William

Rothman,2014-03-25 William Rothman argues that the driving force of Hitchcock's work was his struggle to reconcile the dark vision of his favorite Oscar Wilde quote Each man kills the thing he loves with the quintessentially American philosophy articulated in Emerson's writings that gave classical Hollywood movies of the New Deal era their extraordinary combination of popularity and artistic seriousness A Hitchcock thriller could be a comedy of remarriage or a melodrama of an unknown woman both Emersonian genres except for the murderous villain and godlike author Hitchcock who pulls the villain's strings and ours Because Hitchcock believed that the camera has a murderous aspect the question What if anything justifies killing which every Hitchcock film engages was for him a disturbing question about his own art Tracing the trajectory of Hitchcock's career Rothman discerns a progression in the films meditations on murder and artistic creation This progression culminates in Marnie 1964 Hitchcock's most controversial film in which Hitchcock overcame his ambivalence and fully embraced the Emersonian worldview he had always also resisted Reading key Emerson passages with the degree of attention he accords to Hitchcock sequences Rothman discovers surprising affinities between Hitchcock's way of thinking cinematically and the philosophical way of thinking Emerson's essays exemplify He finds that the terms in which Emerson thought about reality about our flux of moods about what it is within us that never changes about freedom about America about reading about writing and about thinking are remarkably pertinent to our experience of films and to thinking and writing about them He also reflects on the implications of this discovery not only for Hitchcock scholarship but also for film criticism in general

Theories of Surplus Value Karl Marx, 2020-09-28 Theories of Surplus Value is a book that unlike Marx actually needs an introduction Theories was intended to be collected and published as the fourth volume to Marx s Capital but after Engels had successfully collected and published volumes two and three after Marx s death Engels died before he could publish it Theories has had a long history of being in and out of publication and particularly in and out of being an actually accessible publication In 1905 the infamously hated by Lenin Karl Kautsky published the first edition of the manuscript in three volumes separated and rearranged by Adam Smith in volume one to David Ricardo in the other two volumes with the breakup of the Ricardian school as the third volume Kautsky s version circulated in print and was translated to many languages over the decades remaining the sole version of Theories until The Institute of Marxism Leninism published a new German version This arrangement while still relatively close to Kautsky s narrative arrangement of tracing surplus value from Smith to the Ricardian split into vulgar economics annotated the manuscript with different topic headings This version was then translated into English by Progress Publishers and this is the version of the book which circulates today and is considered to be the most accurate version to Marx s notebooks This Radical Reprint by Pattern Books is made to be accessible and as close to only manufacturing cost as possible This first volume of Theories of Surplus Value covers the origins of surplus value to clarifying confusion between value and material substance to Adam Smith s definitions of value and the contradictions of Smith s idea on value and profit to another extrapolation on circulation within and by capitalist production and the process of reproduction These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of

Das Kapital, also called Capital: A Critique of Political Economy, is the most cited book in the social sciences published before 1950. Marx aimed to reveal the economic patterns underpinning the capitalist mode of production in contrast to classical political economists such as Adam Smith, Jean-Baptiste Say, David Ricardo, and John Stuart Mill. Marx proposes that the motivating force of capitalism is in the exploitation of labor, whose unpaid work is the ultimate source of surplus value. Das Kapital proposes an explanation of the laws of motion of the capitalist economic system from its origins to its future by describing the dynamics of the accumulation of capital, the growth of wage labour, the transformation of the workplace, the concentration of capital, commercial competition, the banking system, the decline of the profit rate, land rents, etcetera.
