Network Europe And The Information Society:

The Information Society in Europe Ken Ducatel, Juliet Webster, Werner Herrmann, 2000 This text offers an examination of a range of technological issues at stake in the European Union It discerns social trends but finds there is considerable room to use the technologies as a force for social change

The Rise of The Network Society Manuel Castells, 2000-08-15 This book the first in Castells ground breaking trilogy is an account of the economic and social dynamics of the new age of information Based on research in the USA Asia Latin America and Europe it aims to formulate a systematic theory of the information society which takes account of the fundamental effects of information technology on the contemporary world

European Modernism and the Information Society W. Boyd Rayward, 2017-05-15 Uniting a team of international and interdisciplinary scholars this volume considers the views of early twentieth century European thinkers on the creation dissemination and management of publicly available information Interdisciplinary in perspective the volume reflects the nature of the thinkers discussed including Otto Neurath Patrick Geddes the English Fabians Paul Otlet Wilhelm Ostwald and H G Wells The work also charts the interest since the latter part of the nineteenth century in finding new ways to think about and to manage the growing body of available information in order to achieve aims such as the advancement of Western civilization the alleviation of inequalities across classes and countries and the promotion of peaceful coexistence between nations In doing so the contributors provide a novel historical context for assessing widely held assumptions about today s globalized post modern information society This volume will interest all who are curious about the creation of a modern networked information society

Information Society Karamjit S. Gill, 2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one s intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson

Castells,Pekka Himanen,2014-08-28 The conditions in which development the process by which people individually and collectively enhance their capacities to improve their lives according to their values and interests operates have significantly changed in the global information age a period characterized by the technological revolution in information and communication the rise of the networking form of social organization and the global interdependence of economies and societies This volume aims to redefine the means and goals of development in this new context first by characterizing the specific mode of development informational development that the authors consider to be the driver of the creation of material wealth in the twenty first century secondly by reconceptualizing human development as the fulfilment of human wellbeing in the multidimensionality of the human experience ultimately affirming dignity as the supreme value of development thirdly by examining the relationship between informational development and human development After first setting out its analytical framework the book brings together a diverse set of empirically rich case studies to illustrate this investigation from across the globe Silicon Valley Costa Rica Chile South Africa Finland the European Union and China and concludes by attempting to reconceptualize development It raises important questions and provides observations including examining the concept of dignity as development to contribute to a policy debate that should provide specific answers linked to the conditions of each society and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time

Mapping the European Public Sphere Emanuela Bozzini,2016-05-13 Mapping the European Public Sphere combines theoretical and empirical perspectives to address three relevant issues that are marking the European communicative landscape the role of media and journalism in shaping the European debate the function of public communication in promoting institutional activities and the implications of processes of inclusion to and exclusion from the public sphere The volume offers a timely reflection on the communicative arenas that are structuring the discourse on Europe and its future and provides a map of existing communicative spaces to provide a better understanding of the development of a European Public Sphere and to identify critical issues Situated in a timely debate and providing well grounded empirical evidence the book will be particularly valuable to social scientists researching European integration issues At the same time the book is relevant to those actors who are studied in the research in particular European institutions media groups and NGOs

Perspectives and Policies on ICT in Society Jacques Berleur,Chrisanthi Avgerou,2006-01-20 Governments the media the information technology industry and scientists publicly argue that information and communication technologies ICT will bring about an inevitable transition from industrial to information or knowledge based economies and societies It is assumed that all aspects of our economic and social lives in both the public and private spheres will be radically different from what they are today The World Summit on the Information Society Geneva 2003 Tunis 2005 shows the importance of a worldwide reflection on those topics Perspectives and Policies on ICT in Society explores the ICT policies of different nations and regions such as Africa China Europe and India The authors assess the arguments surrounding the impending new age as well

as some of the more sensitive issues of its developments This progress will signal an expansion of ICT in many domains the so called ubiquity such as in the workplace the home government and education and it will affect privacy and professional ethics The expansion will also encompass all parts of the earth particularly developing countries Such growth must take place in the context of historical dimensions and should underscore the accountability of professionals in the field The intent of this book is to address these issues and to serve as a handbook of IFIP s TC9 Computers and Society committee Thirty authors from twelve countries consider the ICT policies with their associated perspectives and they explore what may be the information age and the digital society of tomorrow The book provides reflection on today s complex society and addresses the uncertain developments rising from an increasingly global and technologically connected world Jacques Berleur is at the University of Namur Belgium and Chrisanthi Avgerou at the London School of Economics United Kingdom European Economic and Political Issues Frank H.
