Edited by  
Trevor Watkins

The technical complexities of C-14 dating can baffle archaeologists.

This book unravels their reason.  
It is by specialists for non-specialists.

The realization that the production  
rate of C-14 in the atmosphere was  
not constant undermined the  
assumption that C-14 years could be  
equated with calendar years.

Correction by calibration with  
cross-dated tree-ring radio-  
carbon samples offers hope, but  
creates "intercession curves" of  
baffling variety.

This book explains the issues clearly  
and simply, provides valuable  
comparative data, assesses the  
reliability of the methods, tells  
how to take a sample, and  
its use in the dating.

The Prehistory of Texas Timothy K. Perttula,2012-09-24 Paleoindians first arrived in Texas more than eleven thousand years ago although relatively few sites of such early peoples have been discovered Texas has a substantial post Paleoindian record however and there are more than fifty thousand prehistoric archaeological sites identified across the state This comprehensive volume explores in detail the varied experience of native peoples who lived on this land in prehistoric times Chapters on each of the regions offer cutting edge research the culmination of years of work by dozens of the most knowledgeable experts Based on the archaeological record the discussion of the earliest inhabitants includes a reclassification of all known Paleoindian projectile point types and establishes a chronology for the various occupations The archaeological data from across the state of Texas also allow authors to trace technological changes over time the development of intensive fishing and shellfish collecting funerary customs and the belief systems they represented long term changes in settlement mobility and character landscape use and the eventual development of agricultural societies The studies bring the prehistory of Texas Indians all the way up through the Late Prehistoric period ca a d 700 1600 The extensively illustrated chapters are broadly cultural historical in nature but stay strongly focused on important current research problems Taken together they present careful and exhaustive considerations of the full archaeological and paleoenvironmental record of Texas      *Down the Bright Stream: The Prehistory of Woodcock Corner and the Tregurra*

*Valley, Cornwall* Sean R. Taylor,2022-06-23 This volume reports on a series of fieldwork projects carried out in the Tregurra Valley to the east of Truro Cornwall between 2009 2015 The fieldwork led to the identification of a large number of pits and hearths across the site the majority of which that have proved dateable spanning the Early Neolithic to the end of the Early Bronze Age      Time, Space, and Transition in Anasazi Prehistory Michael S. Berry,1982      **Prehistoric Britain** Timothy Darvill,2010-07-02 Britain has been inhabited by humans for over half a million years during which time there were a great many changes in lifestyles and in the surrounding landscape This book now in its second edition examines the development of human societies in Britain from earliest times to the Roman conquest of AD 43 as revealed by archaeological evidence Special attention is given to six themes which are traced through prehistory subsistence technology ritual trade society and population Prehistoric Britain begins by introducing the background to prehistoric studies in Britain presenting it in terms of the development of interest in the subject and the changes wrought by new techniques such as radiocarbon dating and new

theories such as the emphasis on social archaeology The central sections trace the development of society from the hunter gatherer groups of the last Ice Age through the adoption of farming the introduction of metalworking and on to the rise of highly organized societies living on the fringes of the mighty Roman Empire in the 1st century AD Throughout emphasis is given to documenting and explaining changes within these prehistoric communities and to exploring the regional variations found in Britain In this way the wealth of evidence that can be seen in the countryside and in our museums is placed firmly in its proper context It concludes with a review of the effects of prehistoric communities on life today With over 120 illustrations this is a unique review of Britain s ancient past as revealed by modern archaeology The revisions and updates to Prehistoric Britain ensure that this will continue to be the most comprehensive and authoritative account of British prehistory for those students and interested readers studying the subject

**World Prehistory and Archaeology** Michael Chazan,2021-04-30 World Prehistory and Archaeology provides an integrated discussion of world prehistory and archaeological methods presenting an up to date perspective on what we know about our human prehistory and how we come to know it A cornerstone of World Prehistory and Archaeology is the discussion of prehistory as an active process of discovery Methodological issues are addressed throughout the text to engage readers Archaeological methods are introduced following which the question of how we know the past is discussed This fifth edition involves readers in the current state of archaeological research revealing how archaeologists work and interpret what they find Through the coverage of various new research author Michael Chazan shows that archaeology is truly a global discipline In this edition there is a particular emphasis on the relevance of archaeology to contemporary society and to the major issues that face us today This edition will provide students with a necessary grounding in the fundamentals of archaeology before engaging them with the work that goes into understanding world prehistory They will be given the tools to place this knowledge in the context of the modern world acknowledging the relevance of archaeology to the concerns of today

*The Drowning of a Cornish Prehistoric Landscape* Andy M. Jones,Michael J. Allen,2023-06-01 Between 2018 and 2019 Cornwall Archaeological Unit undertook two projects at Mount s Bay Penwith The first involved the excavation of a Bronze Age barrow and the second environmental augur core sampling in Marazion Marsh Both sites lie within an area of coastal hinterland which has been subject to incursions by rising sea levels Since the Mesolithic an area of approximately 1 kilometer in extent between the current shoreline and St Michael s Mount has been lost to gradually rising sea levels With current climate change this process is likely to occur at an increasing rate

Given their proximity the opportunity was taken to draw the results from the two projects together along with all available existing environmental data from the area For the first time the results from all previous palaeoenvironmental projects in the Mount s Bay area have been brought together Evidence for coastal change and sea level rise is discussed and a model for the drowning landscape presented In addition to modeling the loss of land and describing the environment over time social responses including the wider context of the Bronze Age barrow and later Bronze Age metalwork deposition in the Mount s Bay environs are considered The effects of the gradual loss of land are discussed in terms of how change is perceived its effects on community resilience and the construction of social memory and narratives of place The volume presents the potential for nationally significant environmental data to survive which demonstrates the long term effects of climate change and rising sea levels and peoples responses to these over time

