Mathematical Tools For Machine Technology:

Mathematical Tools for Machine Technology John D. Popowski, 1982-01-01 *Entropy Randomization in Machine Learning* Yuri S. Popkov, Alexey Yu. Popkov, Yuri A. Dubnov, 2022-08-09

Entropy Randomization in Machine Learning presents a new approach to machine learning entropy randomization to obtain optimal solutions under uncertainty uncertain data and models of the objects under study Randomized machine learning procedures involve models with random parameters and maximum entropy estimates of the probability density functions of the model parameters under balance conditions with measured data Optimality conditions are derived in the form of nonlinear equations with integral components A new numerical random search method is developed for solving these equations in a probabilistic sense Along with the theoretical foundations of randomized machine learning Entropy Randomization in Machine Learning considers several applications to binary classification modelling the dynamics of the Earth's population predicting seasonal electric load fluctuations of power supply systems and forecasting the thermokarst lakes area in Western Siberia Features A systematic presentation of the randomized machine learning problem from data processing through structuring randomized models and algorithmic procedure to the solution of applications relevant problems in different fields Provides new numerical methods for random global optimization and computation of multidimensional integrals A universal algorithm for randomized machine learning This book will appeal to undergraduates and postgraduates specializing in artificial intelligence and machine learning researchers and engineers involved in the development of applied machine learning systems and researchers of forecasting problems in various fields

Mathematical Tools for Data Mining Dan A. Simovici, Chaabane Djeraba, 2008-08-15 This volume was born from the experience of the authors as researchers and educators

which suggests that many students of data mining are handicapped in their research by the lack of a formal systematic education in its mathematics The data mining literature contains many excellent titles that address the needs of users with a variety of interests ranging from decision making to pattern investigation in biological data However these books do not deal with the mathematical tools that are currently needed by data mining researchers and doctoral students We felt it timely to produce a book that integrates the mathematics of data mining with its applications We emphasize that this book is about mathematical tools for data mining and not about data mining itself despite this a substantial amount of applications of mathematical concepts in data mining are presented The book is intended as a reference for the working data miner In our opinion three areas of mathematics are vital for data mining set theory including partially ordered sets and combinatorics linear algebra with its many applications in principal component analysis and neural networks and probability theory which plays a foundational role in statistics machine learning and data mining This volume is dedicated to the study of set theoretical foundations of data mining Two further volumes are contemplated that will cover linear algebra and probability theory The first part of this book dedicated to set theory begins with a study of functions and relations Application of these fundamental concepts to such issues as

equivalences and partitions are discussed Also we prepare the ground for the following volumes by discussing indicator functions elds and elds and other concepts

The Machines of Leonardo Da Vinci and Franz Reuleaux Francis C. Moon,2007-05-30 This fascinating book will be of as much interest to engineers as to art historians examining as it does the evolution of machine design methodology from the Renaissance to the Age of Machines in the 19th century It provides detailed analysis comparing design concepts of engineers of the 15th century Renaissance and the 19th century age of machines from a workshop tradition to the rational scientific discipline used today
