inquiry-based science camps Louise Bindel, 2018 Although various arguments for integrated learning of mathematics and science exist empirical evidence that integrated learning is as beneficial as anticipated is limited Therefore this quasi experimental study investigates the effect of integrated learning of mathematics and science on eight student variables by comparing it to a control group Results show that integrated learning is no miracle cure but has positive and negative effects on specific student outcomes Whereas integrated learning effects students view of the relation between mathematics and

science positively it effects students scientific self concept negatively Thus integrated learning should not substitute but rather complement disciplinary learning Obwohl zahlreiche Argumente f r das integrierte Lernen von Mathematik und Naturwissenschaften existieren ist die vorteilhafte Wirkung integrierten Lernens begrenzt empirisch belegt Im Rahmen dieser quasi experimentellen Studie wird der Effekt integrierten Lernens auf acht Sch lervariablen durch Vergleiche mit einer Kontrollgruppe untersucht Die Ergebnisse zeigen dass integriertes Lernen kein Allheilmittel ist sondern positive und negative Effekte auf bestimmte Sch lervariablen hat W hrend integriertes Lernen die Sicht der Sch lerinnen und Sch ler auf die Beziehung zwischen Mathematik und Naturwissenschaften positiv beeinflusst hat es einen negativen Effekt auf das naturwissenschaftliche Selbstkonzept Daher sollte integriertes Lernen nicht stellvertretend sondern erg nzend zu disziplin rem Lernen implementiert werden
