

sails. Since European first contact, Oceanic rafts have been known to undertake only short voyages; for example, the Mangarevans travelled up to 30 miles in a single voyage (Hornell, 1970, 77).

Logboats Basic un-extended logboats are scarcely noted in Oceanic accounts, but this may be because they were overlooked. Thompson (Best, 1925, 260) recorded recent use on the rivers of New Guinea, where they were poled, and Best (1925, 5, 6, 22) claimed that simple logboats (*moaka tino*) were much used 'in former times' in calm New Zealand waters.

Planked craft

Although some early reports mention 'keels', it seems probable that, at first contact, the central longitudinal member of Oceanic planked boats was of logboat hull form. See, for example, Banks' drawing of a *pahi* of the Society Islands (Greenhill, 1976, 28, fig.1). Thus they were to some degree 'extended logboats', the logboat base being less prominent in some than others.

There were differences in detail, but the following general building method seems to hold:

- 1 Tree felled by stone axes and head burned off.
- 2 Top side of log levelled to intended sheerline and required outline sketched on it.
- 3 Log hollowed using fire and adze; boat shaped externally at bow and stern.
- 4 When log was of insufficient length, other logs were hollowed and joined end to end by sewing with roots or fibre using butted or more complex joints. Similarly, where height at ends was insufficient, bow and stern pieces were added.
- 5 Other logs were split, using fire and hardwood wedges; the resultant planks were finished with an adze.
- 6 Washstrakes fitted to obtain the height required. They were sewn edge-to-edge, sometimes through holes in the planking, sometimes through projections from the planking, holes being made by pointed bones. Where there was more than one plank per strake, they were butted. Seams were filled with, for example, dried rushes, and were sometimes rein-

well as those studying the impact of technological change on classical society **The Troubadour's Song** David Boyle, 2009-05-26 On his long journey home from the Third Crusade Richard the Lionheart one of history's most powerful and romantic figures was shipwrecked near Venice in the Adriatic Sea. Forced to make his way home by land through enemy countries, he traveled in disguise but was eventually captured by Duke Leopold V of Austria, who in turn conveyed him to Henry VI the Holy Roman Emperor. Henry demanded a majestic ransom and Richard's mother Eleanor of Aquitaine raised the historic sum, one quarter of the entire wealth of England, and Richard was returned. But a peculiar legend followed him: that a troubadour named Blondel, a friend of Richard's, had journeyed across Europe singing a song he knew Richard would recognize in order to discover his secret place of imprisonment. David Boyle recreates the drama of the Third Crusade and the dynamic power politics and personalities of the late 12th century in Europe, as well as the growing fascination with romance and chivalry embodied in the troubadour culture. An evocation of a pivotal era, *The Troubadour's Song* is narrative history at its finest **World Trade Since 1431** Peter J. Hugill, 1993 In 1431 the Portuguese navigator Vasco da Gama set sail into the Atlantic, establishing a trade route to the Azores and marking the beginning of commerce with the West as we know it today. Equipped with reliable maps and instruments for open ocean navigation and highly seaworthy three-masted cannon-armed ships, Portugal soon dominated the Atlantic trade routes until the diffusion of Portuguese technologies to wealthier polities made Holland the eventual successor, owing to its geographic position and its immense commercial fleet **Ships & Shipping in Medieval Manuscripts** Joe Flatman, 2009 The ship loomed large in the medieval world and mind. Whether cruising upriver laden with grain or cresting the high seas bristling with guns, ships symbolized power and promise, strength and safety, crusade and conquest *Boats of the World* Sean McGrail, 2004 Maritime archaeology, the study of man's early encounter with the rivers and seas of the world, only came to the fore in the last decades of the twentieth century, long after its parent discipline, terrestrial archaeology, had been established. Yet there were seamen long before there were farmers, navigators before there were potters and boatbuilders, before there were wainwrights. In this book Professor McGrail attempts to correct some of the imbalance in our knowledge of the past by presenting the evidence for the building and use of early water transport: rafts, boats, and ships **The End of Roman Britain** Michael E. Jones, 1998 Jones offers a lucid and thorough analysis of the economic, social, military, and environmental problems that contributed to the failure of the Romans, drawing on literary sources and on recent archaeological evidence *English Heritage Book of Ships and Shipwrecks* Peter Marsden, 1997 A Bronze Age wreck off Dover, the Mary Rose, the Cutty Sark, the rescuing of a 19th-century transatlantic steamship, and a section of the Mulberry Harbour sunk on the eve of the Normandy Landings are among the tales in this exploration of the history of shipwrecks on Britain's sea beds. Documentary and pictorial evidence are presented alongside accounts of the rich archaeological findings, and the book is written in a style designed to appeal to the general as well as the professional reader **Beacons in the Landscape** Ian Brown, 2009-07-20 Of all Britain's great archaeological monuments, the

Iron Age hillforts have arguably had the most profound impact on the landscape if only because there are so many yet we know very little about them Were they recognised as being something special by those who created them or is the hillfort purely an archaeologists construct How were they constructed who lived in them and to what uses were they put This book which is richly illustrated with photography of sites throughout England and Wales addresses these and many other questions After discussing the difficult issue of definition and the great excavations on which our knowledge is based Ian Brown investigates in turn hillforts origins their architecture and the role they played in Iron Age society He also discusses the latest theories about their location social significance and chronology The book provides a valuable synthesis of the rich vein of research carried out in Britain on hillforts over the last thirty years Hillforts great variability poses many problems and this book should help guide both the specialist and non specialist alike though the complex literature Furthermore it has an important conservation objective Land use in the modern era has not been kind to these monuments with a significant number either disfigured or lost Public consciousness of their importance needs raising if their management is to be improved and their future assured