#### **Prehistoric Gold in Europe** Giulio Morteani,Jeremy P.

#### **Climate and Cultural Change in Prehistoric Europe and the Near East** Peter F. Biehl,Olivier P. Nieuwenhuysse,2016-11-23

The subject of climate change could hardly be more timely In *Climate and Cultural Change in Prehistoric Europe and the Near East* an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change

as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations California Prehistory Terry L. Jones, Kathryn A. Klar, 2007-07-16 Some forty scholars examine California's prehistory and archaeology looking at marine and terrestrial palaeoenvironments initial human colonization linguistic prehistory early forms of exchange mitochondrial DNA studies and rock art This work is the most extensive study of California's prehistory undertaken in the past 20 years An essential resource for any scholar of California prehistory and archaeology Radiocarbon Dating R.E. Taylor, Ofer Bar-Yosef, 2016-06-03 This volume is a major revision and expansion of Taylor's seminal book Radiocarbon Dating An Archaeological Perspective It covers the major advances and accomplishments of the  $^{14}\text{C}$  method in archaeology and analyzes factors that affect the accuracy and precision of  $^{14}\text{C}$  based age estimates In addition to reviewing the basic principles of the method it examines  $^{14}\text{C}$  dating anomalies and means to resolve them and considers the critical application of  $^{14}\text{C}$  data as a dating isotope with special emphasis on issues in Old and New World archaeology and late Quaternary paleoanthropology This volume again a benchmark for  $^{14}\text{C}$  dating critically reflects on the method and data that underpins in so many cases the validity of the chronologies used to understand the prehistoric archaeological record Athens and Attica in Prehistory: Proceedings of the International Conference, Athens, 27-31 May 2015 Nikolas Papadimitriou, James C. Wright, Sylvian Fachard, Naya Polychronakou-Sgouritsa, Eleni Andrikou, 2020-07-30 This book provides the most complete overview of the Attica region from the Neolithic to the end of the Late Bronze Age It paves the way for a new understanding of Attica in the Early Iron Age and indirectly throws new light on the origins of what will later become the polis of the Athenians Prehistoric Britain from the Air Timothy Darvill, 1996-07-04 This book provides a bird's eye look at the monumental achievements of Britain's earliest inhabitants Arranged thematically it illustrates and describes a wide selection of archaeological sites and landscapes dating from between 500 000 years ago and the Roman conquest Timothy Darvill brings to life many of the familiar sites and monuments that prehistoric communities built and exposes to view many thousands of sites that simply cannot be seen at ground level Throughout the book he makes a unique application of social archaeology to the field of aerial photography *Modelling Human-Environment Interactions in and beyond Prehistoric Europe* Samuel Seuru, Benjamin Albouy, 2023-07-25 This book offers insight into the relationship between prehistoric and protohistoric human populations and the world around them It reconstructs key aspects of the palaeoenvironment from large scale drivers of environmental conditions such as climate to more regional variables such as vegetation cover and faunal communities The volume underscores how computational archaeology is leading the way in the study of past human

environment interactions across spatial and chronological scales With the increased availability of high resolution climate models agent based modelling palaeoecological proxies and the mature use of Geographic Information System in ecological modelling archaeologists working in interdisciplinary settings are well positioned to explore the intersection of human systems and environmental affordances and constraints These methodological advancements provide a better understanding of the role humans played in past ecosystems both in terms of their impact upon the environment and in return the impact of environmental conditions on human systems They may also allow us to infer past ecological knowledge and land use patterns that are historically contingent rather than environmentally determined This volume gathers contributions that combine reconstructions of past environments and archeological data with a view to exploring their complex interactions at different scales and invites scholars from varying disciplines and backgrounds to present and compare different modelling approaches

*The Dover Bronze Age Boat* Peter Clark,2013-02-15 Tells the dramatic story of the discovery in 1992 of the perfectly preserved remains of a large prehistoric sewn plank boat in Dover a unique find of a boat capable of cross channel sailing It includes carefully researched reconstruction drawings

**The Oxford Handbook of the Prehistoric Arctic** T. Max Friesen,Owen K. Mason,2016-08-05 The North American Arctic was one of the last regions on Earth to be settled by humans due to its extreme climate limited range of resources and remoteness from populated areas Despite these factors it holds a complex and lengthy history relating to Inuit I upiat Inuvialuit Yup ik and Aleut peoples and their ancestors The artifacts dwellings and food remains of these ancient peoples are remarkably well preserved due to cold temperatures and permafrost allowing archaeologists to reconstruct their lifeways with great accuracy Furthermore the combination of modern Elders traditional knowledge with the region s high resolution ethnographic record allows past peoples lives to be reconstructed to a level simply not possible elsewhere Combined these factors yield an archaeological record of global significance the Arctic provides ideal case studies relating to issues as diverse as the impacts of climate change on human societies the complex process of interaction between indigenous peoples and Europeans and the dynamic relationships between environment economy social organization and ideology in hunter gatherer societies In the *The Oxford Handbook of the Prehistoric Arctic* each arctic cultural tradition is described in detail with up to date coverage of recent interpretations of all aspects of their lifeways Additional chapters cover broad themes applicable to the full range of arctic cultures such as trade stone tool technology ancient DNA research and the relationship between archaeology and modern arctic communities The resulting volume written by the region s leading researchers contains by far the most comprehensive coverage of arctic archaeology ever assembled
