Beginning With Brandon's Interest Albert Osei, 2010-01-01 This book provides a critical account and analysis of one child on the autism spectrum who throughout his life has demonstrated that interest based education offers children with autism problem solving skills to deal with the myriad of problems that prevent educators as well as learners from developing an effective communication Traditionally behaviors of children with autism have been studied by researchers from diverse disciplines On the other hand many of these studies have grossly misrepresented autism related behaviors The problem has been the role given to the applied behaviour analysis ABA by behavior experts as a colander for understanding differences in autism The book reveals another flaw in autism studies and that is how researchers have harnessed their findings into an institutional effort permitting them to mandate and discriminate between differences in behaviours in autism This dilemma has prevented many parents from employing their best practices to advance their children's interest and skills beyond the institutional frontier This book invites readers to experience how one child with autism communicated his interest and skills beyond the conformist maxim to advance his language social and academic skills

Darryl Cole-Christensen,2010-06-28 In the 1950s Darryl Cole Christensen and his family were among the first settlers of the
Coto Brus an almost impenetrable mountainous rain forest region of southeastern Costa Rica In this evocative book he
captures the elemental struggles and rewards of settling a new frontier an experience forever closed to most people in
Western urbanized society With the perspective of more than forty years residence in the Coto Brus Cole Christensen ably
describes both the settlers dreams of bringing civilization and progress to the rain forest and the sweeping and irreversible
changes they caused throughout the ecosystem as they cut the rain forest down Writing neither to apologize for nor to
defend their actions he instead illuminates the personal and subjective factors that cause people to risk danger and hardship
for the uncertain rewards of settling a frontier In his own words Cole Christensen says This is a book for the scientist who
wants to recapture a sense of an incalculable world departed for the student who asks How is it that our forebears changed
and restructured this land For the adventurer who dreams of the expanse of frontiers for every person who having passed
once through the darkening forest along a path in twilit stillness looks back to find that a blanket of murmurs remains
