When the Machine Made Art Grant D. Taylor, 2014-04-10 Considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s In fact no other twentieth century art form has elicited such a negative and hostile response When the Machine Made Art examines the cultural and critical response to computer art or what we refer to today as digital art Tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation Taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement

A Short Media History of English Literature Ingo Berensmeyer, 2022-08-01 This book explores the history of literature as a history of changing media and modes of communication from manuscript to print from the codex to the computer and from paper to digital platforms It argues that literature has evolved and continues to evolve in sync with material forms and formats that engage our senses in multiple ways Because literary experiences are embedded in and enabled by media the book focuses on literature as a changing combination of material and immaterial features The principal agents of this history are no longer genres authors and texts but configurations of media and technologies In telling the story of these combinations from prehistory to the present Ingo Berensmeyer distinguishes between three successive dominants of media usage that have shaped literary history performance representation and connection Using English literature as a test case for a long view of media history this book combines an unusual bird's eye view across periods with illuminating readings of key texts It will prove an invaluable resource for teaching and for independent study in English or comparative literature and media studies
