**Transporting Moments: Mobility, Australian Railways and the Trained Society** Colin Symes, 2015-04-06

Sociologists have suggested that being on the move entails a complex choreography comprised of passenger comportment signage announcements and posters Employing insights from mobility theory *Transporting moments* provides an account of railway culture from a passenger's perspective The book uses the context of commuting in Sydney at a time when elements of its intra urban rail network were being upgraded as its principal case study This upgrade covers its rolling stock infrastructure and linguistic landscape It is argued that understanding the rationale behind these changes requires an understanding of the historical and policy context in which the railways of Sydney's New South Wales and Australia are embedded This is also the case with the nation's long distance trains whose operators have fought hard to stave off competition from airliners and cars *Transporting moments* therefore presents strong case for preserving public transport as a more equitable and sustainable form of mobility Governments Australian or otherwise can use these insights for productive investment in their rail networks and public transportation service in general and for reducing the nation's addiction to the automobile With its invaluable insights into travelling on trains *Transporting moments* is a fascinating addition to the growing corpus of literature on day to day mobility [The Iron Colossus: Adventures in the Realm of Indian Railways](#)

*The Meaningful City* James Douet,2025-08-15 This book presents a new way of examining cities to reveal the many and varied meanings which are written into urban landscapes As the title suggests urban areas are full of messages and communications with signs and symbols incorporated into buildings structures and plans Taking the rich architectural and urbanistic chronicle of Barcelona as a model the author

shows how different social groups consciously and unconsciously have written their values and interests on to the city. The narrative opens with the forced reshaping by military engineers of the former capital of Catalunya after 1714 and extends up to an analysis of the many competing actors and agencies which attempt to impose their perspectives on the contemporary city. It scrutinizes how deep cultural and social changes such as the Enlightenment, Romanticism, the Industrial Revolution, de-industrialisation and globalisation can be read in the urban environment as well as more intentional effects of major urban development projects including the Ciutadella fortress, the Rambles, the universal exhibitions of 1888 and 1929, the Sagrada Família, the Barcelona Model of urban renewal, the 22 innovation district and the super-illes sustainability plans. Informed by the approach of critical urban studies, the narrative is written in a clear style to engage readers with many different interests: students, urbanists and design professionals as well as residents and visitors to the city. Drawing on research from varied academic fields, published in English, Catalan and Spanish, it is illustrated with colour photographs of many of the buildings and sites that have made Barcelona a global resource for understanding contemporary cities.
