Mathematics in Action series is based on the assumption that students learn mathematics best by doing mathematics in a meaningful context. Therefore the text takes a collaborative approach to learning. Students take an active role in their own learning by working in groups, thereby developing communication skills, a sense of independence, and a can-do attitude about mathematics. Technology is integrated throughout the book so that students learn to interpret real-life data numerically, symbolically, and graphically. This text increases their knowledge of mathematics, their problem-solving skills, and their overall confidence in their ability to learn.

Mathematics in Action - - Consortium, 2014-12-24 In the Mathematics in Action series, students discover mathematical concepts through activities and applications that demonstrate how math applies to their everyday lives. Different from most math books, this series teaches through activities encouraging students to learn by constructing, reflecting on, and applying the mathematical concepts. The user-friendly approach instills confidence in even the most reticent math students and shows them how to interpret data algebraically, numerically, symbolically, and graphically. The active style develops mathematical literacy and critical thinking skills. Updated examples, brand new exercises, and a clearer presentation make the Fifth Edition of this text more relevant than ever to today's students. Note: You are purchasing a standalone product.
