensure its own selfish reproduction Historians have often compared witch persecutions to the outbreaks of contagious disease but only as a figure of speech But shouldn t we take the similarities more seriously This book argues that witch hunting was a cultural virus that spread at the expense of its human hosts and thus bridges the gap between qualitative history and the burgeoning field of Darwinian cultural evolution **Fifty Key Anthropologists** Robert Gordon, Harriet Lyons, Andrew Lyons, 2010-11-15

A survey of the life work ideas and impact of some of the most influential anthropologists from classic thinkers through to figures working now *Masks of Difference* David Richards, 1994 Writings about and depictions of savage peoples by conquering races as a form of textual practice **Studying Societies and Cultures** Lawrence A. Kuznar, Stephen K. Sanderson, 2015-12-03 A thought provoking stimulating volume on the past present and future of cultural materialism that is both laudatory of Harris research strategy and critical of it Paul Shankman University of Colorado One of the most important anthropologists of all time Marvin Harris was influential worldwide as the founder of cultural materialism This book accessibly analyzes Harris s theories and their important legacies today The chapters explore cultural materialism s epistemology and its relation to rational choice theory Darwinian social science and population pressures The authors assess recent attempts to extend and reformulate cultural materialism and highlight cross cultural archaeological and ethnographic applications of cultural materialism today **Rationality and Irrationality in Economics** Maurice Godelier, 2014-07-08

This book is the result of a research project begun by the author in 1958 with the aim of answering two questions First what is the rationality of the economic systems that appear and disappear throughout history in other words what is their hidden logic and the underlying necessity for them to exist or to have existed Second what are the conditions for a rational understanding of these systems in other words for a fully developed comparative economic science The field of investigation opened up by these two questions is vast touching on the foundations of social reality and on how to understand them The author being a Marxist sought the answers as he writes not in philosophy or by philosophical means but in and through examining the knowledge accumulated by the sciences The stages of his journey from philosophy to economics and then to anthropology are indicated by the divisions of his book Godelier rejects at the outset any attempt to tackle the question of rationality or irrationality of economic science and of economic realities from the angle of an a priori idea a speculative definition of what is rational Such an approach can yield only he feels an ideological result Rather he treats the appearance

and disappearance of social and economic systems in history as being governed by a necessity wholly internal to the concrete structures of social life **Anthropologica** ,2006 **The Bottom Line: Unfortunate Side Effects of Capitalist Culture**
Arthur McGovern,2020-10-06 This monograph explores the role of culture in modern societies and the side effects that result when that role is distorted The basic premise of this book is that many of the dominant cultural characteristics of modern life like the ideologies and values associated with materialism and consumer capitalism are cultural phenomena with influences that are in many ways problematic and in some ways downright detrimental to our sustained societal well being I argue in this book that the globalized capitalist economic system has become increasingly efficient in terms of scale and scope but has also become less humane in many regards less connected to human needs and concerns Of particular concern is the encroachment of economic interests into areas of human society that traditionally have been free from profit motives or at least only minimally influenced by them areas such as scientific research the justice system and even family relationships I suggest that there is a slow but steady intrusion into these areas of human life that were once considered off limits to naked economic incentives and calculations This intrusion puts the idea of America as a free and democratic society increasingly at risk when private economic stakeholders meddle in the political and cultural areas of society in ever more insidious ways to further their own enrichment at the expense of the public Furthermore the vast capitalist economic system is in many ways increasingly disconnected or disembedded from the contexts and regulations of traditional social relations as in the past
