The Yugoslav Economic System (Routledge Revivals) Branko Horvat, 2016-05-20 First published in 1976 this book traces the development of the Yugoslav economy from the end of the Second World War to the beginning of 1975 which the author argues was a highly productive era of social innovation Drawing on personal experience of the Revolution the Partisan Liberation War and his time as a member of the Federal Planning Board as well as a comprehensive array of written sources the author attempts to understand the development process compare policy proclamations with achieved results study the theories and ideas that led to certain policy distinguish the economic and political ingredients in decision making and analyses the causes of success and failure *The Economy of Yugoslavia* Fred Singleton, Bernard Carter, 2025-05-01 The creation of the Yugoslav state at the end of the First World War brought together the half assimilated remains of several societies in various stages of development each with centuries of rule by foreign powers It was not until the Second World War when a fresh start was made under a new revolutionary regime that Yugoslavia made substantial economic headway and progressed from an underdeveloped country to a medium rank level of development First published in 1982 The Economy of Yugoslavia charts the progress of the Yugoslav economy over sixty years and demonstrates how it achieved rapid quantitative progress in the post war period The book also shows how Yugoslavia's own brand of modified socialist planning succeeded in some areas but did not obviate many of the problems such as inflation and unemployment which have been so familiar to western societies The great strength of the book is that it does not discuss the economy in isolation from the many non economic factors which did so much to shape Yugoslavia's society This book will be of interest to students and researchers of history and economics **Collected Works of Domenico Mario Nuti, Volume I** Saul Estrin, Milica Uvalic, 2023-05-20 This book the first of two volumes brings together the work of Domenico Mario Nuti to highlight his significant and varied contribution to economics Bringing together works from across Nuti's career his distinctive intellectual framework is exemplified in relation to discussions on the drivers of economic growth and development the most efficient economic system the organisation of firms and how economies should be managed This volume gives particular attention to socialist economic systems and the transition of former socialist countries to market economies This book through the inclusion of an introduction aims to contextualise his ideas and illustrate their continued relevance It will be of wide interest to students and researchers Yugoslavia David A Dyker, 2013-12-19 This book first published in 1990 analyses contemporary Yugoslavian development strategy in its historical and political context assessing how corruption negligence and an emphasis on industry to the detriment of agriculture and trade have all played a part in bringing Yugoslavia close to financial and political chaos

The book concludes by considering the contemporary prospects for a more integrated policy approach in the midst of the country's political crisis

Balkan Economic History, 1550-1950 John R. Lampe, Marvin R. Jackson, 1982-06-22 Western economic historians have traditionally concentrated on the success stories of major developed economies while development economists have given most of their attention to the problems of the Third World. The authors of this pioneering work study a part of Europe neglected by both approaches. Modernizing patterns in Balkan economic history are traced from the sixteenth century when the territory was shared by Ottoman and Habsburg empires through the nineteenth century when they emerged as independent states to the end of World War II and its aftermath. Despite present differences in economic systems—Greece's private market economy, Yugoslavia's planned market economy and the centrally planned economies of Romania, Bulgaria, and Albania—the authors find that shared origins and common subsequent experiences are ample justifications for treating the area as an economic unit. *Balkan Economic History 1550-1950* will be a major case study for development economists and will provide historians with the first analytical and statistical study to survey the entire region from the start of the early modern period.

Self-Management Saul Estrin, 2010-06-24 Offers a comprehensive survey of how workers' self-management has influenced industrial structure and the allocation of resources in Yugoslavia.
