the planet's most fascinating habitats Book Jacket **Merchant Sail** William Armstrong Fairburn, 1945 **From Raft to Raft** Bengt Danielsson, 2013-06-01 Not since the fantastic story of the Kon Tiki expedition has there appeared such an exciting saga of a primitive raft expedition across the Pacific for scientific investigation From Raft to Raft tells the incredible suspenseful drama of the dangerous voyage led by Eric de Bisschop from Tahiti to Chile and back to Polynesia a foray twice as long as that undertaken by Kon Tiki and one that encountered infinitely greater difficulties and dangers Like Heyerdahl de Bisschop undertook his voyage to prove an ethnological theory but a theory completely contrary to that of his Norwegian forerunner Heyerdahl believed that voyagers from South America had visited Polynesia in prehistoric times de Bisschop was equally certain that Tahitian sea rovers had traveled as far as Chile and Peru After suffering unbelievable hardships during the first half of the voyage two members of the Tahiti Nui crew abandoned the project but de Bisschop and Alain Brun who narrated the story to Bengt Danielsson continued on their journey spending thirteen months aboard the most primitive rafts But despite the inadequacy of their crafts all of which had a frightening tendency to break up coupled with the dangers of attacking sharks mutiny by one of the crew raging storms and near starvation the Tahiti Nui voyage was completed in record time but not before a series of dramatic events occurred that were to culminate in tragic death **Evolution of Island Mammals** Alexandra van der Geer, George Lyras, John de Vos, 2021-04-27 EVOLUTION OF ISLAND MAMMALS Evolution on islands differs in a number of important ways from evolution on mainland areas Over millions of years of isolation exceptional and sometimes bizarre mammals evolved on islands such as pig sized elephants and hippos giant rats and gorilla sized lemurs that would have been formidable to their mainland ancestors Evolution of Island Mammals Second Edition provides an updated and expanded overview of the current knowledge on fossil island mammals worldwide ranging from the Oligocene to the onset of the Holocene The book addresses evolutionary processes and key aspects of insular mammal biology exemplified by a variety of fossil species Readers familiar with the first edition will find here a host of updated and enhanced material including An entirely new chapter on the island rule Updated and expanded theoretical chapters Updated and improved taxonomic information Extensive coverage of new discoveries Body masses or body size indices for most extinct island mammals New figures visualizing the richness of the fossil record This accessible and richly illustrated textbook is written for graduate level students and professional researchers in evolutionary biology palaeontology biogeography zoology and ecology Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge

from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development
