Using Information Technology in Mathematics Education James Tooke, Norma Henderson, 2024-11-15 Computers have changed the ways that mathematics are taught and learned Is your institution taking advantage of what today's technology offers With contributions from researchers and practitioners alike Using Information Technology in Mathematics Education explores the impact of the computer on the curriculum the teaching and learning of mathematics and the professional development of teachers both pre service and in service As editor James Tooke states The connection between mathematics and the computer is obvious Elementary notions of mathematics gave rise to the computer advanced notions gave it a more powerful state As the computer advanced it expanded mathematics allowing the creation of further branches of the field for instance fractal geometry had no reality until the advent of high speed computers In its look at the relationship between mathematics the computer and mathematics education Using Information Technology in Mathematics Education addresses the computer as a vehicle for teaching calculus at Texas A M includes reports from several programs that have utilized the computer when teaching mathematics at lower levels of content than calculus such as intermediate algebra and geometry examines the computer's role in student learning probability discusses the use of computers in the professional development of teachers explores ways to use computers to reduce mathematics anxiety Using Information Technology in Mathematics Education examines the history and impact of computers in mathematics and mathematics education from the early crude computer assisted instruction efforts through LOGO software for elementary schools through MAPLE for the university to the Web based calculus courses now being offered by outstanding universities Use it to facilitate learning and teacher growth in your institution

Intelligent Computer Mathematics Jacques Carette, Lucas Dixon, Claudio Sacerdoti Coen, Stephen Watt, 2009-07-06 As computers and communications technology advance greater opportunities arise for intelligent mathematical computation While computer algebra automated deduction and mathematical publishing each have long and successful histories we are now seeing increasing opportunities for synergy among them The Conferences on Intelligent Computer Mathematics cicm 2009 is a collection of co located meetings allowing researchers and practitioners active in these related areas to share recent results and identify the next challenges The specific areas of the cicm conferences and workshops are described below but the unifying theme is the computerized handling of mathematical knowledge The successful formalization of much of mathematics as well as a better understanding of its internal structure makes mathematical knowledge in many ways more tractable than general knowledge as traditionally treated in artificial intelligence Similarly we can also expect the problem of effectively using mathematical knowledge in automated ways to be much more tractable This is the goal of the work in the cicm conferences and workshops In the long view solving the problems

addressed by cicm is an important milestone in formulating the next generation of mathematical software
